There is no shortcut to Oracle 1z0-1080-25 exam questions success except hard work. You cannot expect your dream of earning the Oracle Planning 2025 Implementation Professional CERTIFICATION EXAM come true without using updated study material Oracle Planning 2025 Implementation Professional (1z0-1080-25) exam questions. Success in the 1z0-1080-25 exam adds more value to your resume and helps you land the best jobs in the industry.

### Oracle 1z0-1080-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Provision users and groups. This section of the exam measures the skills of a Planning Administrator and covers how to manage user access by assigning them to appropriate roles and groups.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Creating System Reports: This section of the exam measures the skills of a Planning Administrator and focuses on system-generated reports that provide insights into application activity.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Manage Rules: This section of the exam measures the skills of an EPM Consultant and covers designing and managing business logic using rules and rulesets to automate calculations.</li></ul>

Topic 4	<ul style="list-style-type: none"> <li>• Set up and run data maps: This section of the exam measures the skills of a Planning Administrator and focuses on configuring and executing data maps to move data across plan types or applications.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• Manage Dimensions: This section of the exam measures the skills of a Planning Administrator and covers how to manage essential dimensions and hierarchies that organize planning data.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>• Report on Planning Data: This section of the exam measures the skills of a Planning Administrator and focuses on generating reports to analyze and present Planning data effectively.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>• Design business rules and rulesets: This section of the exam measures the skills of an EPM Consultant and focuses on creating logic structures to perform calculations and automate processes in Planning.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>• Introduction to Planning Modules: This section of the exam measures the skills of an EPM Consultant and introduces the available Planning modules, their integration, and use cases.</li> </ul>
Topic 9	<ul style="list-style-type: none"> <li>• Identify metadata and data load options: This section of the exam measures the skills of a Planning Administrator and introduces options available for importing and managing metadata and data within the system.</li> </ul>
Topic 10	<ul style="list-style-type: none"> <li>• Create and run data integrations: This section of the exam measures the skills of an EPM Consultant and involves building data integration flows between different data sources and Planning.</li> </ul>
Topic 11	<ul style="list-style-type: none"> <li>• Import and export data into Planning: This section of the exam measures the skills of a Planning Administrator and covers the process of moving planning data into and out of the system.</li> </ul>
Topic 12	<ul style="list-style-type: none"> <li>• Manage Metadata and Data: This section of the exam measures the skills of a Planning Administrator and covers methods for loading and maintaining metadata and data in Planning.</li> </ul>
Topic 13	<ul style="list-style-type: none"> <li>• Create Reports: This section of the exam measures the skills of a Planning Administrator and involves creating reports that summarize planning activities and outcomes.</li> </ul>
Topic 14	<ul style="list-style-type: none"> <li>• Map data across applications: This section of the exam measures the skills of an EPM Consultant and includes how to map and align data structures between Planning and other connected applications.</li> </ul>
Topic 15	<ul style="list-style-type: none"> <li>• Assign access permissions to artifacts and cells in Planning: This section of the exam measures the skills of a Planning Administrator and involves granting permissions to users for accessing specific Planning objects and data.</li> </ul>
Topic 16	<ul style="list-style-type: none"> <li>• Explain required and user-defined dimensions; how dimension hierarchies impact Planning</li> </ul>
Topic 17	<ul style="list-style-type: none"> <li>• This section of the exam measures the skills of a Planning Administrator and includes understanding how standard and custom dimensions are used, and how dimension hierarchies affect planning structure and outcomes.</li> </ul>
Topic 18	<ul style="list-style-type: none"> <li>• Design forms and dashboards: This section of the exam measures the skills of an EPM Consultant and covers designing planning input forms and visual dashboards to support decision-making.</li> </ul>
Topic 19	<ul style="list-style-type: none"> <li>• Explain the benefits of using Groovy Rules: This section of the exam measures the skills of an EPM Consultant and explains how Groovy scripting enhances rule flexibility and performance.</li> </ul>
Topic 20	<ul style="list-style-type: none"> <li>• Set up valid and invalid intersections and cell-level security: This section of the exam measures the skills of an EPM Consultant and focuses on defining valid data intersections and applying security controls to limit data access at the cell level.</li> </ul>
Topic 21	<ul style="list-style-type: none"> <li>• Describe Planning modules: This section of the exam measures the skills of an EPM Consultant and includes identifying different modules like Financials, Workforce, Projects, and Capital.</li> </ul>

Topic 22	<ul style="list-style-type: none"> <li>• Set Up Planning Security: This section of the exam measures the skills of a Planning Administrator and includes provisioning user roles and assigning appropriate access rights across Planning artifacts and data.</li> </ul>
Topic 23	<ul style="list-style-type: none"> <li>• Build validation rules: This section of the exam measures the skills of an EPM Consultant and includes creating rules that validate data entry in forms.</li> </ul>
Topic 24	<ul style="list-style-type: none"> <li>• Set up Planning and FreeForm Applications: This section of the exam measures the skills of a Planning Administrator and involves setting up Planning applications, including FreeForm apps, to support flexible planning and modeling needs.</li> </ul>

## Reliable Exam 1z0-1080-25 Pass4sure | Latest 1z0-1080-25 Exam Price

It is browser-based; therefore no need to install it, and you can start practicing for the Oracle 1z0-1080-25 exam by creating the Oracle Planning 2025 Implementation Professional (1z0-1080-25) practice test. You don't need to install any separate software or plugin to use it on your system to practice for your actual Oracle Planning 2025 Implementation Professional (1z0-1080-25) exam. DumpsTorrent 1z0-1080-25 web-based practice software is supported by all well-known browsers like Chrome, Firefox, Opera, Internet Explorer, etc.

## Oracle Planning 2025 Implementation Professional Sample Questions (Q118-Q123):

### NEW QUESTION # 118

After enabling and configuring Financials, which of the following is a recommended post-configuration task?

- A. Specify the days in Period and to modify account signage for alternate reporting methods
- B. Disable features that you do not plan to use
- C. Map and rename custom dimensions in Financials that will be used to integrate with other modules
- D. Plan headcount and detailed employee compensation by employee, job code, or both

**Answer: C**

Explanation:

After enabling and configuring the Financials module in Oracle Planning 2024, post-configuration tasks are recommended to optimize its functionality and integration. The most relevant task among the options is:

\* A. Plan headcount and detailed employee compensation by employee, job code, or both: Incorrect. This is a Workforce module task, not a post-configuration task for Financials, which focuses on revenue, expenses, and financial statements, not employee-level planning.

\* B. Specify the days in Period and to modify account signage for alternate reporting methods: Incorrect.

While period setup occurs during initial configuration (e.g., Planning and Forecast Preparation), modifying account signage or days in periods is not a recommended post-configuration task—it's either part of initial setup or an ad-hoc adjustment.

\* C. Map and rename custom dimensions in Financials that will be used to integrate with other modules:

Correct. Post-configuration, mapping and renaming custom dimensions (e.g., Department, Product) ensures seamless integration with other modules like Workforce or Projects. This task aligns dimensions across the application, a common best practice after enabling Financials.

\* D. Disable features that you do not plan to use: Incorrect. Disabling features is not a typical post-configuration task; features are enabled/disabled during initial configuration via the Configure card, not as a follow-up step.

The Oracle documentation highlights mapping custom dimensions as a recommended post-configuration task to facilitate data integration and reporting, making C the correct answer.

References:

Oracle Planning 2024 Implementation Study Guide: "Post-Configuration Tasks for Financials" (docs.oracle.com, Published 2024-09-20).

Oracle EPM Cloud Documentation: "Configuring Financials and Integration" (docs.oracle.com, Published 2023-11-10, updated for 2024).

### NEW QUESTION # 119

Which statement is true about the Currency dimension for Modules and Custom application types?

- A. It contains a section for input currencies and another for reporting currencies.
- B. It contains a single member called Local and other members representing reporting currencies
- **C. It is not provided with any content and is set up as a custom dimension.**
- D. It contains a list of currencies and exchange rate types.

**Answer: C**

### NEW QUESTION # 120

Which two types of Groovy Rules are supported by Oracle?

- A. Rules that overwrite member formulas that combine operators and calculation functions, and perform calculations on members in Dimension Editor
- **B. Rules that can dynamically generate calculation scripts at run time based on contexts such as runtime prompts, the POV, the current grid, and so on**
- **C. Pure Groovy rules that can perform data validations and cancel the operation if the data entered violates company policies**
- D. Rules that dynamically calculate data and perform validation checks in tile charts and infolets

**Answer: B,C**

Explanation:

In Oracle Planning 2024, Groovy Rules enhance business logic flexibility. Oracle supports two main types of Groovy Rules:

\* A. Rules that overwrite member formulas that combine operators and calculation functions, and perform calculations on members in Dimension Editor: Incorrect. Groovy Rules do not overwrite member formulas in the Dimension Editor; they operate at runtime and are defined in the Rules editor, not as static dimension overrides.

\* B. Rules that can dynamically generate calculation scripts at run time based on contexts such as runtime prompts, the POV, the current grid, and so on: Correct. Oracle supports Groovy Rules that generate dynamic calc scripts based on runtime contexts (e.g., POV, grid data, prompts), enabling adaptive calculations.

\* C. Pure Groovy rules that can perform data validations and cancel the operation if the data entered violates company policies: Correct. Pure Groovy Rules can validate data (e.g., checking ranges or policies) and cancel operations (e.g., via exceptions), a key feature for enforcing business rules.

\* D. Rules that dynamically calculate data and perform validation checks in tile charts and infolets:

Incorrect. Groovy Rules operate on cubes and forms, not directly within tile charts or infolets, which are UI elements driven by underlying data, not rule execution points.

The Oracle documentation confirms B (dynamic script generation) and C (data validation) as supported Groovy Rule types, making them the correct answers.

Oracle Planning 2024 Implementation Study Guide: "Groovy Rules in Planning" (docs.oracle.com, Published 2024-10-15).

Oracle EPM Cloud Documentation: "Supported Groovy Rule Types" (docs.oracle.com, Published 2023-11-20, updated for 2024).

### NEW QUESTION # 121

Which three required setup options must you select when creating a Module-based Planning application?

- A. Period Frequency
- **B. Custom Dimensions**
- C. Main Currency
- **D. Rolling Forecast**
- **E. Application Type**

**Answer: B,D,E**

### NEW QUESTION # 122

Which option describes Intelligent Performance Management (IPM) Insights?

- A. Analyzes past data and predicted data, helping you find patterns in data
- B. Checks when conditions are met in forms, and generates messages when data violates specified condition
- C. Displays high-level aggregated information for quick consumptions at a glance
- D. Enables users to keep their work private (from the other non-administrators) as they develop their plans.

Answer: A

## NEW QUESTION # 123

.....

Many customers may be doubtful about our price. The truth is our price is relatively cheap among our peer. The inevitable trend is that knowledge is becoming worthy, and it explains why good 1z0-1080-25 resources, services and data worth a good price. We always put our customers in the first place. Helping candidates to pass the 1z0-1080-25 Exam has always been a virtue in our company's culture, and you can connect with us through email at the process of purchasing and using, we would reply you as fast as we can.
