

# Enhance Your Success Rate with GetValidTest's NS0-901 Exam Dumps

BONUS!!! Download part of GetValidTest NS0-901 dumps for free: <https://drive.google.com/open?id=1fHEq1DNlvF583YeFCij0dzPoCDF0XfLv>

The NS0-901 exam questions by experts based on the calendar year of all kinds of exam after analysis, it is concluded that conforms to the exam thesis focus in the development trend, and summarize all kind of difficulties you will face, highlight the user review must master the knowledge content. Our NetApp Certified AI Expert Exam study question has high quality. So there is all effective and central practice for you to prepare for your test. With our professional ability, we can accord to the necessary testing points to edit NS0-901 Exam Questions. It points to the exam heart to solve your difficulty.

It's crucial to have reliable Network Appliance NS0-901 exam questions and practice test to prepare for the NS0-901 Exam. GetValidTest offers real Network Appliance NS0-901 exam questions with accurate answers in our NS0-901 practice exam format. Our NS0-901 Practice Questions and answers resemble the actual Network Appliance NS0-901 questions, and they have been verified by experts to ensure your success in the NetApp Certified AI Expert Exam Exam with ease.

## NS0-901 Test Cram - NS0-901 Latest Dumps Ebook

NS0-901 practice dumps offers you more than 99% pass guarantee, which means that if you study our NS0-901 learning guide by heart and take our suggestion into consideration, you will absolutely get the certificate and achieve your goal. Meanwhile, if you want to keep studying this course, you can still enjoy the well-rounded services by NS0-901 Test Prep, our after-sale services can update your existing NS0-901 study quiz within a year and a discount more than one year.

## Network Appliance NetApp Certified AI Expert Exam Sample Questions (Q30-Q35):

### NEW QUESTION # 30

A company is running its AI training workloads on a NetApp AFF A-Series system. To manage costs, they want to automatically move inactive training datasets and older model checkpoints from the high-performance all-flash tier to a lower-cost object storage tier, such as an on-premises StorageGRID or a public cloud bucket. The process must be transparent to the data scientists and not require changes to their scripts or file paths.

Which two NetApp technologies should be combined to achieve this goal? (Choose 2.)

- A. NetApp StorageGRID
- B. NetApp XCP
- C. NetApp SnapMirror
- D. NetApp FabricPool
- E. NetApp FlexCache

Answer: A,D

### NEW QUESTION # 31

An internal audit requires the firm to prove the exact state of the financial product documentation that was used by the chatbot to answer a specific query from last Tuesday. The query log shows the request was processed at '2025-07-11T14:30:00Z'. The data pipeline that updates the vector database runs daily at midnight.

Which NetApp technology allows the team to instantly access an immutable, point-in-time version of the vector database volume as it existed on that specific day?

- A. NetApp FabricPool
- B. NetApp Snapshots
- C. NetApp SnapMirror
- D. NetApp FlexClone

**Answer: B**

### NEW QUESTION # 32

The data anonymization job, running in a Kubernetes pod, fails. The pod logs show a "Permission Denied" error when trying to access the source volume on the on-premises ASA. An administrator checks the export policy rule for the volume.

The active rule is as follows:

Rule\_Index: 1

Client\_Match: 10.50.0.0/16

Protocols: nfs4

Read\_Only\_Access: sys

Read\_Write\_Access: -

Superuser\_Access: none

The Kubernetes pod that failed has an IP address of '10.60.5.10'.

What is the cause of the "Permission Denied" error?

- A. The pod's IP address ('10.60.5.10') is not within the allowed client match range ('10.50.0.0/16').
- B. The export policy does not grant read-write access, which is required by the anonymization job.
- C. The 'Superuser\_Access' setting is too restrictive.
- D. The export policy only allows access via the NFSv4 protocol.

**Answer: A**

### NEW QUESTION # 33

An AI platform is suffering from poor performance during distributed training jobs. The training data resides on a single, large NFS volume. Monitoring shows that while the overall network throughput to the storage system is high, individual GPU nodes experience significant I/O wait times, and the single ONTAP volume is becoming a performance bottleneck. The goal is to re- architect the storage layout to maximize read parallelism and throughput for the training cluster.

Which two actions should the architect take to address this performance bottleneck? (Choose 2.)

- A. Enable QoS maximums on the training volume to limit its IOPS.
- B. Use NetApp FlexCache to create a local cache of the training data on each compute node.
- C. Implement a NetApp FlexGroup volume to spread the dataset across multiple constituent volumes and aggregates.
- D. Replace the NFS protocol with iSCSI for all training data access.
- E. Increase the number of network ports connected to the storage controller.

**Answer: B,C**

### NEW QUESTION # 34

A university is building a shared AI research platform. They have two primary requirements:

1. Performance: A "hot" research area for active model training and development that requires the absolute lowest latency and highest throughput to support multiple, simultaneous GPU- intensive jobs.

The data in this area is around 50 TB.

2. Capacity & Cost: A "cold" data lake to store over 5 PB of raw, unstructured experimental data that is infrequently accessed but

must be retained for compliance and future use. This tier must be as cost-effective as possible.

Which combination of NetApp hardware and technologies should an architect select to build a complete, optimized, and cost-effective solution? (Select all that apply.)

- A. Use a NetApp All-SAN Array (ASA) system for the 50 TB high-performance "hot" research area.
- B. Use NetApp E-Series systems for both the hot tier and the cold data lake to simplify management.
- C. Implement NetApp FabricPool to automatically tier inactive data from the ASA system to the StorageGRID data lake.
- D. Enable GPUDirect Storage on the ASA system to provide the lowest latency data path to the GPUs.
- E. Use a standard 10GbE network for all connectivity to reduce costs.
- F. Use NetApp StorageGRID to build the 5 PB cost-effective data lake.

**Answer: A,C,D,F**

## NEW QUESTION # 35

.....

Firstly, we can give you 100% pass rate guarantee on the NS0-901 exam. Our NS0-901 practice quiz is equipped with a simulated examination system with timing function, allowing you to examine your learning results at any time, keep checking for defects, and improve your strength. Secondly, during the period of using NS0-901 learning guide, we also provide you with 24 hours of free online services, which help to solve any problem for you on the NS0-901 exam questions at any time and sometimes mean a lot to our customers.
