ServiceNow Certified Implementation Specialist - Strategic Portfolio Management Sample Questions (Q29-Q34):

NEW QUESTION # 29
What are the characteristics of the default Resource Management schedule?
Choose 3 answers

- A. Monday through Friday 08:00-12:00
- B. Weekly on Weekdays
- C. 8-5 weekdays excluding holidays
- D. Monday through Friday 13:00-17:00
- E. Repeats every week on Saturday

Answer: A,B,D

NEW QUESTION # 30
A user's availability is calculated as:

- A. Capacity minus allocation
- B. Allocated time
- C. Sum of allocated and confirmed hours, divided by the total capacity
- D. Allocated hours divided by the total capacity

Answer: D

Explanation:
According to the ServiceNow documentation1, a user's availability is calculated as the ratio of allocated hours to total capacity, expressed as a percentage. Allocated hours are the hours that a user is assigned to work on a project or demand. Total capacity is the maximum number of hours that a user can work in a given period, based on their schedule and availability profile. A user's availability indicates how much of their time is already allocated and how much is still available for new assignments.

NEW QUESTION # 31

Which role can create a project status report in the Project Workspace?

- A. it_demand_manager
- B. it_project_manager
- C. it_project_user
- D. Itil

Answer: B

NEW QUESTION # 32

If an it_project_manager does not want to equally distribute hours across the resource plan time frame, what allocation spread should be used?

- A. Front Load.
- B. Any.
- C. Back Load.
- D. Even.

Answer: B

Explanation:
If an it_project_manager does not want to equally distribute hours across the resource plan time frame, the allocation spread should be set to Any. This option allows the it_project_manager to manually enter the hours for each month or quarter in the resource plan. The other options (Even, Back Load, and Front Load) automatically distribute the hours evenly, from the end, or from the start of the time frame, respectively. You can find more information about the allocation spread in the Product Documentation for ServiceNow.

NEW QUESTION # 33

How many WBS levels can be shown on the planning console?

- A. No Limit.
- B. One.
- C. Three.
- D. Two.

Answer: A

Explanation:
According to the ServiceNow documentation1, the planning console can show as many WBS levels as desired, starting from the level 1 to the lowest system components. The WBS levels can be expanded or collapsed by clicking the plus or minus icons next to the task names. The planning console also allows users to create, edit, and delete tasks, as well as add dependencies, assign resources, and track progress.
