Dynatrace Associate Certification Revised Questions and Answers/2024

How long does it take for automatic baselines to be available? - ✓✓ 2 hours

How is user session duration calculated? - ✓✓ The elapsed time between initiation of the first user action in a session and the completion of the last user action in the session

Which event type has the highest severity level? - ✓✓ Availability events

What are advantages of making a request a "key request"? - ✓✓ a. Longer data retention (35 days vs 10 days)

b. Trend lines are retained forever

c. Available through the timeseries API

d. Custom alerting thresholds

e. Increases visibility and alerting for low-volume requests

What are the event types in DT? - ✓✓ Ordered from most to least severity level:

a. Availability

b. Error

c. Slowdown

d. Resource

e. Custom

f. Info

DT synthetic supports three types of synthetic monitoring, they are... - ✓✓ a. Single-URL browser monitor

b. Browser clickpath

c. HTTP monitor

ExamPassdump에서 Dynatrace Dynatrace-Associate 덤프를 다운받아 공부하시면 가장 적은 시간만 투자해도 Dynatrace Dynatrace-Associate 시험패스하실수 있습니다. ExamPassdump에서 Dynatrace Dynatrace-Associate 시험덤프를 구입하시면 퍼펙트한 구매후 서비스를 제공해드립니다. Dynatrace Dynatrace-Associate 덤프가 업데이트되면 업데이트된 최신 버전을 무료로 제공해드립니다. 시험에서 불합격성적표를 받으시면 덤프구매시 지불한 덤프비용은 환불해드립니다.

Dynatrace Dynatrace-Associate Exam Overview:

Certification Vendor:	Dynatrace
Exam Name:	Dynatrace Associate Certification Exam
Exam Number:	Dynatrace-Associate
Exam Price:	\$200 USD
Exam Format:	Multiple choice, Multiple response
Related Certifications:	Dynatrace Associate
Passing Score:	72%
Available Languages:	English, Multiple languages
Real Exam Qty:	70

Exam Duration:	105 minutes
Sample Questions:	Dynatrace Dynatrace-Associate Sample Questions
Exam Way:	Online proctored exam
Pre Condition:	Approximately six months of hands-on experience with Dynatrace is recommended. No formal prerequisites.
Official Syllabus URL:	https://www.dynatrace.com/certification/

최신버전 Dynatrace-Associate인증덤프 샘플 다운로드 덤프자료

Dynatrace인증 Dynatrace-Associate시험을 등록하였는데 시험준비를 어떻게 해야 할지 몰라 고민중 이시라면 이 글을 보고 ExamPassdump를 찾아주세요. ExamPassdump의Dynatrace인증 Dynatrace-Associate덤프샘플을 체험해보시면 시험에 대한 두려움이 사라질것입니다. ExamPassdump의Dynatrace인증 Dynatrace-Associate덤프는Dynatrace인증 Dynatrace-Associate실제시험문제를 마스터한 기초에서 제작한 최신시험에 대비한 공부자료로서 시험패스율이 100%입니다. 하루 빨리 덤프를 마련하여 시험을 준비하시면 자격증 취득이 빨라집니다.

Dynatrace Dynatrace-Associate 시험요강:

주제	소개
주제 1	Kubernetes Infrastructure: Covers monitoring and observability of Kubernetes clusters, workloads, and containerized environments within Dynatrace.
주제 2	Dashboards: Covers building and customizing dashboards to visualize and communicate observability data across teams and stakeholders.
주제 3	Security: Covers vulnerability detection, security alerting, and how Dynatrace identifies and prioritizes security risks across the environment.
주제 4	Foundational Platform Capabilities: Covers the core features and navigation of the Dynatrace platform, including entity relationships, tagging, and how data is collected.
주제 5	Business Analytics: Covers capturing and correlating business metrics with technical data to measure the impact of application performance on business outcomes.
주제 6	Reporting and Analysis: Covers tools and methods for analyzing observability data and generating insights to support performance and operational decisions.
주제 7	Automation: Covers workflows, event-driven automation, and integrations that enable teams to automate remediation and operational tasks.
주제 8	User Experience Monitoring: Covers real user monitoring (RUM) to track and analyze how end users interact with and experience web and mobile applications.
주제 9	Synthetics: Covers the creation and monitoring of synthetic tests to simulate user interactions and proactively detect availability or performance issues.
주제 10	Log Investigation: Covers querying, filtering, and analyzing log data within Dynatrace to troubleshoot and identify root causes of problems.
주제 11	Traces: Covers distributed tracing and PurePath technology to track and analyze individual transactions end-to-end across services.

최신 Dynatrace Associate Certification Dynatrace-Associate 무료샘플문제 (Q72-Q77):

질문 # 72

For supported technologies, do Kubernetes workloads and pods get monitored differently than traditionally monitored OneAgent processes?

- A. Yes, if OneAgent is installed with the Dynatrace Operator, a container will be shown in Dynatrace INSTEAD of a process
- B. Yes, workloads and pods will not have any service data when monitored with Dynatrace
- C. No, workloads and pods show different metrics than a process, but give you the same general information
- D. No, workloads and pods show the exact same metrics as a process
- E. Yes, workloads and pods must be instrumented with OpenTelemetry to gain deep monitoring insights

정답: A

설명:

Yes, Kubernetes workloads and pods are monitored differently compared to traditional OneAgent-monitored processes. When Dynatrace is deployed into Kubernetes using the Dynatrace Operator, the OneAgent automatically injects itself into each pod at runtime. This means each container is monitored independently and is shown in Dynatrace as a container entity, not as a traditional process.

This container-based visibility is designed to suit the dynamic and short-lived nature of Kubernetes environments. Traditional OneAgent monitoring associates metrics and topology with processes and hosts, but in Kubernetes, the emphasis shifts toward containers, pods, and workloads. This shift allows Dynatrace to provide accurate and timely data on what's really happening inside containerized apps, aligned with Kubernetes-native objects and metrics.

Other answer options either misstate the behavior (e.g., no service data or requiring OpenTelemetry) or oversimplify the relationship between traditional and Kubernetes monitoring (e.g., "same general information"), making Option E the only correct and fully accurate one.

Reference: Based on official Dynatrace University training content and architecture documentation.

질문 # 73

I want to use Dynatrace's global network of Synthetic Monitoring locations to monitor my application, which capability provides this?

- A. Private Synthetics
- B. Public Synthetics
- C. Synthetic On-demand execution
- D. Dynatrace Apps

정답: B

설명:

Public Synthetics use Dynatrace's global network of locations to test applications from various geographic regions.

* Ideal for global availability testing

* No infrastructure setup required

Private Synthetics are for internal environments.

Reference: Based on official Dynatrace University training materials on Synthetic Monitoring.

질문 # 74

What are the critical features available with the Dynatrace Application Security feature?

- A. Automatic Vulnerability Remediation
- B. Runtime Application Protection
- C. Runtime Vulnerability Analytics
- D. On-Demand Code Security Analysis

정답: B,C

설명:

Dynatrace Application Security provides:

* Runtime Vulnerability Analytics - detection of vulnerabilities in running applications

* Runtime Application Protection (RASP) - protection against exploits in real time It does NOT provide:

* Automatic remediation

* Traditional static/on-demand code scanning

Reference: Based on official Dynatrace University training materials on Application Security.

질문 # 75

Log files from my application may contain messages with errors. Whenever messages like these occur, we wish to notify support teams to investigate. Which Dynatrace feature would best address this ask?

- A. Log Metrics
- **B. Log Events**
- C. Anomaly Detection rules
- D. Log Viewer
- E. Log Processing rules

정답: B

설명:

Log Events allow Dynatrace to detect specific patterns (such as error messages) in logs and automatically trigger alerts.

They enable:

- * Detection of error patterns in logs
- * Creation of events/problems
- * Notification of support teams

Other options:

- * Log Processing rules transform logs, not alert
- * Anomaly detection rules are metric-based
- * Log Metrics convert logs into metrics but don't directly alert
- * Log Viewer is for manual inspection

Reference: Based on official Dynatrace University training materials on log monitoring and alerting.

질문 # 76

I need to count the number of occurrences of a log entry, which Dynatrace capability provides this?

- A. Built-in Metrics
- B. Log Events
- **C. Log Metrics**
- D. Anomaly Detection rules
- E. Log Viewer

정답: C

설명:

Log Metrics allow converting log occurrences into measurable metrics.

They enable:

- * Counting occurrences
- * Creating thresholds and alerts
- * Trend analysis

Other options:

- * Log Viewer = manual view
- * Log Events = alerting
- * Anomaly detection = metric-based

Reference: Based on official Dynatrace University training materials on log analytics.
