SAP Certified Associate - Process Data Analyst - SAP Signavio Sample Questions (Q15-Q20):

NEW QUESTION # 15

Which of the following is essential information that an Event Log must contain? Note: There are 3 correct answers to this question.

- A. Timestamp
- B. Customer ID
- C. Variant ID
- D. Activity name

- E. Unique Case ID

Answer: A,D,E

Explanation:

An event log is the foundation of Process Mining, providing the raw data needed to reconstruct process flows.

The SAP Signavio documentation specifies the mandatory components of an event log:

* Option B (Unique Case ID): A unique identifier for each process instance (case) is essential to track individual process executions and correlate events within the same case.

* Option D (Timestamp): Timestamps indicate when each event occurred, enabling the sequencing of activities and calculation of metrics like cycle time or delays.

* Option E (Activity name): The name of each activity (e.g., "Order Created") describes the specific action performed, allowing Process Mining to map out the process flow.

* Option A (Customer ID) is incorrect as it is an optional attribute, not a mandatory component of an event log, though it may be included for specific analyses.

NEW QUESTION # 16

What features does offer? Note: There are 2 correct answers to this question.

- A. Provides custom functions
- B. Avoids manipulation of process data
- C. Queries data from multiple tables
- D. Creates inner joins

Answer: A,B

NEW QUESTION # 17

What is the purpose of Workflow Management Systems?

- A. To onboard new employees
- B. To collect data on employee operations
- C. To provide reports on business problems
- D. To simplify reoccurring procedures through delegation

Answer: D

Explanation:

The primary purpose of Workflow Management Systems (WMS) is to automate and manage business processes. The correct answer is:

* To simplify reoccurring procedures through delegation (D): WMS are designed to streamline and automate routine business processes. By defining workflows, tasks can be automatically routed and

* managed across different team members, departments, or systems, ensuring that each step in a process is executed according to predefined rules and pathways. This delegation of tasks simplifies procedures, reduces manual intervention, and enhances efficiency. Onboarding new employees (A), providing reports on business problems (B), and collecting data on employee operations (C) are functionalities that might be supported by a WMS as part of broader capabilities but are not the primary purpose of such systems.
