Besides, they made three versions for your reference, the PDF, APP and Online software version.

## Microsoft Cybersecurity Architect Sample Questions (Q280-Q285):

### NEW QUESTION # 280

You have a Microsoft 365 subscription and an Azure subscription. Microsoft 365 Defender and Microsoft Defender for Cloud are

enabled.

The Azure subscription contains a Microsoft Sentinel workspace. Microsoft Sentinel data connectors are configured for Microsoft 365, Microsoft 365 Defender, Defender for Cloud, and Azure.

You plan to deploy Azure virtual machines that will run Windows Server.

You need to enable extended detection and response (EDR) and security orchestration, automation, and response (SOAR) capabilities for Microsoft Sentinel.

How should you recommend enabling each capability? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

### NEW QUESTION # 281

Your company has a Microsoft 365 E5 subscription.

Users use Microsoft Teams, Exchange Online, SharePoint Online, and OneDrive for sharing and collaborating.

The company identifies protected health information (PHI) within stored documents and communications.

What should you recommend using to prevent the PHI from being shared outside the company?

- A. retention policies
- B. sensitivity label policies
- C. data loss prevention (DLP) policies
- D. insider risk management policies

**Answer: C**

Explanation:

### NEW QUESTION # 282

You have a Microsoft Entra tenant named contoso.com.

You have a partner company that has a multi-tenant application named App1. App1 is registered to a Microsoft Entra tenant named fabrikam.com.

You need to ensure that the users in contoso.com can authenticate to App1.

What should you recommend creating in contoso.com?

- A. an application object
- B. a user-assigned managed identity
- C. a service principal
- D. a system-assigned managed identity

**Answer: C**

Explanation:

A service principal is needed in a tenant to authenticate users to a Microsoft Entra multi-tenant application located in another tenant.

When a user from a different tenant signs in to a multi-tenant application, a service principal is automatically created in the user's tenant upon consent to the application's permissions. This service principal acts as the application's identity within that specific tenant, enabling authentication and access to resources secured by that tenant.

<https://docs.microsoft.com/en-us/azure/governance/policy/concepts/definition-structure> while it is in policy assignment

- <https://docs.microsoft.com/en-us/azure/governance/policy/concepts/assignment-structure>

**NEW QUESTION # 284**

Your company has an Azure App Service plan that is used to deploy containerized web apps. You are designing a secure DevOps strategy for deploying the web apps to the App Service plan. You need to recommend a strategy to integrate code scanning tools into a secure software development lifecycle. The code must be scanned during the following two phases:

Uploading the code to repositories Building containers

Where should you integrate code scanning for each phase? To answer, select the appropriate options in the answer area.

□

**Answer:**

Explanation:

□

**NEW QUESTION # 285**

.....
