## New 305-300 Exam Practice, 305-300 Certification Sample Questions

The VCEngine is committed to helping you crack the Lpi 305-300 certification exam on the first attempt. To get this objective we offer the most probable, real, and updated Lpi LPIC-3 Exam 305: Virtualization and Containerization exam dumps in three user-friendly formats. These formats of LPIC-3 Exam 305: Virtualization and Containerization in Procurement and Supply Lpi updated practice material are, LPIC-3 Exam 305: Virtualization and Containerization 305-300 in Procurement and Supply Lpi PDF file, desktop Lpi 305-300 practice test software, and Lpi 305-300 web-based practice test.

Lpi 305-300 exam is part of the LPIC-3 certification program, which is a professional certification for Linux experts. 305-300 exam focuses on virtualization and containerization, which are essential skills for any Linux professional. The LPIC-3 certification program is designed to validate advanced skills and knowledge in Linux administration, and passing the 305-300 Exam is one of the requirements for achieving this certification.

## Lpi LPIC-3 Exam 305: Virtualization and Containerization Sample Questions (Q117-Q122):

### NEW QUESTION # 117

If a Dockerfile contains the following lines:

```
WORKDIR /
```

```
RUN cd /tmp
```

```
RUN echo test > test
```

where is the file test located?

- A. /tmp/test within the container image.
- **B. /test within the container image.**
- C. /root/test within the container image.
- D. /tmp/test on the system running docker build.
- E. test in the directory holding the Dockerfile.

**Answer: B**

Explanation:

Explanation

The WORKDIR instruction sets the working directory for any subsequent RUN, CMD, ENTRYPOINT, COPY and ADD instructions that follow it in the Dockerfile<sup>1</sup>. The RUN instruction executes commands in a new layer on top of the current image and commits the results<sup>2</sup>. The RUN cd command does not change the working directory for the next RUN instruction, because each RUN command runs in a new shell and a new environment<sup>3</sup>. Therefore, the file test is created in the root directory (/) of the container image, not in the /tmp directory. References:

\* Dockerfile reference: WORKDIR

\* Dockerfile reference: RUN

\* difference between RUN cd and WORKDIR in Dockerfile

### NEW QUESTION # 118

FILL BLANK

What LXC command lists containers sorted by their CPU, block I/O or memory consumption? (Specify ONLY the command without any path or parameters.)

**Answer:**

Explanation:

lxc-top

### NEW QUESTION # 119

Which of the following statements are true about container-based virtualization? (Choose two.)

- A. Container-based virtualization relies on hardware support from the host system's CPU.
- **B. Different containers may use different distributions of the same operating system.**
- C. Each container runs its own operating system kernel.
- **D. All containers run within the operating system kernel of the host system.**
- E. Linux does not support container-based virtualization because of missing kernel APIs.

**Answer: B,D**

### NEW QUESTION # 120

FILL BLANK

What is the default path to the Docker daemon configuration file on Linux? (Specify the full name of the file, including path.)

**Answer:**

Explanation:

/etc/docker/daemon.json

Explanation:

The default path to the Docker daemon configuration file on Linux is /etc/docker/daemon.json. This file is a JSON file that contains the settings and options for the Docker daemon, which is the service that runs on the host operating system and manages the containers, images, networks, and other Docker resources. The /etc

/docker/daemon.json file does not exist by default, but it can be created by the user to customize the Docker daemon behavior. The file can also be specified by using the --config-file flag when starting the Docker daemon. The file must be a valid JSON object and follow the syntax and structure of the dockerd reference docs<sup>12</sup>. References:

- \* Docker daemon configuration file - Medium<sup>3</sup>
- \* Docker daemon configuration overview | Docker Docs<sup>4</sup>
- \* docker daemon | Docker Docs<sup>5</sup>

### NEW QUESTION # 121

Which of the following services can QEMU provide in a user network? (Choose three.)

- A. AppleTalk
- B. DHCP
- C. CIFS
- D. TFTP
- E. BGP

**Answer: B,C,D**

### NEW QUESTION # 122

.....

We attach importance to candidates' needs and develop the 305-300 useful test files from the perspective of candidates, and we sincerely hope that you can succeed with the help of our practice materials. Our aim is to let customers spend less time to get the maximum return. By choosing our 305-300 study guide, you only need to spend a total of 20-30 hours to deal with exam, because our 305-300 Study Guide is highly targeted and compiled according to the syllabus to meet the requirements of the exam. As long as you follow the pace of our 305-300 useful test files, you will certainly have unexpected results.
