정답: A

설명:

Step by Step Explanation with exact Extract from SAP SuccessFactors Learning documents:

* Understanding Training Data Analysis and Monitoring:

* SAP SuccessFactors Learning provides tools to analyze training data and monitor users' learning progress, with reports being the primary mechanism for this purpose.

* Role of Reports:

* Reports allow administrators to generate detailed insights into training completion, compliance, and user progress, supporting data-driven decisions.

* Extract from SAP SuccessFactors Learning Documentation (SAP Help Portal, Admin Guide, Reporting):

* This confirms option A, as reports are the primary tool for this purpose.

* Types of Reports Available:

* Reports include User Progress Reports, Completion Status Reports, and Compliance Reports, which provide detailed views of learning activities.

* Extract from SAP SuccessFactors Learning Documentation (SAP Help Portal, Admin Guide, Reporting):

"Available reports include User Progress Reports for tracking individual learning, Completion Status Reports for curriculum compliance, and custom reports for specific metrics. Access reports via System Administration > Reports."

* Why Other Options are Incorrect:

* Option B (Classes):Classes are scheduled instances of courses, not tools for analyzing data.

"Classes represent scheduled offerings of learning items, not tools for data analysis" (SAP SuccessFactors Learning Admin Guide).

* Option C (Items):Items are individual learning objects, not used for monitoring progress.

"Items are the building blocks of learning content, not used for progress monitoring" (SAP SuccessFactors Learning Admin Guide).
