Sample PK0-005 Questions Answers, PK0-005 Valid Exam Notes

Each format specializes in a specific study style and offers unique benefits, each of which is crucial to good CompTIA Project+ Certification Exam (PK0-005) exam preparation. The specs of each CompTIA PK0-005 Exam Questions format are listed below, you may select any of them as per your requirements.

CompTIA Project+ Certification Exam Sample Questions (Q289-Q294):

NEW QUESTION # 289

How does data discovery assist with data classification'?

- **A. It shows where specific data is stored**
- B. It helps to identify the data owner
- C. It automatically classifies data by keywords
- D. It provides assurance of data integrity

Answer: A

Explanation:

Data discovery is the process of finding and analyzing data across an organization's data sources, such as databases, files, cloud services, and applications¹². Data discovery can assist with data classification, which is the process of assigning labels and categories to data based on its sensitivity, value, and risk³⁴. By showing where specific data is stored, data discovery can help to: Identify the location and scope of sensitive data, such as personal, financial, or health information, that may require special protection or compliance measures⁵⁶.

Evaluate the data quality, accuracy, and relevance for different purposes and users⁷⁸.

Optimize the data storage, access, and governance policies and practices⁹¹⁰.

NEW QUESTION # 290

During a brainstorming meeting, a project manager identifies multiple techniques that will help the project team ensure confidence and alignment with the project scope and goals. Which of the following plans is the project manager creating?

- A. Procurement
- **B. Quality assurance**
- C. Communication
- D. Risk

Answer: B

Explanation:

The project manager is creating a quality assurance plan when identifying multiple techniques that will help the project team ensure confidence and alignment with the project scope and goals during a brainstorming meeting. A quality assurance plan is a plan that

defines and documents the standards, criteria, methods, activities, and tools for ensuring and verifying that the quality requirements and expectations of a project are met. A quality assurance plan can help to improve the quality of the project processes and deliverables and prevent or reduce defects or errors.

NEW QUESTION # 291

During quality analysis, different team members are identifying multiple constraints. Which of the following tools should the project manager adopt first to help track and prioritize a resolution?

- A. Change log
- **B. Issue log**
- C. Defect log
- D. Risk register

Answer: B

Explanation:

An issue log is a tool that records and tracks any issues that arise during the project. It helps the project manager to identify, prioritize, assign, monitor, and resolve the issues in a timely manner. An issue log can also include information such as the issue description, impact, status, owner, and resolution date¹. An issue log is different from a defect log, which records and tracks the defects or errors in the project deliverables. A risk register is a tool that records and tracks the potential risks that may affect the project objectives. A change log is a tool that records and tracks the changes that are made to the project scope, schedule, budget, or quality².

NEW QUESTION # 292

A project manager has decided to outsource portions of a project and will conduct a separate procurement. In which of the following phases does this task occur?

- A. Controlling
- B. Executing
- C. Initiating
- **D. Planning**

Answer: D

Explanation:

This answer is based on the understanding that outsourcing is a form of procurement, which is one of the knowledge areas in project management. Procurement involves acquiring goods and services from external sources to support the project objectives. According to the CompTIA Project+ Study Guide¹, procurement activities occur mainly in the planning phase of the project, where the project manager identifies the project needs, defines the scope of work, evaluates the potential vendors, and prepares the procurement documents.

The other options are not correct because:

Initiating is the phase where the project manager defines the project purpose, objectives, and deliverables, and obtains the project charter and stakeholder approval. Initiating does not involve procurement activities, although it may involve some preliminary research on the feasibility and availability of external resources.

Controlling is the phase where the project manager monitors and measures the project performance, compares it with the baseline, and implements corrective actions if needed. Controlling does involve some procurement activities, such as reviewing the vendor deliverables, managing the changes, and resolving the issues, but these are not the main tasks of procurement.

Executing is the phase where the project manager leads and directs the project team and other resources to complete the project work according to the plan. Executing does involve some procurement activities, such as selecting the vendor, signing the contract, and managing the relationship, but these are not the main tasks of procurement. References = CompTIA Project+ Study Guide: Exam PK0-005, 3rd Edition, Chapter 8:

Planning Projects, Part 4 (Procurement and Communication), pages 243-260; CompTIA Project+ Certification Exam Objectives, Domain 2: Project Planning, Objective 2.5: Given a scenario, plan procurement for a project.

NEW QUESTION # 293

A project manager learns that a handful of resources from the project were pulled off the project to work on a higher priority project. The project manager had previously captured this information based on indicators of this potential change. Which of the

following is the sequence of these events?

- A. Risk, issue
- B. Issue, risk
- C. Issue, issue
- D. Risk, risk

Answer: A

NEW QUESTION # 294

.....

Highlight a person's learning effect is not enough, because it is difficult to grasp the difficulty of testing, a person cannot be effective information feedback, in order to solve this problem, our PK0-005 real exam materials provide a powerful platform for users, allow users to exchange of experience. Here, the all users of our PK0-005 learning reference files can through own id to login to the platform, realize the exchange and sharing with other users, even on the platform and more users to become good friends, encourage each other, to deal with the difficulties encountered in the process of preparation each other. Our PK0-005 learning reference files not only provide a single learning environment for users, but also create a learning atmosphere like home, where you can learn and communicate easily.
