

600덤프를 추천해드립니다. ExamPassdump의Microsoft인증 PL-600덤프는 거의 모든 시험문제를 커버하고 있어 시험 패스율이 100%입니다. ExamPassdump제품을 선택하시면 어려운 시험공부도 한결 가벼워집니다.

PL-600 시험은 솔루션 아키텍트, 기능 컨설턴트, 개발자 및 Microsoft Power 플랫폼에서 일한 경험이있는 IT 전문가를위한 것입니다. 이 시험은 비즈니스 요구 사항을 충족하고 다른 시스템 및 플랫폼과 통합하며 전력 플랫폼의 전체 기능을 활용하는 솔루션을 설계하고 구현하는 능력을 측정합니다. 성공적인 후보자는 이해 관계자에게 지침 및 권장 사항을 제공하고, 비즈니스 요구 사항을 기술 솔루션으로 번역하며, 전력 플랫폼 솔루션의 성능 및 확장성을 최적화할 수 있습니다.

## 최신 Microsoft Certified PL-600 무료 샘플문제 (Q176-Q181):

### 질문 # 176

Case Study 2 - Relecloud

Background

Relecloud provides regional air service in North America. The company uses a variety of systems, apps, and services to manage the business. You are hired to design a new solution to manage passenger information, reservations, and maintenance.

Current environment

The company uses Microsoft Office 365.

The company has a custom app for managing and tracking passenger luggage. The app uses Microsoft Dataverse.

For flights longer than four hours, passengers receive a meal. Customers can select a meal when they make a reservation and can save the meal choices as a customer preference.

The company offers two types of meals: standard and vegetarian. Meal types can be temporarily unavailable. The airline is considering offering other meal types, such as gluten-free and low- sodium options.

The company uses paper-based reservation checklists to help ensure that all the steps for a reservation are complete.

The company uses vendors to service aircraft.

Environment

Ensure that employees can sign in to all Microsoft apps by using one set of credentials per employee.

Minimize the use of third-party products and custom development.

Reduce customer support call volumes by having the system automatically resolve common issues.

The security rule for agents must contain the privileges in the default Customer Service Representative security role.

Log issues as cases. The case form must show variable sections based on the case type.

Include a custom entity named Seats and grant agents access to the entity.

Application use layout should be role specific.

Agents

You must standardize the format used by agents to enter customer phone numbers.

Agents need a solution to replace paper reservation checklists.

Agents need dashboards to show a current count of all reservations on the entity.

Agents need a way to track reservation issues.

Agents need a visual indicator in the interface to determine the reservation step to provide a seamless customer experience.

Agents need different versions of cancellation policies to send customers. One version must be controllable within the system.

Agents need to view which pieces of luggage match to each passenger, and then need to add the total on the passenger record.

IT

IT staff needs a mobile solution to see IT cases at the top of the menu since this is their primary focus.

IT staff needs a system that is easy to navigate to active cases.

IT specialists want to design Power BI reports. They need to understand the underlying table relationships of the system.

IT specialists need a solution that is visual rather than text-based so they can quickly complete their tasks.

Management

Management requires paginated reports for stakeholders.

Management wants to provide frequent flyers with better service when the flyers call.

Managers need to see all customer dashboards at the top of their menu on their mobile device.

Maintenance

Maintenance supervisors must not have access to Dynamics 365 Customer Service. The supervisors must be able to communicate with the contracts team about contracts.

Aircraft maintenance vendors must have only view and upload privileges to their invoices and receipts.

Contracts with maintenance companies must be stored in Dynamics 365 Customer Service.

You need to provide the IT team and managers with a mobile solution.

How many apps should you recommend?

- A. one app for all employees of the team
- B. one app for each job role
- C. one app for each team of employees

- D. one app for each user

정답: B

설명:

Scenario: IT staff needs a mobile solution to see IT cases at the top of the menu since this is their primary focus. Managers need to see all customer dashboards at the top of their menu on their mobile device.

**질문 # 177**

You design a Power Platform solution for a customer. The solution uses Microsoft Dataverse as the data store.

You are managing the go-live process for the solution.

The customer reports the following performance issues:

\* Form load time is much slower than it was during testing.

\* Overall system performance has been significantly slower than it was during testing.

You need to recommend how to troubleshoot system performance.

Which actions should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Performance issue	Action
Slow form load times	<ul style="list-style-type: none"> <li>Review workflows associated with the form events.</li> <li>Review QuickFind properties for the fields on the form.</li> <li>Review the fields that are on the form.</li> </ul>
Overall slow system performance	<ul style="list-style-type: none"> <li>Change all security roles from global read permissions to business unit permissions.</li> <li>Review one to many relationships to verify whether cascade settings are necessary.</li> <li>Change security roles from global read access to business unit to provide better performance.</li> </ul>

정답:

설명:

Performance issue	Action
Slow form load times	<ul style="list-style-type: none"> <li>Review workflows associated with the form events.</li> <li>Review QuickFind properties for the fields on the form.</li> <li>Review the fields that are on the form.</li> </ul>
Overall slow system performance	<ul style="list-style-type: none"> <li>Change all security roles from global read permissions to business unit permissions.</li> <li>Review one to many relationships to verify whether cascade settings are necessary.</li> <li>Change security roles from global read access to business unit to provide better performance.</li> </ul>

Explanation:

Performance issue	Action
Slow form load times	<ul style="list-style-type: none"> <li>Review workflows associated with the form events.</li> <li>Review QuickFind properties for the fields on the form.</li> <li>Review the fields that are on the form.</li> </ul>
Overall slow system performance	<ul style="list-style-type: none"> <li>Change all security roles from global read permissions to business unit permissions.</li> <li>Review one to many relationships to verify whether cascade settings are necessary.</li> <li>Change security roles from global read access to business unit to provide better performance.</li> </ul>

Box 1: Review the fields that are on the form

Keep the number of table columns (fields) to a minimum.

The more table columns (formerly referred to as fields) you have in a form, the more data that needs to be downloaded to view each record.

Box 2: Review one to many relationships to verify whether cascade settings are necessary.

**질문 # 178**

**Drag and Drop Question**

You are a Microsoft Power Platform solution architect capturing requirements for a national retail chain project.

The project has the following requirements:

- Retail employees must use the application on a company-provided tablet device.
- The app must store data offline.
- Environment capacity must be monitored to ensure usage stays within 80 percent of available capacity.
- Apps are shared with security group teams for users to access.

You need to identify the project's functional and non-functional requirements.

How should you categorize the requirements? To answer, drag the appropriate categories to the correct requirements. Each category may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**정답:**

**설명:**

**질문 # 179**

A company plans to implement a model-driven app. The company has the following requirements:

- \* Short Message Service (SMS) data must be visible on the model-driven app timeline.
- \* Store location data must be referenced from a SQL server database.
- \* Customer data must be audited and only edited by specific users.

You need to recommend the table type for each requirement.

Which table types should you recommend? To answer, drag the appropriate solutions to the correct requirements. Each solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**정답:**

**설명:**

**Solutions**

**Explanation:**

**Solutions**

**Answer Area**

**Requirement**

- SMS data
- Store location data
- Customer data

**Solution**

**Answer Area**

**Requirement**

- SMS data
- Store location data
- Customer data

**Solution**

**질문 # 180**

You need to recommend technology for accessing historical job placement data. What should you recommend?

- A. Power Virtual Agents chatbots
- B. Power BI
- **C. Virtual tables**
- D. Power Automate flows

**정답: C**

**설명:**

A virtual table is a custom table in Microsoft Dataverse that has columns containing data from an external data source. Virtual tables appear in your app to users as regular table rows, but contain data that is sourced from an external database, such as an Azure SQL Database. Rows based on virtual tables are available in all clients including custom clients developed using the Dataverse web services.

**Scenario:**

- \* First Up uses an on-premises system to manage current and historical patient data including medications and medical visits.
- \* The company plans to reference historical data in the existing system. The records held in these systems will not be migrated to the new solution except for medication information.
- \* The solution must provide a worker appointment booking system that can access worker historical job placement data.
- \* First Up staff members must be able to view and update worker records. They must be able to see current and historical job placement data on the same form in the new solution.
