## Standard HPE6-A88 Answers & Reliable HPE6-A88 Test Simulator

There are a lot of experts and professors in or company in the field. In order to meet the demands of all people, these excellent experts and professors from our company have been working day and night. They tried their best to design the best HPE6-A88 certification training dumps from our company for all people. By our study materials, all people can prepare for their HPE6-A88 exam in the more efficient method. We can guarantee that our study materials will be suitable for all people and meet the demands of all people, including students, workers and housewives and so on. If you decide to buy and use the HPE6-A88 Training Materials from our company with dedication on and enthusiasm step and step, it will be very easy for you to pass the exam without doubt. We sincerely hope that you can achieve your dream in the near future by the HPE6-A88 latest questions of our company.

## HPE Aruba Networking ClearPass Exam Sample Questions (Q64-Q69):

### NEW QUESTION # 64

A network administrator is setting up ClearPass for a large organization and needs to ensure that user credentials are validated efficiently while also gathering rich context about the users. Which authentication source should the administrator prioritize to meet the need?

- A. Internal Database
- **B. Active Directory**
- C. SQL Servers

**Answer: B**

Explanation:

Active Directory should be prioritized because it allows ClearPass to efficiently validate user credentials and retrieve rich contextual information such as group membership, organizational roles, and user attributes. This enhances both authentication accuracy and policy-based access control.

#### **NEW QUESTION # 65**

What is the main purpose of the ClearPass Policy Manager?

- A. To configure Aruba wireless access points
- B. To optimize the routing protocols in the network
- C. To manage user traffic on the network
- **D. To provide a centralized point for policy enforcement**

**Answer: D**

Explanation:

ClearPass Policy Manager allows administrators to create and enforce policies regarding user and device access to the network.

#### **NEW QUESTION # 66**

An organization is setting up a guest network using ClearPass and wants to ensure a seamless login experience for repeat visitors. Which approach should they take to achieve this goal while maintaining a reasonable level of security?

- A. Implement a fully secured 802.1X network for guest users.
- B. Create a web login page without any additional authentication methods.
- **C. Combine MAC authentication with the captive portal authentication process.**

**Answer: C**

Explanation:

This approach is known as MAC Caching . During the first visit, the guest logs in via the captive portal. ClearPass then "caches" the device's MAC address for a specific period (e.g., 24 hours or 1 week). When the user returns, the network device performs a MAC-based authentication; ClearPass recognizes the cached device and grants access immediately, allowing the guest to bypass the portal entirely for a "seamless" experience.

#### **NEW QUESTION # 67**

A security analyst notices the system is set to gather device location information from network device attributes. Which attribute is likely being used?

- A. Client-Domain-Name
- B. SSID
- **C. Network device attribute settings**

**Answer: C**

Explanation:

ClearPass can extract location context from the NAD's RADIUS attributes. Common attributes used include NAS-Port-Id (for wired switches to show the specific port/closet) or Called-Station-Id (for wireless to show the AP Name or MAC). By configuring the Network Device attribute settings in ClearPass, these raw strings can be mapped to human-readable locations (e.g., "Building 5, 2nd Floor").

#### **NEW QUESTION # 68**

How does ClearPass handle device profiling for network access?

- A. By assigning static IP addresses
- B. By creating a device blacklist

- C. By collecting device attributes and categorizing them
- D. By configuring static MAC address tables

**Answer: C**

Explanation:

ClearPass Profiler collects various attributes of devices (like OS, type, and manufacturer) to categorize them for network access control.

## NEW QUESTION # 69

.....

How to realize your dream? Fast2test HP HPE6-A88 braindump is the royal road to success when preparing for HP HPE6-A88 test. Fast2test provide you with exam prep, which will pass the exam with assurance.
