We have not only experienced industries elites who compile the high-quality products but also professional IT staff to develop three formats of our PCNSE study guide and the fast shopping environment. Buyers can enjoy free-worry shopping experience. Besides we provide one year free updates of our PCNSE training braindump and service warranty for buyers. With our PCNSE exam questions, your success is guaranteed.

Exam Details and Topics

The certification test is delivered through the official exam administrator, Pearson VUE. The candidates for the test can expect 75 questions to be completed within 80 minutes. The questions cover different formats, including matching, scenario-based with graphics, and multiple choice. The PCNSE exam is available in two languages: English and Japanese. The individuals should possess product competence as well as a good understanding of the unique areas of the product portfolio of Palo Alto Networks and know how to appropriately deploy at least one of them.

Palo Alto Networks PCNSE Certification is a valuable certification for individuals looking to advance their careers in network security. Palo Alto Networks Certified Network Security Engineer Exam certification validates the individual's skills and knowledge in deploying, configuring, and managing Palo Alto Networks security solutions using the PAN-OS 10.0 operating system. Palo Alto Networks Certified Network Security Engineer Exam certification is recognized globally and can lead to higher salaries and better job opportunities.

Palo Alto Networks Certified Network Security Engineer Exam Sample Questions (Q265-Q270):

NEW QUESTION # 265

Which protocol is natively supported by GlobalProtect Clientless VPN?

- A. RDP
- **B. HTTPS**
- C. SSH
- D. HTP

Answer: B

NEW QUESTION # 266

An administrator wants to upgrade a firewall HA pair to PAN-OS 10.1. The firewalls are currently running PAN-OS 8.1.17. Which upgrade path maintains synchronization of the HA session (and prevents network outage)?

- **A. Upgrade two major versions at a time**
- B. Upgrade one major version at a time
- C. Upgrade the HA pair to a base image
- D. Upgrade directly to the target major version

Answer: A

NEW QUESTION # 267

An administrator wants to configure the Palo Alto Networks Windows User-D agent to map IP addresses to users. The company uses four Microsoft Active Directory servers and two Microsoft Exchange servers, which can provide logs for login events. All six servers have IP addresses assigned from the following subnet: 192.168.28.32/27. The Microsoft Active Directory servers reside in 192.168.28.22/28, and the Microsoft Exchange servers reside in 192.168.28.48/28. What is the best configuration for the User-D agent?

- A. network 192.168.28.32/27 with server type Microsoft
- **B. the IP-address and corresponding server type (Microsoft Active Directory or Microsoft Exchange) for each of the six servers**
- C. one IP address of a Microsoft Active Directory server and "Auto Discover" enabled to automatically obtain all five of the other servers
- D. network 192.168.28.32/28 with server type Microsoft Active Directory and network 192.168.28.40/28 Exchange

Answer: B

NEW QUESTION # 268

Which new PAN-OS 11.0 feature supports IPv6 traffic?

- A. IKEv1
- B. OSPF
- C. DHCPv6 Client with Prefix Delegation
- D. DHCP Server

Answer: C

Explanation:

Explanation

According to the Palo Alto Networks documentation, DHCPv6 Client with Prefix Delegation is a new feature in PAN-OS 11.0 that supports IPv6 traffic. This feature allows configuring an interface as a DHCPv6 client with prefix delegation, which enables the interface to obtain an IPv6 prefix from a DHCPv6 server and assign IPv6 addresses to other interfaces on the firewall or downstream devices. Therefore, the correct answer is A.

The other options are not new features in PAN-OS 11.0 that support IPv6 traffic:

OSPF: This option is not a new feature in PAN-OS 11.0. OSPF is a routing protocol that supports both IPv4 and IPv6 traffic. It has been supported by PAN-OS since version 4.12.

DHCP Server: This option is not a new feature in PAN-OS 11.0. DHCP Server is a feature that allows the firewall to act as a DHCP server and assign IP addresses to clients. It supports both IPv4 and IPv6 traffic. It has been supported by PAN-OS since version 5.0

IKEv1: This option is not a new feature in PAN-OS 11.0. IKEv1 is a protocol that supports both IPv4 and IPv6 traffic for establishing VPN tunnels. It has been supported by PAN-OS since version 3.04.

NEW QUESTION # 269

A client wants to detect the use of weak and manufacturer-default passwords for IoT devices.

Which option will help the customer?

- A. Configure a Vulnerability Protection profile with alert mode
- B. Configure a Data Filtering profile with alert mode.
- C. Configure an Anti-Spyware profile with alert mode.
- D. Configure an Antivirus profile with alert mode.

Answer: A
