GH-900 Antworten, GH-900 Tests

Die Revolution unserer Zeit ist ganz rasch. Wir sollen uns nicht passiv darauf umstellen, sondern damit aktiv Schritt halten. Wenn Sie Entscheidung treffen, an der Microsoft GH-900 Prüfung teilzunehmen bedeutet, dass Sie eine nach besseren Berufschancen strebende Person. Wir ZertFragen wollen den Personen wie Sie helfen, das Ziel zu erreichen. Die neueste und umfassendste Prüfungsunterlagen der Microsoft GH-900 von uns können allen Ihrer Bedürfnissen der Vorbereitung der Microsoft GH-900 anpassen.

Microsoft GH-900 Prüfungsplan:

Thema	Einzelheiten
Thema 1	• Privacy, Security, and Administration: This domain measures skills of Security Administrators and Organization Managers in securing and administering GitHub environments. It covers ensuring repository security through branch protection rules, using security tools like Dependabot, managing access and permissions at repository and organization levels, creating and managing organizations, setting up organization-level security, and overseeing teams and members.
Thema 2	• Benefits of the GitHub Community: This section targets Community Managers and Open Source Contributors, focusing on engaging with the GitHub community. Candidates learn to participate in open source projects, utilize GitHub Discussions for collaboration and support, and contribute meaningfully to community-driven projects.

Thema 3	• Modern Development: This domain assesses abilities of DevOps Engineers and Continuous Integration Specialists in implementing modern development practices. It emphasizes understanding DevOps principles and leveraging GitHub Actions for automation and CI • CD pipeline implementation. Candidates also learn GitHub's tools and best practices for conducting and managing code reviews.

Microsoft GitHub Foundations GH-900 Prüfungsfragen mit Lösungen (Q23-Q28):

23. Frage

The difference between GitHub Desktop and github.com is that Desktop:

- A. Is a self-hosted version of GitHub.
- B. Enables integration with office suite applications.
- C. Is only available on Windows operating systems.
- **D. Offers a graphical user interface.**
- E. Is a standalone software application.

Antwort: D

Begründung:

GitHub Desktop is a standalone application that provides a graphical user interface (GUI) for interacting with GitHub repositories, as opposed to the command-line or web-based interfaces available on github.com.

Graphical User Interface:

Option D is correct because GitHub Desktop offers a GUI, making it easier for users to manage repositories, perform commits, and handle other Git-related tasks without needing to use the command line.

24. Frage

From the list of projects for an organization, how can a user identify a GitHub Projects template?

- A. View the contents in the .github/projects folder.
- B. Check the "show template" checkbox.
- C. Use the "is" filter in the search text box.
- **D. Select the Templates tab.**

Antwort: D

Begründung:

In GitHub, when viewing the list of projects for an organization, a user can identify a GitHub Projects template by selecting the Templates tab. This tab specifically lists available templates that can be used to create new projects based on predefined structures and workflows.

25. Frage

Which of the following describes a branch in Git?

- A. A new repository that shares code with the original "upstream" repository
- B. A physical copy of the entire project stored on disk
- **C. A separate, isolated copy of the project's codebase**
- D. A pointer to an identical snapshot of the project at a specific point in time

Antwort: C

Begründung:

In Git, a branch is a fundamental concept that represents an independent line of development within a project. Here's a more detailed explanation:

Branch in Git:

Option C is correct because a branch in Git is essentially a separate, isolated copy of the project's codebase where you can make changes without affecting the main codebase. Branches allow developers to work on features, fixes, or experiments in parallel to the main project.

Other Options:

Option A is incorrect because while a branch does point to a specific commit (which represents a snapshot of the project), the description lacks the emphasis on the isolated and parallel development aspect that is critical to the understanding of branches.

Option B is incorrect because a branch is not a physical copy stored on disk; it is a logical reference within the repository.

Option D is incorrect because that description better fits the concept of a fork, not a branch. A fork is a new repository that is a copy of another repository, usually used to contribute back to the original ("upstream") repository.

26. Frage

Which of the following are included as pre-defined repository roles?

(Each answer presents a complete solution. Choose three.)

- A. Triage
- B. Security
- C. Delete
- D. Maintain
- E. View
- F. Write

Antwort: A,D,F

Begründung:

GitHub provides several pre-defined repository roles that determine the level of access and permissions a user has within a repository. The roles that are included by default are:

Triage: Allows users to manage issues and pull requests without write access to the code.

Maintain: Provides more extensive access, including managing settings, but without full administrative control.

Write: Grants permission to push changes and manage issues and pull requests.

Roles like "Security" and "Delete" are not standard pre-defined roles, and "View" is generally referred to as "Read" in GitHub's permission structure.

27. Frage

How can a user choose to receive ongoing updates about a specific activity on GitHub.com?

- A. By customizing the types of notifications you will receive in the future
- B. By automatically watching all repositories you have push access to
- C. By upgrading from a free to a paid account
- D. By subscribing to notifications for all activity in a repository

Antwort: D

Begründung:

On GitHub, you can choose to receive ongoing updates about specific activities by subscribing to notifications for all activity in a repository. This allows you to stay informed about all changes, discussions, and updates related to a particular project. Additionally, GitHub provides the ability to customize notifications to suit your preferences.

28. Frage

.....

Mit der Hilfe von ZertFragen brauchen Sie nicht so viel Geld für die Kurse oder viel Zeit und Energie für die Prüfung auszugeben. Sie können ganz einfach die Microsoft GH-900 (GitHub Foundations)Prüfung erfolgreich ablegen. Die Software zur Microsoft GH-900 Zertifizierungsprüfung wird ZertFragen nach den echten Prüfungen in den letzten Jahren erforscht. Die Fragen und Antworten zur Microsoft GH-900 Zertifizierungsprüfung von ZertFragen sind den realen Fragen und Antworten sehr ähnlich.
