2026 CWNP CWAP-405 Dumps - Obtain Certification More Rapidly

Test4Cram CWNP exam study material can simulate the actual test and give you an interactive experience during the practice. When you choose our CWAP-405 valid training dumps, you will enjoy one year free update for CWAP-405 Pdf Torrent without any additional cost. These updates are meant to reflect any changes related to the CWAP-405 actual test. 100% pass is an easy thing for you.

CWNP Certified Wireless Analysis Professional Sample Questions (Q24-Q29):

NEW QUESTION # 24

During a VHT Transmit Beamforming sounding exchange, the beamformee transmits a Compressed Beamforming frame to the beamformer. What is communicated within this Compressed Beamforming frame?

- A. Beamforming Matrix
- B. Steering Matrix
- C. Beamformee Matrix
- **D. Feedback Matrix**

Answer: D

Explanation:

During a VHT transmit beamforming sounding exchange, the beamformee measures the channel from the beamformer and reports channel state information back in a Compressed Beamforming frame. This frame contains compressed feedback that represents the channel characteristics, enabling the beamformer to calculate the appropriate steering matrix for optimized transmission.

NEW QUESTION # 25

Which piece of information must be transmitted in a Reassociation Request frame for a PMK Caching roam to be successful?

- A. PTKID
- **B. PMKID**
- C. PMK
- D. PTK

Answer: B

Explanation:

For a PMK Caching roam, the client includes the PMK Identifier (PMKID) in the Reassociation Request. This allows the new AP to quickly identify the pre-shared Pairwise Master Key (PMK) without performing a full 802.1X authentication, enabling a fast and seamless roam.

NEW QUESTION # 26

Why would a STA that supports 802.11k Radio Measurement send a Neighbor Request to an AP?

- **A. To request a list of neighboring APs which the STA can use as roaming candidates**
- B. To learn about neighboring interference sources and tune its RF radio accordingly
- C. To request a list of neighboring STAs which enables the STA to better pick the right protection mechanisms
- D. To inform the current AP about the STA's intent to roam to a neighboring AP, ensuring a seamless handover

Answer: A

Explanation:

A STA that supports 802.11k Radio Measurement would send a Neighbor Request to an AP to request a list of neighboring APs which the STA can use as roaming candidates. A Neighbor Request is an Action frame that contains a subelement specifying the type of information that the STA wants to receive from the AP. A Neighbor Report is an Action frame that contains a subelement with a list of neighboring APs that match the criteria specified in the Neighbor Request. The Neighbor Report provides information such as BSSID, channel, operating class, and PHY type of each neighboring AP. This information helps the STA to perform intelligent roaming decisions based on signal quality, load, and compatibility. References: CWAP-405 Certified Wireless Analysis Professional Study and Reference Guide, Chapter 12: 802.11k/v/r/u/w/ai Amendments, page 434; CWAP-405 Certified Wireless Analysis Professional Study and Reference Guide, Chapter 12: 802.11k/v/r/u/w/ai Amendments, page 435.

NEW QUESTION # 27

Which statement is true regarding the Association Identifier (AID) used in IEEE 802.11 WLANs?

- A. The AID is used by the access point in EDCA mode to reduce duplicate transmissions when sending multicasts.
- **B. The AID has a maximum value of 2007, and resides in the duration/ID field of a PS-Poll frame.**
- C. The AID field is present only in Beacons frames.
- D. The client station is assigned an AID value in the 802.11 authentication response frame.
- E. The AID has a maximum value of 2048, and is used to uniquely identify a wireless client station associated with an access point.

Answer: B

NEW QUESTION # 28

During an initial install of a controller-based WLAN, the APs are not locating the WLAN controller. The controller is two router hops away from the nearest AP. DHCP is not used. When performing a packet trace, you see a DNS response code of 3 targeted at one of the APs.

What is the problem?

- A. The authentication to the DNS server failed
- B. The DNS server is not authoritative for the domain
- C. The router is not forwarding packets to the DNS server
- **D. The controller host record has not been created in the DNS server**

Answer: D

NEW QUESTION # 29

.....

Test4Cram facilitates you with three different formats of its CWAP-405 exam study material. These CWAP-405 exam dumps formats make it comfortable for every CWNP CWAP-405 test applicant to study according to his objectives. Users can download a free CWAP-405 demo to evaluate the formats of our CWAP-405 Practice Exam material before purchasing. Three CWAP-405 exam questions formats that we have are CWAP-405 dumps PDF format, web-based CWAP-405 practice exam and desktop-based CWAP-405 practice test software.
