## HCL Software Academy HCL-DOM-AADM-12 Exam Training, Valid HCL-DOM-AADM-12 Exam Forum

Our company has always been following the trend of the HCL-DOM-AADM-12 certification. Our research and development team not only study what questions will come up in the exam, but also design powerful study tools like HCL-DOM-AADM-12 exam simulation software. This Software version of our HCL-DOM-AADM-12 learning questions are famous for its simulating function of the real exam, which can give the candidates a chance to experience the real exam before they really come to it.

## HCL Software Academy HCLSoftware Certified Associate Administrator Exam - Notes/Domino 12 Sample Questions (Q11-Q16):

### NEW QUESTION # 11

Which database stores all administration requests for processing by AdminP?

- A. names.nsf
- B. daoscat.nsf
- C. ddm.nsf
- D. admin4.nsf

**Answer: D**

Explanation:

All requests for the Administration Process are stored in the Administration Requests database (admin4.nsf). When an administrator performs a task (like deleting a user), a "request" document is created in this database. The AdminP

task on each server in the domain periodically checks this database to see if there are tasks it needs to perform, such as updating local database ACLs or deleting local replicas.

#### NEW QUESTION # 12

Which two components are required to enable an ID Vault in a Domino domain? (Choose two)

- A. A Domino Directory with LDAP enabled
- B. A Vault server or cluster
- C. An assigned Vault ID file
- D. A configured policy that assigns users to the vault

**Answer: C,D**

Explanation:

To successfully implement an ID Vault, the administrator must complete several configuration steps.

According to the certification requirements, the two vital administrative components are An assigned Vault ID file (which identifies the vault itself and allows for secure management) and A configured policy that assigns users to the vault . Without a policy (either Organizational or Explicit) designating which users belong to which vault, the Notes client will not know to upload or synchronize the user's ID file with the server-side repository.

---

#### NEW QUESTION # 13

What is the primary function of the Router task on a Domino server?

- A. To manage DAOS repository storage
- B. To compress and optimize NSF files
- C. To index databases for full-text search
- D. To process and route mail messages

**Answer: D**

Explanation:

The Router task is the core component of the Domino messaging system. Its primary responsibility is to process and route mail messages . It constantly monitors the mail.box file(s) for new entries and determines where to deliver them-whether to a local mail file on the same server, to another Domino server via Notes routing, or to an external internet address via SMTP.

---

#### NEW QUESTION # 14

Domino policies are stored and distributed through the \_\_\_\_\_ database on the administration server.

- A. certlog.nsf
- B. policies.nsf
- C. names.nsf
- D. admin4.nsf

**Answer: C**

Explanation:

All Domino Policies -including Desktop, Security, Mail, and Archive settings-are stored within the Domino Directory (names.nsf) on the administration server. The directory contains the Policy documents and their associated Policy Settings documents. These policies are then distributed throughout the domain via the standard replication of the names.nsf file to other servers, where they are applied to users and groups during the authentication or login process.

---

#### NEW QUESTION # 15

What is created when registering a new user using the Domino Administrator Client?

- A. Full-text index and ACL
- B. Group document and mailbox folder
- C. Person document and Notes ID file
- D. Server ID and connection document

**Answer: C**

Explanation:

In HCL Domino, the registration process is the primary way to establish a user's identity within the domain.

When an administrator uses the Domino Administrator Client to register a person, the system generates a Person document in the Domino Directory (names.nsf), which contains the user's public key and configuration. Simultaneously, it creates a Notes ID file, which stores the user's private key required for authentication and encryption. While a mail file is often created as part of this workflow, the document and ID file are the fundamental identity components.

---

## NEW QUESTION # 16

.....

It is known to us that the 21st century is an information era of rapid development. Now the people who have the opportunity to gain the newest information, who can top win profit maximization. In a similar way, people who want to pass HCL-DOM-AADM-12 exam also need to have a good command of the newest information about the coming exam. However, it is not easy for a lot of people to learn more about the information about the study materials. Luckily, the HCL-DOM-AADM-12 Study Materials from our company will help all people to have a good command of the newest information.
