# New Deep-Security-Professional Exam Online | Latest Deep-Security-Professional Reliable Exam Simulator: Trend Micro Certified Professional for Deep Security 100% Pass

BTW, DOWNLOAD part of Real4Prep Deep-Security-Professional dumps from Cloud Storage: https://drive.google.com/open?id=1Gj7s5DpiU2XdXq521hA7-HfFGP8Koc1t

All formats of Real4Prep's products are immediately usable after purchase. We also offer up to 365 days of free updates so you can prepare as per the Trend Micro Certified Professional for Deep Security (Deep-Security-Professional) latest exam content. Real4Prep offers a free demo version of the Trend Certification Exams so that you can assess the validity of the product before purchasing it.

Trend Micro Certified Professional for Deep Security exam is a certification program designed for professionals who want to validate their skills and knowledge in securing cloud environments using Trend Micro's Deep Security solution. Trend Micro Certified Professional for Deep Security certification program is ideal for security professionals, cloud architects, and IT administrators who want to learn how to protect critical assets in their cloud environments against cyber threats.

Free PDF Quiz Trend - Deep-Security-Professional - Marvelous New Trend Micro Certified Professional for Deep Security Exam Online

Our Trend experts also guarantee that anyone who studies well enough from the prep material will pass the Trend Exams on the first try. We have kept the price of our Trend Micro Certified Professional for Deep Security (Deep-Security-Professional) exam prep material very reasonable compared to other platforms so as not to stretch your tight budget further. And we also offer up to 1 year of free updates. A demo version of the preparation material is available on the website so that you can verify the validity of the product before obtaining them.

The Trend Micro Certified Professional for Deep Security certification exam consists of 50 multiple-choice questions and is designed to test the candidate's knowledge of Trend Micro's deep-security products, including virtual patching, intrusion prevention, and anti-malware technologies. The test is administered online and can be taken from anywhere in the world.

Trend Micro Certified Professional for Deep Security Sample Questions (Q74-Q79):

NEW QUESTION # 74
Which of the following is NOT an operation that can be performed on Deep Security resources using the API?

- A. POST
- B. PUT
- C. GET
- D. VIEW

Answer: D

Explanation:
Trend Micro Deep Security APIs use standard RESTful operations:
GET (retrieve resource)
POST (create resource)
PUT (update resource)
DELETE (remove resource)
"VIEW" is not a standard HTTP method nor an operation in the Deep Security API context.
From the official documentation:
"The Deep Security API supports standard HTTP methods for interacting with resources: GET, POST, PUT, and DELETE."

NEW QUESTION # 75
Which of the following operations makes use of the Intrusion Prevention Protection Module?

- A. Port scans
- B. Stateful traffic analysis
- C. Integrity scans
- D. Application traffic control

Answer: B

Explanation:
The Intrusion Prevention (IPS) module performs stateful traffic analysis to detect and block exploit attempts and malicious activity in network traffic, tracking the state of network connections and analyzing packet sequences to identify threats.
From the official documentation:
"The Intrusion Prevention module analyzes network traffic using deep packet inspection and stateful traffic analysis to block known and unknown threats, including vulnerability exploits." Option D is correct.
Option A is handled by Integrity Monitoring.
Option B (port scanning) is a network reconnaissance activity and may be detected but is not a core operation of IPS.
Option C (application traffic control) is typically managed by Firewall, not IPS.

NEW QUESTION # 76
Which of the following correctly describes the Firewall rule Action of Force Allow?

- A. Force Allow permits traffic that would otherwise be denied by other Firewall rules to pass, but still enforces filtering by the Intrusion Prevention Protection Module.
- B. Force Allow permits traffic to bypass analysis by both the Firewall and Intrusion Pre-vention Protection Modules.
- C. Force Allow permits traffic to bypass analysis by all Deep Security Protection Modules.
- D. Force Allow explicitly allows traffic that matches the Firewall rule to pass, and implicitly denies all other traffic.

Answer: A

Explanation:
Force Allow permits the matching traffic through the firewall, even if other firewall rules would block it.
However, traffic is still subject to analysis and filtering by the Intrusion Prevention (IPS) module.
From the official documentation:
"Force Allow: Permits traffic through the firewall that would otherwise be blocked, but the traffic will still be analyzed by the
Intrusion Prevention module and other relevant protection modules." References:
Trend Micro Deep Security Admin Guide: Firewall Actions
Deep Security Help: Force Allow ActionV

NEW QUESTION # 77
Which of the following operations makes use of the Intrusion Prevention Protection Module?

- A. Port scans
- B. Stateful traffic analysis
- C. Integrity scans
- D. Application traffic control

Answer: B

NEW QUESTION # 78
Which of the following are valid methods for pre-approving software updates to prevent Ap-plication Control Events from being
triggered by the execution of the modified software? Select all that apply.

- A. Once the inventory scan has run when Application Control is first enabled, there is no way to update the inventory to
  incorporate modified software.
- B. Maintenance mode can be enabled while completing the updates.
- C. Edit the inventory database file (AC.db) on the Agent computer to include the hash of the newly updated software. Save
  the change and restart the Deep Security Agent. The software updates will now be approved.
- D. Software updates performed by a Trusted Updater will be automatically approved.

Answer: B,D

Explanation:
Application Control can be configured to pre-approve updates either by performing them with a designated Trusted Updater (such
as a software management tool or patch process) or by putting the agent in Maintenance Mode, during which changes are
automatically approved. Manually editing the AC.db file is not a supported or recommended method.
