

Exam Questions for the Oracle 1Z0-1055-25 - Master Your Certification Journey

P.S. Free & New 1Z0-1055-25 dumps are available on Google Drive shared by Real4exams: <https://drive.google.com/open?id=1xaBHAI9B1cF9t-bRNClquBjBpNPCab9->

A team of experts works hard for the Oracle Certification Exam. To assist you in the objective of cracking the Oracle 1Z0-1055-25 Exam, Oracle 1Z0-1055-25 Dumps is offering a study material which comes in three versions and meets all needs of your exam preparation. Our product is available in Oracle 1Z0-1055-25 Dumps PDF, a desktop Oracle 1Z0-1055-25 dumps practice test, and a web-based Oracle 1Z0-1055-25 dumps practice test.

Oracle 1Z0-1055-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Implementing Supplier Invoices: This section of the exam measures skills of Financial Systems Specialists and covers the setup and processing of supplier invoices. It focuses on understanding supplier invoice processing, AI-assisted automation, and key configurations such as invoice options, distribution sets, tolerances, holds, approvals, and release procedures. Candidates also learn how to manage business rules for invoice validation and processing efficiency.

Topic 2	<ul style="list-style-type: none"> • Implementing Payments: This section of the exam measures skills of Payments Configuration Specialists and focuses on the payment lifecycle in the Oracle Fusion Payables module. It includes understanding the supplier payment process, AI role in automation, and the configuration of payment options, methods, disbursement choices, and process profiles. The section also involves managing approval workflows and payment process templates for secure and accurate disbursement management.
Topic 3	<ul style="list-style-type: none"> • Setting up Common Configurations in the Supplier Invoice to Payments Process This section of the exam measures skills of Accounts Payable Analysts and focuses on understanding the core setup required for supplier invoicing and payment processes. It covers the Enterprise Structure, Financial Reporting Structure, and Data Security model. Candidates must know the purpose of Business Units and Reference Sets and be able to manage Supplier and Bank Account Master Data effectively.
Topic 4	<ul style="list-style-type: none"> • Implementing Accounts Payable Balances: This section of the exam measures skills of Finance Operations Managers and covers Accounts Payable (AP) reporting, analysis, and period closing activities. It explains AP balance configurations, calendar management, and reconciliation with the General Ledger. Candidates must understand the setup of aging periods, payables calendars, and best practices for ensuring accurate financial close processes.
Topic 5	<ul style="list-style-type: none"> • Implementing Expenses: This section of the exam measures skills of Expense Management Administrators and focuses on managing and configuring employee expense processes. It includes expense report processing, approval rules, and audit policies. Candidates must understand system configurations for templates, corporate card programs, conversion rate policies, travel integration, and AI-driven automation in expense management.

Top 1Z0-1055-25 Latest Exam Question & Leader in Certification Exams Materials & Latest updated Reliable 1Z0-1055-25 Test Experience

With the simulation function, our 1Z0-1055-25 training guide is easier to understand and have more vivid explanations to help you learn more knowledge. You can set time to test your study efficiency, so that you can accomplish your test within the given time when you are in the Real 1Z0-1055-25 Exam. Besides, you can get the real feeling of taking part in the real exam for our 1Z0-1055-25 exam questions have the function of simulating the real exam. So that you can have a better performance when you attend the real exam.

Oracle Fusion Cloud Financials: Payables and Expenses 2025 Implementation Professional Sample Questions (Q22-Q27):

NEW QUESTION # 22

Which three options are available to filter data when you submit the Prepare Payables to Ledger Reconciliation Report?

- A. Natural Account
- B. Balancing Segment Value
- C. Business Unit
- D. Supplier
- E. Primary Ledger
- F. Accounting Period

Answer: B,C,F

Explanation:

Comprehensive and Detailed In-Depth

The Prepare Payables to General Ledger Reconciliation process in Oracle Financials Cloud is essential for ensuring that your payables and general ledger data are aligned. When submitting this process, you have several parameters available to filter and select the specific data you need for reconciliation. The key parameters include:

Business Unit (Option A):

Purpose: Allows you to reconcile data for a specific business unit within your organization. This is particularly useful if your enterprise

structure includes multiple business units and you need to focus on one at a time.

Reference:

Accounting Period (Option B):

Purpose: Enables you to select the accounting period (either open or closed) for which you want to prepare the reconciliation data. This ensures that the report focuses on the transactions relevant to the specified time frame.

Balancing Segment Value (Option C):

Purpose: Allows you to filter the data by specific balancing segment values, which correspond to entities like companies or divisions within your chart of accounts. This is useful for reconciling data at a more granular level.

While options D (Supplier), E (Primary Ledger), and F (Natural Account) are important attributes within the payables and general ledger modules, they are not listed as direct filter parameters for the Prepare Payables to General Ledger Reconciliation process. Therefore, the correct answers are A. Business Unit, B. Accounting Period, and C. Balancing Segment Value.

NEW QUESTION # 23

Oracle Cloud currently offers two invoice scanning solutions: Integrated Imaging and Intelligent Document Recognition (IDR). Both solutions function similarly.

In which two ways do these invoice scanning solutions operate in the cloud?

- A. Customers scan and store the invoice images on-premises and attach them during invoice entry.
- **B. Customers ask their suppliers to scan and email the invoice.**
- **C. Customers scan the invoice on-premises and email the images.**
- D. Customers ask suppliers to send electronic invoices.
- E. Customers cannot use invoice imaging in the Cloud.

Answer: B,C

Explanation:

Comprehensive and Detailed In-Depth

Oracle Cloud's Integrated Imaging and Intelligent Document Recognition (IDR) solutions streamline the processing of supplier invoices by automating data extraction and invoice creation. These solutions support multiple methods for capturing and importing invoice images into the cloud system.

A . Customers scan the invoice on-premises and email the images.

Organizations that receive paper invoices can digitize them by scanning the documents on-premises. Once scanned, these images are emailed to a designated address provided by Oracle Cloud. The Integrated Imaging or IDR system retrieves these images from the email inbox, processes them to extract relevant data, and automatically creates invoices within the Payables module. This method ensures that paper-based invoices are efficiently integrated into the cloud system without manual data entry.

docs.oracle.com

C . Customers ask their suppliers to scan and email the invoice.

To enhance efficiency, customers can request that their suppliers scan physical invoices and send the digital images directly via email. These emailed invoice images are received by the designated email account associated with the customer's Oracle Cloud instance. The Integrated Imaging or IDR solutions then process these images, extracting the necessary invoice data and creating corresponding entries in the Payables system. This approach reduces processing time and minimizes potential errors associated with manual data entry.

docs.oracle.com

B . Customers ask suppliers to send electronic invoices.

While encouraging suppliers to send electronic invoices (such as XML or EDI formats) is a best practice for streamlining invoice processing, this method does not involve the Integrated Imaging or IDR solutions, which are specifically designed for processing scanned invoice images. Electronic invoices are typically processed through different channels within Oracle Cloud, such as the Supplier Portal or electronic data interchange systems.

blogs.infosys.com

D . Customers scan and store the invoice images on-premises and attach them during invoice entry.

In this scenario, customers manually scan and store invoice images on their local systems and then attach these images during manual invoice entry into the Oracle Cloud Payables module. This process does not utilize the automated capabilities of the Integrated Imaging or IDR solutions, which are designed to handle the import, recognition, and processing of invoice images sent via email.

docs.oracle.com

E . Customers cannot use invoice imaging in the Cloud.

This statement is incorrect. Oracle Cloud provides robust invoice imaging solutions, namely Integrated Imaging and Intelligent Document Recognition, enabling customers to process scanned invoices efficiently within the cloud environment.

docs.oracle.com

By leveraging these solutions, organizations can automate the extraction of invoice data from scanned images, reduce manual intervention, and improve the accuracy and efficiency of their accounts payable processes.

NEW QUESTION # 24

During an expense audit, the auditor marks an expense item, which is missing a receipt, to be Short Paid. The auditor chooses to complete the audit and warn the user.

Given that the Expense Report Audit Approval is set to After Manager Approval, what are the two valid results of the auditor's action?

- A. The approved part of the expense report is not eligible for expense reimbursement.
- **B. A new expense report containing disallowed expense items is immediately created.**
- **C. The approved part of the expense report is eligible for expense reimbursement.**
- D. A new expense report containing disallowed expense items is not created until the manager approves the short payment.

Answer: B,C

NEW QUESTION # 25

You have been asked with creating an Oracle transactional Business Intelligence (OTBI) analysis to help reconcile payables balances against general ledger. The analysis must show both posted invoices and Payments.

Which subject area must you select to create this analysis?

- **A. Payables Invoices-- Trail Balance Real Time**
- B. Payables Payments-- Disbursements Real Time
- C. Payables Invoices-- Transactions Real Time
- D. Payables balances-- Reconciliation Time

Answer: A

NEW QUESTION # 26

You participated as a functional consultant in the implementation of Oracle Procurement as well as Payables for customer ABC Consulting. A Payables Analyst has logged a ticket stating that the "Create Supplier" task is not showing up in the Supplier work area. You checked the related settings and found that the Payables Analyst user account has been defined as a Procurement Agent. Why was the Payables Analyst NOT able to see the "Create Supplier" task in the Supplier work area?

- A. The analyst was not given the Procurement Requester role.
- B. The analyst was not given the Procurement Administrator role.
- C. The analyst was not given the Supplier Administrator role.
- **D. The analyst was not given the Supplier Manager role.**

Answer: D

Explanation:

Comprehensive and Detailed In-Depth

In Oracle Fusion Applications, access to specific tasks and functionalities is governed by the roles assigned to a user. The "Create Supplier" task within the Supplier work area is a critical function that allows authorized users to add new suppliers to the system. To access this task, a user must possess the appropriate roles that grant the necessary permissions.

A. The analyst was not given the Procurement Administrator role.

The Procurement Administrator role encompasses a broad range of procurement-related activities, including configuration and oversight functions. However, the ability to create suppliers is not inherently included within this role's permissions. Therefore, assigning the Procurement Administrator role alone would not grant access to the "Create Supplier" task.

B. The analyst was not given the Supplier Manager role.

The Supplier Manager role is specifically designed to manage supplier-related activities, including the creation and maintenance of supplier records. Assigning this role to a user provides them with the necessary permissions to access the "Create Supplier" task within the Supplier work area. In the scenario described, the absence of the Supplier Manager role is the reason the Payables Analyst cannot see the "Create Supplier" task. This is corroborated by Oracle's documentation, which states that users require the Supplier Manager role to create suppliers.

support.oracle.com

C. The analyst was not given the Supplier Administrator role.

While the Supplier Administrator role grants access to certain supplier-related functions, it does not include the permissions necessary to create new suppliers. Users with only the Supplier Administrator role may have visibility into supplier information but

lack the capability to add new supplier records. Therefore, the absence of this role is not the cause of the issue.

D. The analyst was not given the Procurement Requester role.

The Procurement Requester role is intended for users who initiate purchase requisitions and related procurement activities. This role does not encompass supplier creation capabilities. Assigning the Procurement Requester role would not grant access to the "Create Supplier" task, and its absence is not related to the issue at hand.

In summary, to enable the Payables Analyst to access the "Create Supplier" task, the Supplier Manager role must be assigned to their user account. This role provides the necessary permissions to create and manage supplier records within the Oracle Fusion Applications.

NEW QUESTION # 27

.....

If you feel that you always suffer from procrastination and cannot make full use of your spare time, maybe our 1Z0-1055-25 study materials can help you solve your problem. We are willing to recommend you to try the 1Z0-1055-25 practice guide from our company. Our 1Z0-1055-25 learning questions are in high quality and efficiency test tools for all people. You can just try our three different versions of our 1Z0-1055-25 training quiz, you will find that you can study at anytime and anyplace.
