What are three valid ways to configure Virtual Delivery Agent (VDA) registration? (Choose three.)

- A. **Group Policy Object (GPO)**
- B. **DHCP Options**
- C. Organizational Unit (OU) based Controller discovery

#### NEW QUESTION # 59

Scenario: A Citrix Administrator maintains a Citrix Virtual Apps and Desktops Site with a number of network print servers being used for all users. Currently, the print servers use native Windows drivers. No client printers are being used. New company guidelines require a reduction in the number of native drivers being used within the Site infrastructure. Which step can the administrator take to meet the new company guidelines?

- A. Enable the Citrix Universal Print Driver (EMF) driver and leave the default Universal printer driver usage policy setting.
- B. Configure the Citrix Universal Generic Printer and update the Auto-create generic universal printer policy setting.
- C. Install the Universal Print Server on all print servers in the Site and leave the default Universal printer driver usage policy setting.
- D. **Install the Universal Print Server on all print servers in the Site and update the Universal printer driver usage policy setting.**

**Answer: D**

Explanation:

By installing the Citrix Universal Print Server and configuring the Universal printer driver usage policy, print servers can use the Citrix Universal Print Driver instead of multiple native Windows drivers. This reduces the number of drivers in the environment while ensuring centralized network printing remains functional.

#### NEW QUESTION # 60

Scenario: A Citrix Administrator maintains a Citrix Virtual Apps and Desktops Site with a large number of Windows users running various locally attached client printers. No network printers are being used. The administrator has enabled the HDX printer mapping policy to 'Auto-create all client printers', which has resulted in a large number of drivers being loaded onto the Virtual Delivery Agent (VDA) machines. New standards are requiring the administrator to limit these Windows drivers on the VDA machines. Which printing feature can the administrator enable to meet the new standards?

- A. The Auto-create local (non-network) client printers only policy
- B. **The Citrix Universal Printer Driver**
- C. The Auto-create PDF universal printer policy

- D. The Citrix Universal Print Server

**Answer: B**

Explanation:

Enabling the Citrix Universal Printer Driver allows client printers to be auto-created without requiring individual printer drivers to be installed on the VDA machines. This standardizes printing, reduces driver sprawl, and meets compliance requirements by minimizing the number of Windows drivers on the VDAs.

**NEW QUESTION # 61**

By default, what is the printing behavior when no printing policy is configured?

- A. The Universal Print Server is enabled.
- B. The generic universal printer is automatically created.
- C. Direct connections to print servers are prohibited.
