To get prepared for the Certified in Planning and Inventory Management (CPIM 8.0) (CPIM-8.0) certification exam, applicants face a lot of trouble if the study material is not updated. They are using outdated materials resulting in failure and loss of money and time. So to solve all these problems, TrainingDump offers actual CPIM-8.0 Questions to help candidates overcome all the obstacles and difficulties they face during CPIM-8.0 examination preparation.

APICS CPIM-8.0 Exam Syllabus Topics:

Topic	Details
Topic 1	Supply Chains and Strategy: This section of the exam measures the skills of Supply Chain Managers and covers various aspects related to supply chains, including their interaction with the environment and strategic objectives. It delves into developing organizational strategies, functional strategies, performance monitoring using KPIs, risk management, capital equipment management, and sustainability strategies. A key skill assessed here is "analyzing market trends."
Topic 2	Detailed Schedules: This section assesses the skills of Production Planners by focusing on detailed scheduling processes for production or service delivery environments. It includes methods like PAC (Programmable Automation Controller) scheduling techniques to manage detailed production timelines efficiently across different materials required for manufacturing or service delivery processes.
Topic 3	Sales and Operations Planning: This module assesses the skills of Operations Planners in terms of sales and operations planning processes. It includes understanding the purpose of S&OP, creating aggregate demand plans, and reconciling these plans to ensure alignment between sales forecasts and operational capabilities. A crucial skill measured is "reconciling supply-demand gaps."

CPIM-8.0 Actual Exam Dumps, Pass4sure CPIM-8.0 Study Materials

Desktop and web-based CPIM-8.0 practice exams are available at TrainingDump for thorough preparation. Going through these APICS CPIM-8.0 mock exams boosts your learning and reduces mistakes in the APICS CPIM-8.0 Test Preparation. Customization features of APICS CPIM-8.0 practice tests allow you to change the settings of the CPIM-8.0 test sessions.

APICS Certified in Planning and Inventory Management (CPIM 8.0) Sample Questions (Q478-Q483):

NEW QUESTION # 478

When designing a production cell, which of the following items would be the most important consideration?

- A. The flow of materials into the cell and sequencing of operations to minimize total cycle time
- B. The takt time requirement for each operator to meet the monthly production goals of the plant
- C. The output rate for the first operation and move time after the last workstation
- D. The unit per hour requirement for the production cell to meet the sales forecast

Answer: A

Explanation:

A production cell is a group of machines or workstations that are arranged in a way that allows for continuous flow of materials and products. The main objective of designing a production cell is to reduce waste, improve quality, and increase productivity. One of the most important considerations for designing a production cell is the flow of materials into the cell and sequencing of operations to minimize total cycle time. Total cycle time is the time it takes for a product to go through all the steps in the cell, from the first operation to the last. By minimizing total cycle time, the production cell can achieve higher throughput, lower inventory, and faster delivery.¹²³ References: 1: CPIM Part 2 - Section C - Module 1 - Session 1 - Lean Manufacturing 2: CPIM Part 2 - Section C - Module 1 - Session 2 - Lean Manufacturing Tools 3: CPIM Part 2 - Section C - Module 1 - Session 3 - Lean Manufacturing Implementation

NEW QUESTION # 479

Which of the following BEST defines whether an organization can consider an alternate location during a contingency?

- A. Verify the availability of an office location for the given size of the team
- B. Verify that a memorandum of understanding (MOU) is in place for office equipment
- C. Verify the availability of cheap resources in the new location
- D. Verify that there is a contractual obligation for location-providing services

Answer: D

NEW QUESTION # 480

An organization's security assessment recommended expanding its secure software development framework to include testing Commercial Off-The-Shelf (COTS) products before deploying those products in production. What is the MOST likely reason for this recommendation?

- A. To identify and remediate any residual vulnerabilities prior to the end of the user acceptance testing
- B. To identify and remediate any residual vulnerabilities prior to release in the production environment
- C. To identify any residual vulnerabilities prior to release in the production environment
- D. To identify any residual vulnerabilities prior to the end of the trial run of the software

Answer: B

NEW QUESTION # 481

What General Data Protection Regulation (GDPR) principle says that data should be collected lawfully and with the person's consent?

- A. Legitimate data collection
- B. Limitation of use
- C. Collection Categorization
- D. Collection limitation

Answer: A

NEW QUESTION # 482

Which of the following states of data becomes MOST important to protect as organizations continue to transition toward Application Programming Interface (API)-based solutions?

- Answer: A**
