Test NCP-EUC Quiz, NCP-EUC Valid Test Questions

What's more, part of that SurePassExams NCP-EUC dumps now are free: https://drive.google.com/open?id=16x1PzsoGOn1TN50LjAjPNpg3EWfuvmms

SurePassExams is one of the leading platforms that has been helping Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam exam candidates for many years. Over this long time period we have helped NCP-EUC exam candidates in their preparation. They got help from SurePassExams NCP-EUC Practice Questions and easily got success in the final Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam certification exam. You can also trust SurePassExams NCP-EUC exam dumps and start preparation with complete peace of mind and satisfaction.

Nutanix NCP-EUC exam is designed for IT professionals who specialize in end-user computing. Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam certification exam is aimed at validating the skills and knowledge of candidates in designing, implementing, and managing Nutanix-powered end-user computing solutions. Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam certification proves that the candidate is proficient in deploying and managing virtual desktop infrastructure (VDI) and enterprise mobility management (EMM) solutions on Nutanix.

Nutanix NCP-EUC Certification Exam is a computer-based test that evaluates the candidate's knowledge of Nutanix end-user computing solutions, including desktop and application virtualization, VDI (Virtual Desktop Infrastructure), and more. NCP-EUC exam consists of multiple-choice questions, and the passing score is 300 out of 500. NCP-EUC exam is conducted by Pearson VUE, a leading provider of computer-based testing services.

NCP-EUC Valid Test Questions, NCP-EUC Exam Reference

PDF version of NCP-EUC training materials is legible to read and remember, and support printing request, so you can have a print and practice in papers. Software version of practice materials supports simulation test system, and give times of setup has no restriction. Remember this version support Windows system users only. App online version of NCP-EUC Exam Questions is suitable to all kinds of equipment or digital devices and supportive to offline exercise on the condition that you practice it without mobile data.

Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam Sample Questions (Q52-Q57):

NEW QUESTION # 52

An administrator has deployed Citrix Virtual Apps and Desktops on a Nutanix dedicated VD' cluster.
What is the delivery method in use, based on the curator reports shown in the exhibit?

- A. Citrix Provisioning
- B. Linked Clones
- C. Citrix MCS
- D. Full Clones

Answer: C

Explanation:
the delivery method in use is Citrix MCS. Citrix Machine Creation Services (MCS) is a technology that creates and manages virtual machines from a master image. MCS uses Nutanix storage efficiency features such as deduplication and shadow clones to reduce storage consumption and improve performance. The exhibit shows that the VDI cluster has a high deduplication ratio (7.5x) and a low physical space usage (1.2 TB) compared to the logical space usage (9.1 TB), which indicates that MCS is in use.

NEW QUESTION # 53

A company based out of San Jose, CA, USA is considering deploying a global virtual desktop environment. Currently. there is no solution for virtual desktops. The company has employees globally and decides to leverage the Public Cloud across multiple regions for their deployment.
Which factor is the most important for choosing a public cloud data center location to optimize for end-user performance?

- A. The network latency between the end user and the data center should be minimized,
- B. The distance from the data center to the end users should be minimized.
- C. The combined distance the corporate headquarters, the data center, and the users should be minimized.
- D. The data center should be in the same state or country as the end users.

Answer: A

Explanation:
one of the factors that affects end-user performance in a virtual desktop environment is network latency, which is the time it takes for data packets to travel between two points on a network.
Therefore, if the company wants to optimize end-user performance, they should choose a public cloud data center location that minimizes the network latency between the end user and the data center.

NEW QUESTION # 54

An EUC environment is being deployed with non-persistent desktops.
How should an administrator configure OS updates via group policy for the non-persistent desktops organizational unit?

- A. Disable - Configure automatic updates
- B. Enable - Always automatically restart at the scheduled time
- C. Disable - Allow automatic updates immediate installation
- D. Enable - Allow automatic updates immediate installation

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract of Nutanix End User Computing documents:

According to Nutanix and Microsoft Best Practices for Non-Persistent VDI images:

* Policy Setting: The Group Policy setting "Allow Automatic Updates immediate installation" should be set to Disabled.

* Reasoning: In a non-persistent environment, desktops revert to their base state upon reboot. Allowing automatic updates to install immediately during a user session consumes system resources (CPU/IOPS) and any changes made are discarded when the user logs off and the VM reboots.

* Correct Management: Updates should be applied solely to the Master/Gold Image during a maintenance window. Once the master image is updated and sealed, it is redeployed to the pool.

Disabling immediate installation prevents the "Windows Update" service from attempting to patch transient clones unnecessarily.

NEW QUESTION # 55

Due to a recent unprivileged access incident, an administrator needs to better protect critical applications by preventing lateral movement within the EUC environment.

Which Flow Network Security feature will accomplish this task?

- A. VM quarantine
- B. Inbound policies
- C. Microsegmentation
- D. Outbound policies

Answer: C

Explanation:

Microsegmentation is the specific functional capability within Nutanix Flow Network Security designed to control and restrict east-west traffic between virtual machines.

While traditional firewalls protect the perimeter (North-South), Microsegmentation applies stateful firewall policies directly to the vNIC of each VM. This allows an administrator to define granular rules that explicitly allow or deny traffic between individual VMs or groups of VMs (e.g., preventing a compromised VDI desktop from accessing a database server on the same subnet). This feature is the primary mechanism used to prevent lateral movement within the environment.

NEW QUESTION # 56

An administrator receives many complaints about increased boot times from a WI user over the past few days.

Upon further review, the administrator discovers delays in the deployments of VD' desktops. The administrator could not find any indications that the cluster resources are insufficient.

What should the administrator verify to resolve this issue?

- A. If Memory Overcommitment was disabled
- B. Erasure Coding was disabled
- C. If a node failed
- D. If Shadow Clone was disabled

Answer: D

Explanation:

Shadow Clones are a feature of the AOS storage that enables distributed caching of virtual disks (vDisks) that are read by multiple VMs on different nodes. This can improve performance and reduce network traffic in scenarios such as VDI deployments.

Therefore, if Shadow Clones were disabled, it could cause delays in the deployments of VD' desktops, as they would have to read the vDisk from a remote node instead of a local cache.

NEW QUESTION # 57

......

You have to change the way your study. Get the best Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam NCP-EUC exam questions for your text, check all the chapters, and carefully take note of the important points. You can even highlight the important ones to get a quick revision whenever you want. Cramming the Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam NCP-EUC books is not a good idea because it will not help you in understanding the concept.

You just read the lines, try to remember them, and believe that you can keep those lines in your mind during the Nutanix Certification Exams.
