NEW QUESTION # 52

Which of the following apply to dynamic item processor (DIP)? Note: There are 3 correct answers to this question.

- A. Sales prices are maintained in the DIP profile
- B. DIP is used to create a quotation
- C. Sources can be based on line items
- D. Material determination is mandatory
- E. Usage of cost elements is mandatory

Answer: A,C,D

Explanation:

Dynamic item processor (DIP) is a tool that allows you to create sales order items automatically based on project data. Some of the features of DIP are: Sales prices are maintained in the DIP profile, which is a parameter that defines how sales order items are created and priced from project data. Sources can be based on line items, which means that you can use individual cost elements or revenue elements as sources for creating sales order items. Material determination is mandatory, which means that you have to assign a material number to each source in order to create sales order items. Reference:
