## WGU Introduction-to-IT Frequent Updates - Valid Introduction-to-IT Exam Cram

To provide our users with the WGU Introduction to IT (Introduction-to-IT) latest questions based on the sections of the actual exam questions, we regularly update our Introduction-to-IT study material. Also, It-Tests provides free updates of WGU Introduction-to-IT Exam Questions for up to 365 days. For customers who don't crack the WGU Introduction-to-IT test after using our product, It-Tests will provides them a refund guarantee according to terms and conditions.

### WGU Introduction to IT Sample Questions (Q126-Q131):

#### NEW QUESTION # 126

Which software allows the user to easily access the hardware of a computer?

- A. Productivity
- **B. Operating system**
- C. FTP client
- D. Application

**Answer: B**

Explanation:

\*The software that allows the user to easily access the hardware of a computer is the operating system.

\*Explanation: The operating system serves as the interface between hardware, application software, and the user. It manages hardware resources, file systems, processes, and memory.

\*References: 12

Therefore, the correct answer is C. Operating system.

#### NEW QUESTION # 127

What type of software utilizes a commercial software license?

- A. Open Source
- B. Public Domain
- **C. Proprietary**
- D. Shareware

**Answer: C**

Explanation:

\*Proprietary software refers to software that is closed source and is commercially licensed. It is developed by a specific company or individual, and its source code is not publicly available.

\*In proprietary software, the end user does not have the authority to modify or reuse the software code. The software is typically distributed as operational code only, without providing access to the underlying source code.

\*Proprietary licenses often include terms that prohibit "reverse engineering" of the object code with the intention of obtaining the source code.

\*Examples of proprietary software include Microsoft Office, Adobe Photoshop, and many commercial applications.

\*References:

o1 Snyk. "What is a software license? 5 Types of Software Licenses Explained." Link o2 Turing. "Open Source vs. Commercial Software License: What Do You Need?" Link o3 License.md. "What type of license is needed for Commercial Use Software?" Link o4 Thales Group. "Commercial License FAQ." Link Note: While proprietary software utilizes a commercial software license, it's essential to understand that open-source software (which is freely available and allows modification and reuse of source code) falls under a different category. However, for the specific question, the correct answer is A. Proprietary.

### NEW QUESTION # 128

What type of a system requirement involves preventing unauthorized access to data?

- A. Security
- B. Accessibility
- C. Design
- D. User needs

**Answer: A**

Explanation:

\*Unauthorized access refers to gaining entry or access to a system, physical or electronic, without the permission of the owner or administrator.

\*Security is the type of system requirement that involves preventing unauthorized access to data.

\*Security measures include:

oAuthentication: Verifying user identity.

oEncryption: Protecting data from unauthorized viewing.

oAccess controls: Limiting who can access specific resources.

oFirewalls: Filtering network traffic.

\*Ensuring security helps safeguard sensitive information and maintain data integrity.

### NEW QUESTION # 129

What is one of the goals of the Association for the Advancement of Artificial Intelligence AAAI?

- A. It helps other organizations design and apply appropriate approaches to personal data collection, use, and disclosure.
- B. It promotes the development and deployment of systems that are reliable, usable, interoperable, and secure.
- C. It advances a scientific understanding of the problem-solving capabilities of machines.
- D. It certifies the quality of undergraduate educational programs in the computer science field.

**Answer: C**

Explanation:

AAAI is a professional scientific society focused on artificial intelligence, and one of its central goals is advancing scientific understanding of the mechanisms and capabilities of intelligent machines. In Information Technology, AAAI is associated with research communities that study machine learning, reasoning, natural language processing, robotics, and problem-solving methods.

The goal described in option C matches this mission by emphasizing scientific understanding of machine problem-solving capabilities. Option A aligns more with accreditation organizations, such as ABET, which evaluates academic programs. Option B describes goals associated with standards and computing infrastructure reliability and interoperability, which is more aligned with organizations that focus on standards and systems engineering. Option D aligns more with privacy-focused organizations and governance frameworks. AAAI supports conferences, publications, and collaboration aimed at improving AI theory and practice. Therefore, the correct answer is that AAAI advances a scientific understanding of the problem-solving capabilities of machines.

### NEW QUESTION # 130

A company uses the most up-to-date operating system developed by Microsoft for a desktop computer on its internal network. Which system software does this company's computer use?

- A. Linux
- B. Android
- C. iOS
- D. Windows

**Answer: D**

Explanation:

Microsoft's desktop operating system family is Windows, so a company using Microsoft's most up-to-date desktop operating system is using Windows. In Information Technology, an operating system is system software that manages hardware resources, provides a user interface, and supports applications by handling tasks such as memory management, process scheduling, file systems, device drivers, and network connectivity. Windows is widely used in business environments because of its strong integration with enterprise tools such as Active Directory, Group Policy, Microsoft 365 services, and broad compatibility with commercial software and peripherals. The other options are operating systems from different ecosystems:

Linux is an open-source family of operating systems, Android is primarily designed for mobile devices, and iOS is Apple's mobile operating system for iPhone. Since the question specifically states the operating system is developed by Microsoft and used on a desktop computer, the correct choice is Windows.

### NEW QUESTION # 131
