CSC 110 — Introduction to Computers

University of Benin, Department of Computer Science

COMPLETE PAST QUESTIONS — ALL OPTIONS + ANSWERS + EXPLANATIONS

Sessions Covered: 2013/14 • 2014/15 • 2015/16 • 2016/17 • 2017/18 • 2018/19

Correct answers are highlighted in green ✓

2013/2014 SESSION — PAPER TYPE C

Q1. Which of the following is NOT among the ten commandments of computer ethics?

- (A) Thou shalt think about the social consequences of the program you are designing
- (B) Thou shalt not use the computer to bear false witness
- (C) Thou shalt not copy or use proprietary software for which you have not paid
- (D) Thou shalt not use a computer in a way that ensures consideration and respect for your fellow humans ✓**
- (E) Thou shalt not appropriate other people's intellectual output

Answer: (D) Option D is the odd one out — the commandments prohibit harmful use, not mandate a specific style of respectful use phrased this way.

Q2. Convert BBC₁₆ to octal.

- (A) 5674 ✓**
- (B) 5764
- (C) 7447
- (D) 7651
- (E) 6547

Answer: (A) BBC₁₆ = 3004₁₀. 3004 ÷ 8 repeatedly = 5674₈.

Q3. In the floppy disk drive, the disk is rotated normally at _____ (RPM).

- (A) 64
- (B) 100
- (C) 128
- (D) 256
- (E) 300 ✓**

Answer: (E) Standard floppy disks rotate at 300 RPM.

Q4. A hard disk _____ is a specialized chip and electronic circuit that controls the transfer of data, instructions and information from a disk to the computer.

- (A) Chip
- (B) Read head
- (C) Drive
- (D) Controller ✓**
- (E) Card

Answer: (D) The disk controller chip manages all data transfers between the hard disk and the computer.

Q5. The most common form of computer today is?

- (A) Micro-computers ✓**
- (B) Embedded computers
- (C) Tablet PCs
- (D) Mobile phones
- (E) Wearable computers

Answer: (A) Microcomputers (PCs, laptops) are by far the most common type of computer.

Q6. AB4₁₆ - BC₁₆ will give?

Our company never sets many restrictions to the CWISA-103 exam question. Once you pay for our study materials, our system will automatically send you an email which includes the installation packages. You can conserve the CWISA-103 real exam dumps after you have downloaded on your disk or documents. Whenever it is possible, you can begin your study as long as there has a computer. All the key and difficult points of the CWISA-103 exam have been summarized by our experts. They have rearranged all contents, which is convenient for your practice. Perhaps you cannot grasp all crucial parts of the CWISA-103 Study Tool by yourself. You also can refer to other candidates' review guidance, which might give you some help. Then we can offer you a variety of learning styles. Our printable CWISA-103 real exam dumps, online engine and windows software are popular among candidates. So you will never feel bored when studying on our CWISA-103 study tool.

The students can give unlimited to track the performance of their last given tests in order to see their mistakes and try to avoid them while giving the final test. Customers of PrepAwayPDF will receive updates till 1 year after their purchase. Anyone can try a free demo of the Certified Wireless IoT Solutions Administrator(2025 Edition) (CWISA-103) practice material before making purchase. There is a 24/7 available support system that assists users whenever they are stuck in any problem or issues. This product is a complete package and a blessing for those who want to pass the CWNP CWISA-103 test in a single try.

Most people define CWISA-103 study tool as regular books and imagine that the more you buy, the higher your grade may be. It is

true this kind of view make sense to some extent. However, our CWISA-103 real questions are high efficient priced with reasonable amount, acceptable to exam candidates around the world. Our CWISA-103 practice materials comprise of a number of academic questions for your practice, which are interlinked and helpful for your exam. Unlike those untenable practice materials in the market, our CWISA-103 practice materials are highly utilitarian for their accuracy of the real exam because all content are compiled by proficient experts who engaged in this area more than ten years. It is our unswerving will to help you pass the exam by CWISA-103 study tool smoothly.

CWNP CWISA-103 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Radio Frequency Communications: This section of the exam measures the skills of RF Engineers and focuses on the fundamental principles of radio frequency communications. It involves explaining RF wave characteristics such as frequency, wavelength, and amplitude, and understanding behaviors like amplification, attenuation, and free space path loss. The domain covers describing modulation techniques including ASK, FSK, PSK, and QAM, and explaining the capabilities of RF components like radios, antennas, and cabling. It also includes describing the use and capabilities of different RF bands in terms of communication ranges and power levels.
Topic 2	<ul style="list-style-type: none"> Supporting Wireless Solutions: This section of the exam measures the skills of Wireless Support Engineers and focuses on the ongoing administration and support of wireless solutions across various vertical markets. It involves administering solutions in healthcare, industrial, smart cities, retail, and other environments while troubleshooting common problems including interference, configuration issues, and hardware malfunctions. The domain includes determining the best use of scripting and programming solutions for IoT implementations, understanding data structures and APIs, and comprehending networking and security protocols. It also covers understanding application architectures and their impact on wireless solutions, including single-tier and multi-tier architectures, database systems, and application servers.
Topic 3	<ul style="list-style-type: none"> Planning Wireless Solutions: This section of the exam measures the skills of IoT Solutions Architects and encompasses the planning phase of wireless IoT solutions. It involves identifying system requirements, including use cases, capacity needs, security requirements, and integration needs, while considering constraints such as budgetary, technical, and regulatory limitations. The domain includes selecting appropriate wireless solutions based on requirements, planning for technical needs, including LAN WAN networking and frequency coordination, and understanding the capabilities of common wireless IoT solutions like Bluetooth, Zigbee, and LoRaWAN, along with location services and methods.
Topic 4	<ul style="list-style-type: none"> Implementing Wireless Solutions: This section of the exam measures the skills of Wireless Implementation Specialists and covers the practical implementation of wireless IoT solutions. It involves understanding key issues related to automation, integration, monitoring, and management, and using best practices in implementation, including pilot testing, configuration, installation, and documentation. The domain includes validating implementations through testing and troubleshooting, performing installation procedures including equipment mounting and connectivity configuration, and implementing security solutions covering authentication, authorization, and encryption. It also encompasses knowledge transfer practice, including staff training and solution documentation.
Topic 5	<ul style="list-style-type: none"> Wireless Technologies: This section of the exam measures the skills of Wireless Architects and covers foundational knowledge of wireless IoT technologies and their applications. It includes maintaining awareness of emerging technologies through research, understanding common applications and their associated frequencies and protocols, and familiarity with key standards organizations like IEEE, IETF, and Wi-Fi Alliance. The domain also encompasses defining various wireless network types including WLAN, WPAN, and IoT implementations across industries, along with understanding the hardware and software components of IoT devices and gateways, covering processors, memory, radios, sensors, and operating systems.

CWNP Certified Wireless IoT Solutions Administrator(2025 Edition) Sample Questions (Q45-Q50):

NEW QUESTION # 45

What process, used for security in wireless solutions, is defined as the encoding of information to prevent readability by unauthorized users?

- A. Encryption
- B. Authorization
- C. Authentication
- D. Access Control

Answer: A

Explanation:

Access Control: Limits who can access data, but doesn't make it unreadable.

Authentication: Validates user/device identity, but not focused on data confidentiality.

Authorization: Determines the actions a user is allowed, separate from securing the data itself.

How encryption works: Encryption uses algorithms and keys to turn plaintext into unreadable ciphertext. Only those with the correct key can decrypt it.

Data in motion vs. data at rest: Encryption protects sensitive information both when transmitted over the wireless network and when stored on devices.

NEW QUESTION # 46

How is ASK modulation different from FSK modulation?

- A. ASK varies the amplitude of the signal while FSK shifts its frequency
- B. ASK can carry more data than FSK
- C. FSK is more sensitive to noise than ASK
- D. ASK does not work at high frequencies

Answer: A

Explanation:

ASK (Amplitude Shift Keying): Digital data is represented by changes in the amplitude (strength) of a carrier wave.

FSK (Frequency Shift Keying): Digital data is represented by changes in the frequency of a carrier wave.

NEW QUESTION # 47

Within what development environment is XAML most commonly used?

- A. .NET
- B. Python
- C. PHP
- D. R

Answer: A

Explanation:

XAML and .NET: XAML (eXtensible Application Markup Language) is primarily used within the .NET framework for defining user interfaces.

NEW QUESTION # 48

What is a valid reason to continue using older wireless networking technologies?

- A. A requirement to support legacy devices
- B. The desire to support internal antennas
- C. The desire for faster communications
- D. The desire to use older encryption processes, which are faster regardless of the CPU implemented

Answer: A

Explanation:

- * Legacy Support: The primary reason to continue using older wireless technologies is the need to connect with devices that don't support newer standards (e.g., old sensors or equipment).
- * Other Reasons (Not as Strong):
- * Cost: Replacing legacy devices can be expensive.
- * Reliability: Some legacy technologies might be well-proven in specific settings.

NEW QUESTION # 49

What is the most common difference between a single board computer (SBC) and a controller board?

- A. Controller boards have more powerful processors than most SBCs
- B. SBCs always have connectors for M2 devices and controller boards do not
- C. Controller boards have I/O headers and SBCs do not
- D. SBCs typically have connectors for display and input devices while controller boards do not

Answer: D

Explanation:

- * SBCs (Single Board Computers): Designed as standalone, small-form-factor computers. They often include:
- * Display Interfaces: HDMI, DisplayPort, etc.
- * Input Connections: USB for keyboards, mice, etc.
- * General Purpose Functionality: Can run a full operating system for wider applications.
- * Controller Boards: Focus on controlling specific hardware or systems.
- * Limited direct I/O: Limited connectors for displays/input devices.
- * Specialized tasks: Designed for embedded applications within larger systems.
