

SY0-701 Study Braindumps Make You Pass SY0-701 Exam Fluently - Dumps4PDF

BONUS!!! Download part of Dumps4PDF SY0-701 dumps for free: <https://drive.google.com/open?id=1DdyFZSLy0IQfnf2QK9yIdmbeYW3HF5fY>

If you would like to use all kinds of electronic devices to prepare for the SY0-701 exam, with the online app version of our SY0-701 study materials, you can just feel free to practice the questions in our SY0-701 training materials no matter you are using your mobile phone, personal computer, or tablet PC. In addition, another strong point of the online app version is that it is convenient for you to use even though you are in offline environment. In other words, you can prepare for your SY0-701 Exam with under the guidance of our SY0-701 training materials anywhere at any time.

We update our CompTIA SY0-701 exam dumps over time and mark the changes online. Enroll in the CompTIA SY0-701 exam dumps and start your preparation with CompTIA SY0-701 practice questions. We will provide you with the information covered in the current test and incorporate materials that originate from CompTIA SY0-701 Exam Dumps. You will get a handful of knowledge about topics that will benefit your professional career.

Latest CompTIA SY0-701 Test Vce - SY0-701 Current Exam Content

before making a choice, you can download a trial version of SY0-701 preparation materials. After you use it, you will have a more complete understanding of this SY0-701 exam questions. In this way, you can use our SY0-701 study materials in a way that suits your needs and professional opinions. We hope you will have a great experience with SY0-701 Preparation materials. At the same time, we also hope that you can realize your dreams with our help. We will be honored.

CompTIA SY0-701 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Threats, Vulnerabilities, and Mitigations: In this topic, you'll find discussions comparing threat actors and motivations, explaining common threat vectors and attack surfaces, and outlining different types of vulnerabilities. Moreover, the topic focuses on analyzing indicators of malicious activity in scenarios and exploring mitigation techniques used to secure enterprises against threats.
Topic 2	<ul style="list-style-type: none"> Security Operations: This topic delves into applying common security techniques to computing resources, addressing security implications of proper hardware, software, and data asset management, managing vulnerabilities effectively, and explaining security alerting and monitoring concepts. It also discusses enhancing enterprise capabilities for security, implementing identity and access management, and utilizing automation and orchestration for secure operations.

Topic 3	<ul style="list-style-type: none"> • Security Program Management and Oversight: Finally, this topic discusses elements of effective security governance, the risk management process, third-party risk assessment, and management processes. Additionally, the topic focuses on security compliance requirements, types and purposes of audits and assessments, and implementing security awareness practices in various scenarios.
Topic 4	<ul style="list-style-type: none"> • General Security Concepts: This topic covers various types of security controls, fundamental security concepts, the importance of change management processes in security, and the significance of using suitable cryptographic solutions.
Topic 5	<ul style="list-style-type: none"> • Security Architecture: Here, you'll learn about security implications across different architecture models, applying security principles to secure enterprise infrastructure in scenarios, and comparing data protection concepts and strategies. The topic also delves into the importance of resilience and recovery in security architecture.

CompTIA Security+ Certification Exam Sample Questions (Q811-Q816):

NEW QUESTION # 811

A security team is setting up a new environment for hosting the organization's on-premises software application as a cloud-based service. Which of the following should the team ensure is in place in order for the organization to follow security best practices?

- **A. Visualization and isolation of resources**
- B. Network segmentation
- C. Data encryption
- D. Strong authentication policies

Answer: A

Explanation:

When hosting an on-premises software application in a cloud-based service, ensuring visualization and isolation of resources is crucial for maintaining security best practices. This involves using virtualization techniques to create isolated environments (e.g., virtual machines or containers) for different applications and services, reducing the risk of cross-tenant attacks or resource leakage.

* Network segmentation is important but pertains more to securing network traffic rather than isolating computing resources.

* Data encryption is also essential but doesn't specifically address resource isolation in a cloud environment.

* Strong authentication policies are critical for access control but do not address the need for isolating resources within the cloud environment.

NEW QUESTION # 812

A systems administrator discovers a system that is no longer receiving support from the vendor. However, this system and its environment are critical to running the business, cannot be modified, and must stay online. Which of the following risk treatments is the most appropriate in this situation?

- A. Refect
- B. Avoid
- **C. Transfer**
- D. Accept

Answer: C

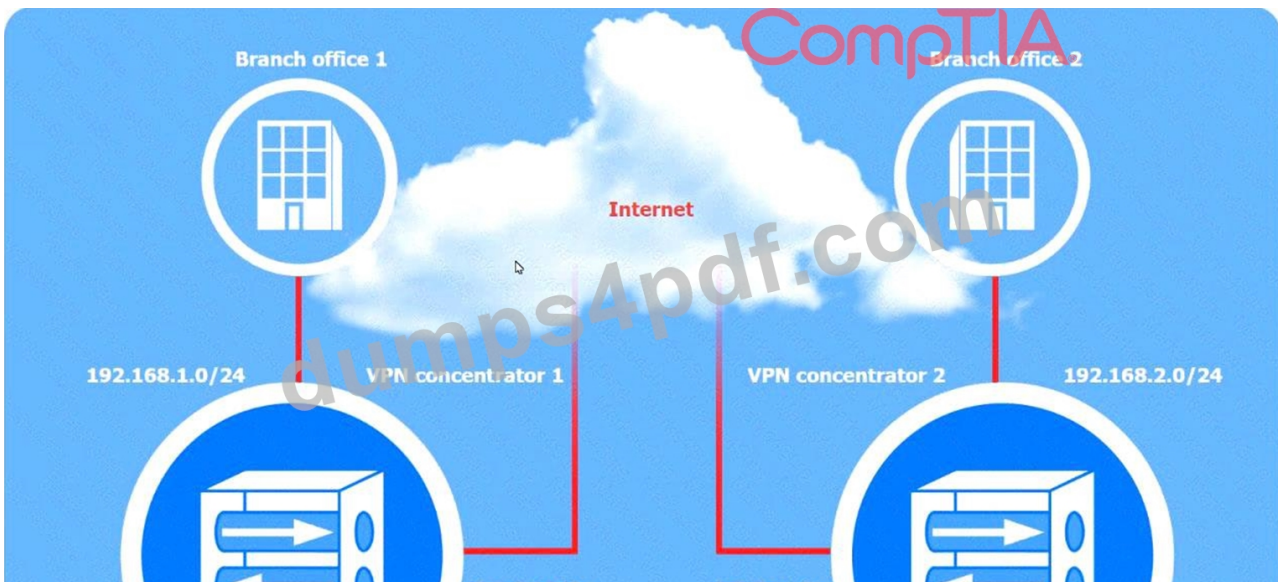

NEW QUESTION # 813

A systems administrator is configuring a site-to-site VPN between two branch offices. Some of the settings have already been configured correctly. The systems administrator has been provided the following requirements as part of completing the configuration:

* Most secure algorithms should be selected

* All traffic should be encrypted over the VPN

* A secret password will be used to authenticate the two VPN concentrators

VPN Concentrator 1

Phase 1 | Phase 2

Peer IP address:

Auth method:

Negotiation mode:

Encryption algorithm:

Hash algorithm:

DH key group:

VPN Concentrator 1

Phase 1 | Phase 2

Mode: Tunnel

Protocol: ESP

Encryption algorithm: AES256

Hash algorithm: SHA256

Local network/mask: 192.168.1.0/24

Remote network/mask: 192.168.2.0/24

Reset to Default Save Close

VPN Concentrator 2

Phase 1 | Phase 2

Peer IP address: 5.5.5.10

Auth method: PSK

Negotiation mode: MAIN

Encryption algorithm: AES256

Hash algorithm: SHA256

DH key group: 14

Reset to Default Save Close

Answer:

Explanation:

See the Explanation part for all the Solution.

Explanation:

To configure the site-to-site VPN between the two branch offices according to the provided requirements, here are the detailed steps and settings that need to be applied to the VPN concentrators:

Requirements:

- * Most secure algorithms should be selected.
- * All traffic should be encrypted over the VPN.
- * A secret password will be used to authenticate the two VPN concentrators.

VPN Concentrator 1 Configuration:

Phase 1:

- * Peer IP address: 5.5.5.10 (The IP address of VPN Concentrator 2)
- * Auth method: PSK (Pre-Shared Key)
- * Negotiation mode: MAIN
- * Encryption algorithm: AES256
- * Hash algorithm: SHA256
- * DH key group: 14

Phase 2:

- * Mode: Tunnel
- * Protocol: ESP (Encapsulating Security Payload)
- * Encryption algorithm: AES256
- * Hash algorithm: SHA256
- * Local network/mask: 192.168.1.0/24
- * Remote network/mask: 192.168.2.0/24

VPN Concentrator 2 Configuration:

Phase 1:

- * Peer IP address: 5.5.5.5 (The IP address of VPN Concentrator 1)
- * Auth method: PSK (Pre-Shared Key)
- * Negotiation mode: MAIN
- * Encryption algorithm: AES256
- * Hash algorithm: SHA256
- * DH key group: 14

Phase 2:

- * Mode: Tunnel
- * Protocol: ESP (Encapsulating Security Payload)
- * Encryption algorithm: AES256
- * Hash algorithm: SHA256
- * Local network/mask: 192.168.2.0/24
- * Remote network/mask: 192.168.1.0/24

Summary:

- * Peer IP Address: Set to the IP address of the remote VPN concentrator.
 - * Auth Method: PSK for using a pre-shared key.
 - * Negotiation Mode: MAIN for the initial setup.
 - * Encryption Algorithm: AES256, which is a strong and secure algorithm.
 - * Hash Algorithm: SHA256, which provides strong hashing.
 - * DH Key Group: 14 for strong Diffie-Hellman key exchange.
 - * Phase 2 Protocol: ESP for encryption and integrity.
 - * Local and Remote Networks: Properly configure the local and remote network addresses to match each branch office subnet.
- By configuring these settings on both VPN concentrators, the site-to-site VPN will meet the requirements for strong security algorithms, encryption of all traffic, and authentication using a pre-shared key.

NEW QUESTION # 814

A penetration tester finds an unused Ethernet port during an on-site penetration test. Upon plugging a device into the unused port, the penetration tester notices that the machine is assigned an IP address, allowing the tester to enumerate the local network. Which of the following should an administrator implement in order to prevent this situation from happening in the future?

- A. Transport Layer Security
- B. Port security
- C. Proxy server
- D. Security zones

Answer: B

NEW QUESTION # 815

A forensic engineer determines that the root cause of a compromise is a SQL injection attack. Which of the following should the engineer review to identify the command used by the threat actor?

- A. Metadata
- B. System log
- C. Netflow log
- D. Application log

Answer: D

Explanation:

To identify the exact command or input used during a SQL injection attack, the application log is the most relevant. It records inputs, errors, and processing activities within the application layer.

NEW QUESTION # 816

.....

Dumps4PDF provides the most up-to-date CompTIA Security+ Certification Exam SY0-701 exam questions and practice material to assist you in preparing for the CompTIA SY0-701 exam. Our CompTIA Security+ Certification Exam SY0-701 exam questions preparation material helps countless people worldwide in becoming certified professionals. Our CompTIA Security+ Certification Exam SY0-701 Exam Questions are available in three simple formats, allowing customers to select the most appropriate option according to their needs.
