

# 100% Pass 2026 Nokia Fantastic SRAN-Radio-Network-Performance-Optimization Exam Cost

If you want to get a higher position in your company, you must do an excellent work. Then your ability is the key to stand out. Perhaps our SRAN-Radio-Network-Performance-Optimization study guide can help you get the desirable position. At present, many office workers are willing to choose our SRAN-Radio-Network-Performance-Optimization Actual Exam to improve their ability. With the help of our SRAN-Radio-Network-Performance-Optimization exam questions, not only they have strengthened their work competence and efficiency, but also they gained the certification which is widely accepted by the bigger enterprise.

The Nokia SRAN-Radio-Network-Performance-Optimization is a very prestigious certificate that is considered a guarantee of a well-paid job in a reputed tech firm. Most candidates attempting the MN: NCSS NPS - SRAN Radio Network Performance Optimization Certification Exam | GS40-NPS-SRPER-E-S03-2510 test are nervous. Very few applicants can earn the MN: NCSS NPS - SRAN Radio Network Performance Optimization Certification Exam | GS40-NPS-SRPER-E-S03-2510 SRAN-Radio-Network-Performance-Optimization certificate on their first attempts because of the challenging level of topics included in the Nokia SRAN-Radio-Network-Performance-Optimization test. TrainingDump SRAN-Radio-Network-Performance-Optimization actual dumps help applicants in clearing the test very easily.

## Valid SRAN-Radio-Network-Performance-Optimization Exam Camp, SRAN-Radio-Network-Performance-Optimization Test Score Report

Through our investigation and analysis of the real problem over the years, our SRAN-Radio-Network-Performance-Optimization prepare questions can accurately predict the annual SRAN-Radio-Network-Performance-Optimization exams. And the SRAN-Radio-Network-Performance-Optimization quiz guide's experts still have the ability to master propositional trends. Believe that such a high hit rate can better help users in the review process to build confidence, and finally help users through the qualification examination to obtain a certificate. All in all, we want you to have the courage to challenge yourself, and our SRAN-Radio-Network-Performance-Optimization Exam Prep will do the best for the user's expectations.

## Nokia MN: NCSS NPS - SRAN Radio Network Performance Optimization Certification Exam | GS40-NPS-SRPER-E-S03-2510 Sample Questions (Q21-Q26):

### NEW QUESTION # 21

What is the mandatory prerequisite to implement DSS , or Dynamic Spectrum Sharing ?

- A. Dedicated NR spectrum
- B. RF module sharing
- C. Same bandwidth for LTE and NR

- D. TDD configuration only

**Answer: B**

Explanation:

The correct answer is D .

DSS allows LTE and 5G NR to share the same spectrum dynamically , instead of requiring a separate dedicated NR carrier. Therefore, dedicated NR spectrum is not mandatory. DSS is also not limited to TDD only; it is commonly used in FDD spectrum refarming scenarios as well. Public RAN references describe DSS as a mechanism where LTE and NR coexist in the same frequency band and share spectrum dynamically.

From an SRAN architecture point of view, the mandatory deployment condition is that the radio platform must support LTE and NR coexistence on the same radio resources. That requires RF module sharing or a DSS-capable shared radio configuration.

So the correct prerequisite is:

RF module sharing.

### NEW QUESTION # 22

Which of the following best describes one of the primary purposes of the Coverage and Quality use case?

- A. To configure the VPN tunnel for secure data transfer
- B. To replace the Kronos parser during troubleshooting
- **C. To identify problem areas such as low coverage or high interference**
- D. To convert LCBIN files to CSV files for analysis

**Answer: C**

Explanation:

The correct answer is B .

The Coverage and Quality use case is used in network planning and optimization to identify RF problem areas. These may include:

Low RSRP or weak coverage areas

Poor SINR or low radio quality areas

High interference zones

Overshooting cells

Coverage holes

Areas where users experience poor throughput or poor accessibility

This type of use case helps NPO engineers prioritize optimization actions such as antenna tilt changes, azimuth changes, parameter tuning, neighbor optimization, power adjustment, or site expansion.

The other options are not the primary purpose:

VPN tunnel configuration is a connectivity/security task.

LCBIN-to-CSV conversion is a data processing task.

Replacing the Kronos parser is a tool-chain or troubleshooting function, not the main purpose of coverage and quality analysis.

So the best answer is:

To identify problem areas such as low coverage or high interference.

### NEW QUESTION # 23

Evaluate the impact of using MantaRay SON's centralized PCI optimization module compared to distributed SON implementations.

- A. Centralized PCI optimization offers less visibility into network configuration.
- **B. Centralized PCI optimization can identify and resolve PCI issues across multi-vendor networks.**
- C. Distributed SON implementations provide better optimization benefits.
- D. Distributed SON implementations are more effective in handling multi-vendor networks.

**Answer: B**

Explanation:

The correct answer is C .

A centralized SON approach has broader network-level visibility than a purely distributed implementation.

For PCI optimization , this is important because PCI conflicts, PCI confusion, and neighbor-related PCI issues are not always local to one cell. They may involve several neighboring cells, multiple layers, and sometimes multiple vendors.

Nokia positions MantaRay SON as a centralized, AI-powered network optimization and automation platform for improving RAN

quality, efficiency, and customer experience. Nokia also describes MantaRay SON as supporting multi-supplier/non-real-time RIC functionality in the MantaRay SMO framework.

So compared with distributed SON, centralized PCI optimization can better analyze wider-area PCI relationships and resolve PCI problems across multi-vendor or multi-layer networks.

Therefore, the correct statement is:

Centralized PCI optimization can identify and resolve PCI issues across multi-vendor networks.

#### NEW QUESTION # 24

A slice supporting sensors and smart meters would be categorized as:

- A. URLLC, Ultra-Reliable Low-Latency Communication
- B. eMBB, enhanced Mobile Broadband
- C. mMTC, massive Machine Type Communications
- D. DNN, Data Network Name

**Answer: C**

Explanation:

The correct answer is A .

Sensors and smart meters are typical massive IoT use cases. They usually involve a very large number of devices sending small amounts of data, often with low mobility and low power requirements.

This type of traffic fits mMTC , or massive Machine Type Communications .

Why the other options are not correct:

URLLC is used for very low-latency and highly reliable services, such as industrial automation, remote control, or mission-critical applications.

eMBB is used for high-throughput broadband services, such as video, fixed wireless access, or enhanced mobile internet.

DNN is not a slice category. It means Data Network Name and identifies the data network the UE connects to, similar to APN in LTE.

Therefore, a slice supporting sensors and smart meters is categorized as:

mMTC.

#### NEW QUESTION # 25

In a high-mobility network, the maximum cell size must be restricted to 33 km . Which PRACH format and restricted-set type should be used?

- A. Format 2 / Unrestricted Type
- B. Format 1 / Type A
- C. Format 0 / Type B
- D. Format 1 / Type B

**Answer: D**

#### NEW QUESTION # 26

.....

The pass rate for SRAN-Radio-Network-Performance-Optimization training materials is 98.65%, and you can pass the exam just one time if you choose us. We have a professional team to collect and research the first-hand information for the exam, and therefore you can get the latest information if you choose us. In addition, SRAN-Radio-Network-Performance-Optimization exam materials cover most of knowledge points for the exam, and you can pass the exam as well as improve your professional ability in the process of learning. We have online and offline service. If you have any questions for SRAN-Radio-Network-Performance-Optimization Exam Braindumps, and you can contact with us, and we will give you reply as soon as possible.

**Valid SRAN-Radio-Network-Performance-Optimization Exam Camp:** <https://www.trainingdump.com/Nokia/SRAN-Radio-Network-Performance-Optimization-practice-exam-dumps.html>

Choosing our products will be your clever action for clearing SRAN-Radio-Network-Performance-Optimization exam, The characteristic that three versions all have is that they have no limit of the number of users, so you don't encounter failures anytime you want to learn our SRAN-Radio-Network-Performance-Optimization guide torrent, Nokia SRAN-Radio-Network-Performance-

Optimization Exam Cost After the candidates buy our products, we can offer our new updated materials for your downloading one year for free, As we know, millions of candidates around the world are striving for their dreams who have been work assiduously, but the truth is what they need is not only their own great effort paying for exams, but most importantly, a high-quality SRAN-Radio-Network-Performance-Optimization actual real questions which can contribute greatly to make progress.

This provides two major benefits: Your validation code will be simpler to write SRAN-Radio-Network-Performance-Optimization Test Labs and maintain, Virtualizing Microsoft Business Critical Applications on VMware vSphere Virtualizing Microsoft Business Critical Applications on VMware vSphere.
