Budget-friendly ISO-IEC-27001-Foundation study guides have been created by RealExamFree because the registration price for the APMG-International ISO-IEC-27001-Foundation exam is already high. You won't ever need to look up information in various books because our APMG-International ISO-IEC-27001-Foundation Real Questions are created with that in mind. We provide 365 days free upgrades.

### **APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q28-Q33):**

#### **NEW QUESTION # 28**

Which activity is a required element of information security risk identification?

- A. Determine the level of risk
- B. Consider the likelihood of the occurrence
- **C. Determine the risk owners**
- D. Prioritize the risk for treatment

**Answer: C**

Explanation:

Clause 6.1.2 defines the mandatory elements of risk assessment. Under risk identification, the standard requires: "identifies the information security risks:1) apply the information security risk assessment process to identify risks...; and2) identify the risk owners." By contrast, considering likelihood and determining levels of risk (options B and D) are part of risk analysis(6.1.2 d) "assess the realistic likelihood...";

"determine the levels of risk"), and prioritization for treatment (option C) is part of risk evaluation(6.1.2 e) "prioritize the analysed risks for risk treatment"). Therefore, the specific activity that belongs to risk identification is to identify the risk owners. This sequencing is prescribed to ensure each risk has a designated owner responsible for decisions on treatment and acceptance downstream.

#### **NEW QUESTION # 29**

To whom does the scope of the Terms and conditions of employment control apply?

- A. Contractors only
- **B. All employees, contractors and third-party users**
- C. Employees only
- D. Personnel and the organization

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A.6.1 (Terms and conditions of employment) states:

"The contractual agreements with employees and contractors shall state their and the organization's responsibilities for information security." This means the control applies not just to employees, but also contractors and, where relevant, third-party users who are subject to contractual obligations with the organization. The goal is to ensure that all parties engaged in work under the organization's control understand their security responsibilities before, during, and after employment or contract engagement.

Options A and B are too narrow, excluding key groups. Option C misrepresents the scope by implying a mutual responsibility but not identifying the individuals covered. The explicit scope includes employees, contractors, and third-party users.

Therefore, the correct answer is D.

#### NEW QUESTION # 30

Which item is required to be considered when defining the scope and boundaries of the information security management system?

- A. The dependencies between activities performed by the organization
- B. The lessons learned from the information security experiences of other organizations
- C. The regular activities necessary to maintain and improve the ISMS
- D. The level of quality to which the ISMS must adhere

#### Answer: A

Explanation:

Clause 4.3 (Determining the scope of the ISMS) requires consideration of

"the external and internal issues referred to in 4.1; the requirements referred to in 4.2; and interfaces and dependencies between activities performed by the organization, and those that are performed by other organizations." This confirms that dependencies between activities are a required factor when defining scope. Options B (quality levels), C (lessons learned), and D (regular activities for improvement) are not scope requirements, though they may be relevant in planning or improvement processes.

Thus, the verified answer is A: Dependencies between activities performed by the organization.

#### NEW QUESTION # 31

Which action must top management take to provide evidence of its commitment to the establishment, operation and improvement of the ISMS?

- A. Ensuring information security objectives are established
- B. Implementing the actions from internal audits
- C. Communicating feedback from interested parties to the organization
- D. Producing a risk assessment report

#### Answer: A

Explanation:

Clause 5.1 (Leadership and Commitment) requires top management to demonstrate leadership by:

\* "ensuring the information security policy and the information security objectives are established and are compatible with the strategic direction of the organization;"

\* "ensuring the integration of the ISMS requirements into the organization's processes;"

\* "ensuring that the resources needed for the ISMS are available;"

Among the options, the one explicitly mandated is ensuring that information security objectives are established. Risk assessments (C) and implementing audit actions (D) are responsibilities of management but not the direct leadership evidence required in Clause 5.1. Communicating interested party feedback (A) is relevant but not specifically cited as leadership evidence. Thus, the verified answer is B.

#### NEW QUESTION # 32

Which of the following statements about the relationship between ISO/IEC 27001 and ISO/IEC 27002 is true?

\* ISO/IEC 27002 provides implementation advice on the controls selected during the ISO/IEC 27001 information security risk management process

\* ISO/IEC 27002 provides a process for information security risk management which implements the requirements of ISO/IEC 27001

- A. Only 1 is true
- B. Both 1 and 2 are true
- C. Neither 1 or 2 is true
- D. Only 2 is true

#### Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27001 & 27002:2022 standards:

ISO/IEC 27001 Annex A lists reference controls. ISO/IEC 27002 provides detailed guidance on the implementation of those controls, including purpose, guidance, and examples. Clause 6.1.3 of ISO/IEC 27001 makes the link explicit: controls from Annex A are referenced, but ISO/IEC 27002 explains how to implement them. However, ISO/IEC 27002 does not provide a process for risk management—that is covered by ISO/IEC 27005. Risk management requirements are in ISO/IEC 27001 (Clauses 6.1.2 and 6.1.3). Therefore, statement 1 is true, but statement 2 is false. Correct answer: A.

## NEW QUESTION # 33

.....

It is very convenient for all people to use the ISO-IEC-27001-Foundation study materials from our company. Our study materials will help a lot of people to solve many problems if they buy our products. The online version of ISO-IEC-27001-Foundation study materials from our company is not limited to any equipment, which means you can apply our study materials to all electronic equipment, including the telephone, computer and so on. So the online version of the ISO-IEC-27001-Foundation Study Materials from our company will be very useful for you to prepare for your exam. We believe that our ISO-IEC-27001-Foundation study materials will be a good choice for you.
