### NEW QUESTION # 47

(What are some unique selling propositions of SAP Business AI? Note: There are 3 correct answers to this question.)

- A. Robust partner ecosystem with synergistic collaboration
- B. Focus on the technology stack
- C. Development of SAP-specific large language models
- D. In-depth knowledge of business processes across various industries
- E. Direct access to pertinent customer business data

**Answer: A,D,E**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract: Unique selling propositions of SAP Business AI include direct access to pertinent customer business data for grounding AI in enterprise contexts, a robust partner ecosystem enabling synergistic collaborations with industry leaders for innovation, and in-depth knowledge of business processes across industries to deliver domain-specific AI solutions. These propositions emphasize SAP's strengths in data integration, partnerships, and process expertise over generic AI technologies.

Exact extracts supporting this:

Direct access to business data: "SAP's main differentiators are - it's access to business data, understanding of the context of complex business processes, and deep domain and industry expertise."community.sap.com Robust partner ecosystem: "SAP Business AI serves as a key differentiator for Service Partners and offers a wide range of business opportunities."sap.com "Unparalleled collaborations with leading general-purpose AI technology providers."news.sap.com In-depth knowledge of business processes: "Understanding of the context of complex business processes, and deep domain and industry expertise."community.sap.com Other options are incorrect because:

Option B: While SAP has a strong technology stack, the focus is on business outcomes rather than the stack itself as a unique proposition; differentiators are data, processes, and ecosystem.

Option D: SAP does not develop its own large language models but partners with providers like Microsoft, Google, and Cohere for LLMs, emphasizing integration over proprietary development.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: From SAP Learning course "Discovering SAP Business AI," unit "Articulating the Value of SAP Business AI," and SAP Community blog "Generative AI with SAP - Part 1." These highlight access to data, process knowledge, and partnerships as USPs, per C\_BCBAI\_2502 materials.

- A. Replace managers
- B. Reduce costs
- C. Boost productivity
- D. Facilitate collaboration

Boost productivity by automating repetitive tasks and providing actionable insights, allowing employees to focus on strategic activities. Reduce costs through efficient resource utilization and streamlined workflows, minimizing manual effort and operational expenses.
