You will remain updated with the 302 practice test style, evaluate and improve your concepts. Users of the software can improve what they lack before F5 302 final exam. Practicing for the 302 Practice Test, again and again, can be nerve-wracking, so in this situation Exams. F5 offer an easy-to-use 302 PDF questions file.

F5 302 certification exam is a vendor-specific certification, meaning that it is designed specifically for F5 BIG-IP DNS systems. BIG-IP DNS Specialist certification validates the candidate's knowledge and skills in managing and administering F5 BIG-IP DNS systems, and demonstrates their ability to work with F5 BIG-IP DNS systems effectively.

The F5 302 exam is open to professionals who have a minimum of two years of experience in DNS and F5 BIG-IP technologies. Candidates are expected to have a strong understanding of DNS concepts, including DNS protocols, query types, and resource records. Additionally, candidates should be familiar with F5 BIG-IP DNS solutions, including the BIG-IP DNS platform, DNS Express, and DNS Load Balancing.

To prepare for the F5 302 Exam, candidates must have a good understanding of DNS services and F5 BIG-IP DNS solutions. They must also be familiar with DNS resolution techniques, DNS server management, and BIG-IP DNS configuration. Additionally, candidates must have experience working with F5 BIG-IP DNS solutions and be able to design, implement, and manage complex DNS infrastructures.

Pdf 302 Free | 302 Reliable Exam Dumps

We believe that our 302 exam questions that you can use our products to prepare the exam and obtain your dreamed certificates. We all know that if you desire a better job post, you have to be equipped with appropriate professional quality. Our 302 study materials are willing to stand by your side and provide attentive service, and to meet the majority of customers, we sincerely recommend our 302 Study Materials to all customers, for our rich experience and excellent service are more than you can imagine. There are many advantages of 302 training guide for you to try.

F5 BIG-IP DNS Specialist Sample Questions (Q192-Q197):

NEW QUESTION # 192

What is the output of the following command :

```
openssl req -new -key /config/ssl/ssl.key/ f5BIGIPKEY.com_2024.key -out /config/ssl/ssl.csr/ f5BIGIPCSR.com_2024.csr -sha256
```

- A. The generated CSR will be stored to the following location :
/config/ssl/ssl.csr/ f5BIGIPCSR.com_2024.csr
- B. The generated CSR will be stored to the following Directory:
/config/ssl/ssl.csr/
- C. The name of the CSR is : f5BIGIPCSR.com_2024.csr
- D. The CSR will be created using the Private Key : f5BIGIPKEY.com_2024.key and digest sha256 A new Key will be generated The name of the CSR is : Cert.com_2024.csr
- E. A new CSR will be generated

Answer: A,B,C,D,E

Explanation:

The 'openssl req -new' command initiates the creation of a new Certificate Signing Request (CSR), which is a crucial step in obtaining an SSL certificate for secure communication.

Upon execution of the command, the resulting CSR will be saved to the specified location '/config/ssl/ssl.csr/' with the filename 'f5BIGIPCSR.com_2024.csr', ensuring proper storage and organization of the generated CSR.

The CSR generated by the command will be uniquely identified by the name 'f5BIGIPCSR.com_2024.csr', making it easy to distinguish and manage among other CSR files.

The command dictates that the generated CSR will be stored in the directory '/config/ssl/ssl.csr/', providing a designated location for easy access and retrieval when needed for certificate signing.

By utilizing the provided private key 'f5BIGIPKEY.com_2024.key' and employing the sha256 digest algorithm, the CSR creation process will incorporate strong security measures to safeguard the certificate request.

NEW QUESTION # 193

Why we need to freeze the Zone file ?

- A. To block the traffic
- B. To prevent any dynamic updates from changing the manual updates changes

Answer: B

Explanation:

Freezing the Zone file is necessary to prevent any dynamic updates from overriding or changing the manual updates made to the file. By freezing the Zone file, you ensure that the changes made manually are preserved and not overwritten by any automated or dynamic updates that may occur.

Domain

ZoneRunner

NEW QUESTION # 194

For the purpose of communication between the GTM and BIGIP System for which purpose the port 4353 is required to be opened at both systems?

- A. None of the above
- **B. For iQuery Communication**
- C. For NQuery Communication
- D. For Query Communication

Answer: B

Explanation:

Port 4353 is required to be opened for iQuery communication between the GTM and BIG-IP System. iQuery is a protocol used for communication between the Global Traffic Manager (GTM) and the BIG-IP System to exchange information and synchronize configurations.

Domain

iQuery

NEW QUESTION # 195

What are the main drawbacks of the Synchronization / iQuery Connection issues ?

- **A. There are differences in the configuration among the Synchronization Group members**
- **B. The Server Configuration objects and components will be marked as red or blue There is no Drawbacks The Client will shutdown**
- **C. The Server Configuration objects and components will be marked as unavailable or unknown**
- **D. The Log messages will report different issues related to Synchronization and the iQuery Connections**

Answer: A,B,C,D

Explanation:

When there are differences in the configuration among the Synchronization Group members, it can lead to inconsistencies and errors in the synchronization process, causing issues with data consistency and reliability.

Log messages reporting different issues related to Synchronization and iQuery Connections indicate that there are communication problems and potential failures in the synchronization process, which can impact the overall performance and reliability of the system. When Server Configuration objects and components are marked as unavailable or unknown due to Synchronization or iQuery Connection issues, it can result in service disruptions, data loss, and operational inefficiencies, affecting the overall functionality of the system.

If Server Configuration objects and components are marked as red or blue due to Synchronization or iQuery Connection issues, it signifies critical errors or failures in the synchronization process, potentially leading to service outages and data inconsistencies.

Domain

iQuery - Synchronization Issues

NEW QUESTION # 196

Regarding to the UCS Archive

What will happen when the F5 GTM System load a UCS ?

- A. The NCP Daemon generates a new configuration change identifier (Commit ID)
- **B. The MCP Daemon generates a new configuration change identifier (Commit ID)**

Answer: B

Explanation:

When the F5 GTM System loads a UCS, the MCP Daemon is responsible for generating a new configuration change identifier (Commit ID). This identifier helps track and manage configuration changes made during the UCS loading process, ensuring that the system can revert to previous configurations if needed.
