

# 2026 Exam OGEA-101 Collection Pdf | Efficient OGEA-101 100% Free Test Online

P.S. Free 2026 The Open Group OGEA-101 dumps are available on Google Drive shared by DumpsQuestion: [https://drive.google.com/open?id=1VS\\_nWVkvhXWsxjOfRhmL7JHmU9AcIvS](https://drive.google.com/open?id=1VS_nWVkvhXWsxjOfRhmL7JHmU9AcIvS)

As a worldwide leader in offering the best OGEA-101 test torrent in the market, DumpsQuestion are committed to providing update information on OGEA-101 exam questions that have been checked many times by our professional expert, and we provide comprehensive service to the majority of consumers and strive for constructing an integrated service. What's more, we have achieved breakthroughs in certification training application as well as interactive sharing and after-sales service. It is worth for you to purchase our OGEA-101 training braindump.

With both OGEA-101 exam practice test software you can understand the TOGAF Enterprise Architecture Part 1 Exam (OGEA-101) exam format and polish your exam time management skills. Having experience with OGEA-101 exam dumps environment and structure of exam questions greatly help you to perform well in the final OGEA-101 Exam. The desktop practice test software is supported by Windows. Our web-based practice exam is compatible with all browsers and operating systems.

## Test OGEA-101 Online - Reliable OGEA-101 Test Pattern

One of our outstanding advantages of the OGEA-101 study guide is our high passing rate, which has reached 99%, and much higher than the average pass rate among our peers. Our high passing rate explains why we are the top OGEA-101 prep guide in our industry. The source of our confidence is our wonderful OGEA-101 Exam Questions. Passing the exam won't be a problem as long as you keep practice with our OGEA-101 study materials about 20 to 30 hours. Our experts designed the OGEA-101 question and answers in accord with actual examination questions, which would help you pass the exam with high proficiency.

## The Open Group OGEA-101 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Information Systems Architecture: Focusing on data and application architectures, this topic of the OGEA-101 exam assesses ability of TOGAF practitioners to define and manage information systems. It measures their skills in identifying data entities and application components.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Architecture Governance: This topic of The Open Group OGEA-101 exam covers the governance framework and responsibilities of architecture boards. It evaluates the skills of TOGAF practitioners in establishing governance structures.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>• <b>Architecture Vision:</b> Aspiring TOGAF practitioners learn to develop an architecture vision that aligns with business goals and drivers. This topic evaluates the skills in articulating a clear and compelling vision, a necessary competency for successfully navigating the OGEA-101 exam and implementing enterprise architecture.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Business Architecture:</b> This topic of The Open Group OGEA-101 exam emphasizes the development of business architecture, including baseline and target architectures. It measures the understanding of TOGAF practitioners about business capabilities and processes.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>Implementation Governance:</b> This topic of The Open Group OGEA-101 Exam emphasizes the governance framework for architecture implementation, including compliance processes. It measures the understanding of TOGAF practitioners about governance principles, a key competency for the OGEA-101 exam.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>• <b>Introduction to the Architecture Development Method (ADM):</b> The ADM is central to TOGAF, outlining a structured approach to developing and managing enterprise architecture. This section assesses comprehension of TOGAF practitioners about the ADM phases and their application, ensuring they grasp the method's iterative nature, which is vital for the OGEA-101 exam.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>• <b>Architecture Content Framework:</b> Candidates learn about the TOGAF content metamodel and architecture artifacts. This topic of the OGEA-101 exam measures their understanding of content organization and documentation.</li> </ul>

## The Open Group TOGAF Enterprise Architecture Part 1 Exam Sample Questions (Q131-Q136):

### NEW QUESTION # 131

Which one of the following classes of information within the Architecture Repository would typically contain a list of the applications in use within the enterprise?

- A. Architecture Metamodel
- B. Governance Log
- C. Architecture Landscape
- D. Reference Library

**Answer: C**

Explanation:

The Architecture Landscape is a class of information within the Architecture Repository that shows an architectural view of the building blocks that are in use within the organization today (the Baseline Architecture), as well as those that are planned for the future (the Target Architecture). The Architecture Landscape typically contains a list of the applications in use within the enterprise, along with their relationships and dependencies, as well as other relevant architectural information. The Architecture Landscape helps to identify opportunities for re-use, consolidation, or retirement of existing applications, as well as gaps or overlaps in the current or future architecture.

### NEW QUESTION # 132

Which of the following are the four purposes that typically frame the planning horizon, depth and breadth of an Architecture Project, and the contents of the EA Repository?

- A. Segment, Capability, Enterprise, and End-to-end Target Architecture
- B. General, Foundational, Subordinate, and Superior Architecture
- C. Strategy, Portfolio, Project, Solution Delivery
- D. Avant-Garde, Big-Bang, Discreet, and Cohesive

**Answer: C**

Explanation:

In TOGAF, the planning horizon, level of detail, and scope of architecture work are often framed according to the purpose the

architecture is intended to serve. The four purposes typically used for this framing are Strategy, Portfolio, Project, and Solution Delivery. These categories help determine the breadth and depth of architecture effort and also influence what content should be maintained in the EA Repository.

At the Strategy level, architecture supports long-range direction and enterprise transformation. At the Portfolio level, it helps guide investment decisions and the coordination of related change initiatives. At the Project level, architecture becomes more specific to a defined initiative or transformation effort. At the Solution Delivery level, the focus shifts to implementable solution guidance and delivery support.

This structure is important because it allows architecture practitioners to tailor the amount of detail, planning timescale, and repository content according to the intent of the work. The other answer sets are not recognized TOGAF framings for architecture purpose. They either use non-standard terminology or describe concepts unrelated to the formal way architecture scope is planned. Therefore, the correct answer is Strategy, Portfolio, Project, Solution Delivery, which is option D.

### NEW QUESTION # 133

Consider the illustration of an architecture development cycle.

Select the correct phase names corresponding to the labels 1, 2 and 3?

- A. 1 Requirements Management - 2 Implementation Governance - 3 Preliminary
- **B. 1 Requirements Management - 2 Change Management - 3 Strategy**
- C. 1 Continuous Improvement - 2 Migration Planning - 3 Architecture Vision
- D. 1 Architecture Governance - 2 Implementation Governance - 3 Preliminary

**Answer: B**

### NEW QUESTION # 134

Refer to the table below:

□ Which ADM Phase does this describe?

- A. Preliminary Phase
- B. Phase C
- C. Phase A
- **D. Phase B**

**Answer: D**

Explanation:

Phase B of the ADM cycle is the Business Architecture phase. It describes the development of a Business Architecture to support an agreed Architecture Vision. The objectives of this phase are to describe the baseline and target Business Architecture, identify candidate Architecture Roadmap components based on gaps between the baseline and target, and determine whether an incremental approach is required. Reference:

The TOGAF Standard | The Open Group Website, Section 3.2.2 Phase B: Business Architecture.

### NEW QUESTION # 135

Consider the following ADM phases objectives.

□ Which phase does each objective match?

- A. 1F-2G-3F-4F
- B. 1G-2E-3F-4E
- **C. 1E-2F-3E-4G**
- D. 1F-2F-3E-4G

**Answer: C**

Explanation:

1E: To identify delivery vehicles (projects programs portfolios) that will deliver the Target Architecture 2F:

To confirm readiness and ability to undergo change 3E: To determine whether an incremental approach is required and if so identify Transition Architectures that will deliver continuous business value 4G: To perform appropriate governance functions while the solution is being implemented
