

Latest 3V0-23.25 Exam Materials & Pass 3V0-23.25 Exam

P.S. Free 2026 VMware 3V0-23.25 dumps are available on Google Drive shared by BraindumpStudy:
<https://drive.google.com/open?id=1hEq95kWbOc4RDnEfkbSowGQnhaMuU8Br>

If you want to get a comprehensive idea about our real 3V0-23.25 study materials. It is convenient for you to download the free demo, all you need to do is just to find the “Download for free” item, and you will find there are three kinds of versions of 3V0-23.25 learning guide for you to choose from namely, PDF Version Demo, PC Test Engine and Online Test Engine, you can choose to download any one version of our 3V0-23.25 exam questions as you like.

Our company never sets many restrictions to the 3V0-23.25 exam question. Once you pay for our study materials, our system will automatically send you an email which includes the installation packages. You can conserve the 3V0-23.25 real exam dumps after you have downloaded on your disk or documents. Whenever it is possible, you can begin your study as long as there has a computer. In addition, all installed 3V0-23.25 study tool can be used normally. In a sense, our 3V0-23.25 Real Exam dumps equal a mobile learning device. We are not just thinking about making money. Your convenience and demands also deserve our deep consideration. At the same time, your property rights never expire once you have paid for money. So the 3V0-23.25 study tool can be reused after you have got the 3V0-23.25 certificate. You can donate it to your classmates or friends. They will thank you so much.

Pass VMware 3V0-23.25 Exam & 3V0-23.25 Valid Test Sample

The three versions of our 3V0-23.25 exam questions are PDF & Software & APP version for your information. Each one has its indispensable favor respectively. All 3V0-23.25 training engine can cater to each type of exam candidates' preferences. Our 3V0-

23.25 practice materials call for accuracy legibility and high quality, so 3V0-23.25 study braindumps are good sellers and worth recommendation for their excellent quality.

VMware Advanced VMware Cloud Foundation 9.0 Storage Sample Questions (Q76-Q81):

NEW QUESTION # 76

A Storage Administrator uses the Ruby vSphere Console (RVC) to diagnose a massive host isolation event in a vSAN ESA cluster.
...

```
[RVC Output: vsan.cluster_info ~cluster]
Host: esx-04
Network Status: Partitioned (Isolated)
CMMDS Master: Self (Partition Group size: 1)
...
```

esx-04 has completely lost vSAN network connectivity (an effective internal APD for its remote replicas). How do the vSphere HA "Host Isolation Response" and the vSAN "Inaccessible Object" mechanics fuse to handle the Virtual Machines currently running on the isolated host esx-04? (Select all that apply.)

- A. The surviving cluster (which has the CMMDS Master and Quorum) detects that esx-04 is dead, and the vSphere HA Master on the surviving side initiates the boot-up sequence to restart the VMs.
- B. esx-04 is isolated. It cannot see the rest of the cluster (no quorum). The vSAN DOM on esx-04 immediately marks all VM storage objects as "Inaccessible", freezing the VMs to prevent split-brain.
- C. If vSphere HA "Host Isolation Response" is set to "Power Off and Restart VMs", esx-04 will forcibly terminate its local frozen VMs.
- D. esx-04 continues to run the VMs normally using only local storage cache, entering a "degraded active" mode.
- E. RVC automatically generates a PDL condition on the remaining hosts to wipe the duplicate data.

Answer: A,B,C

NEW QUESTION # 77

A Compliance Auditor is reviewing the Site Recovery Manager (SRM) Disaster Recovery plan encoded in YAML for a VCF 9.0 implementation.

The environment uses standard vSphere Replication (not Stretched Clustering) to protect workloads between the Primary and Secondary vSAN domains.
...

```
# SRM Protection Group: Financial-Tier1
name: "Fin-PG-01"
replication_type: "vSphere_Replication"
datastores:
- source: "vsanDatastore-Primary"
target: "vsanDatastore-DR"
storage_policy_mapping:
- source_policy: "FTT=1 (RAID-1)"
target_policy: "FTT=2 (RAID-6)"
...
```

How does the target_policy specification interact with the vSAN Distributed Object Manager (DOM) during the actual SRM failover event?

- A. The configuration is invalid; SRM requires identical policies at both the source and target sites to maintain the replication checksums.
- B. SRM ignores the target_policy because vSphere Replication automatically clones the identical physical geometry of the source vSAN datastore to the target site.
- C. The target policy forces the secondary site to convert the vSAN datastore into a standard VMFS volume to accept the incoming replicated data stream.
- D. During the failover, the Secondary vCenter provisions the recovered VMDKs directly onto the "vsanDatastore-DR" using the "FTT=2 (RAID-6)" rule, ensuring the data is instantly protected by local erasure coding upon boot.

Answer: D

NEW QUESTION # 78

An L3 Support Engineer is configuring a VCF 9.0 vSAN Stretched Cluster. The cluster includes two sites (Preferred and Secondary).

The goal is to ensure Tier-1 database VMs strictly run on the Preferred Site during normal operations, but gracefully failover to the Secondary Site if the Preferred Site burns down.

The engineer uses Ruby vSphere Console (RVC) to check cluster state while configuring vSphere DRS.

...

[RVC Output: vsan.stretchedcluster_config]

Preferred Site: esx-01, esx-02, esx-03

Secondary Site: esx-04, esx-05, esx-06

...

Which TWO configurations MUST the engineer apply to the DRS Host/VM Groups to satisfy this DR requirement? (Choose 2.)

- A. The engineer must map the DRS VM groups directly to the vSAN Unicast Agent tables via CLI.
- B. The engineer must create a DRS "Host Group" containing ONLY the Preferred Site hosts (esx-01 through esx-03).
- C. The engineer must apply a "SHOULD run on hosts in group" DRS rule; this keeps the VMs on the Preferred site normally, but allows vSphere HA to violate the rule and restart them on the Secondary site during a total site failure.
- D. The engineer must apply a "MUST run on hosts in group" DRS rule for the VMs; "MUST" ensures that HA can strictly map the IPs during failover.
- E. The engineer must disable DRS Automation (set to Manual) to prevent VMs from accidentally moving to the Secondary site during daytime high CPU loads.

Answer: B,C

NEW QUESTION # 79

A Solutions Architect is calculating the network bandwidth saturation for a specific VMDK under heavy write load in a vSAN ESA cluster. The available Top-of-Rack switch throughput is limited to 25 GbE.

The VM generates 500 MB/s of raw write data.

The architect evaluates two different Storage Policies applied to this specific VM:

...

[SPBM Configuration Options]

Policy A: Failures To Tolerate: 1 (RAID-1 Mirroring)

Policy B: Failures To Tolerate: 1 (RAID-5 Erasure Coding)

...

How do these different SPBM policies directly alter the actual "on-the-wire" network traffic profile for vSAN, and what is the impact on the 25 GbE fabric? (Select all that apply.)

- A. Both policies consume zero network bandwidth for reads when the "Site Locality" feature is enabled.
- B. Policy B (RAID-5) significantly reduces the network bandwidth multiplier compared to RAID-1, because the erasure coding algorithm spreads parity overhead (1.33x) rather than duplicating the full dataset.
- C. Switching from Policy A to Policy B doubles the network traffic overhead because RAID-5 requires a 4th parity node.
- D. vSAN ESA compresses the data BEFORE it leaves the host (DOM Client level); therefore, if the VM generates highly compressible data (e.g., 2:1 ratio), Policy B will only push ~332 MB/s across the network, preserving the 25 GbE switch buffers.
- E. Policy A (RAID-1) generates 1000 MB/s of total backend network traffic (a 2.0x multiplier) because the DOM Client must simultaneously send the 500 MB/s data payload to both Mirror 1 and Mirror 2 across the network.

Answer: B,D,E

NEW QUESTION # 80

A CTO is evaluating storage options for a VCF 9.0 Workload Domain that will host a massive 2 Petabyte medical imaging archive. The applications accessing this archive require minimal compute resources (e.g., just four standard 16-vCPU web servers).

...

[Customer Requirement]

Capacity: 2,000 TB (2 PB)

Compute: 64 vCPU total (Peak)

Cost Constraint: Minimize software licensing CapEx.

Which statement justifies the selection of an external SAN/NAS solution over a pure vSAN ESA HCI cluster for this specific use case?

- A. VCF explicitly prohibits using vSAN for HIPAA-regulated medical workloads, forcing customers to use external arrays with physical tape backup integration.
- B. vSAN ESA has a hard cluster limit of 1 Petabyte of raw capacity, making it technically impossible to host this medical archive.
- **C. An external NAS can host the 2 PB archive while connected to a small 3-node ESXi cluster, whereas vSAN HCI would force the purchase of 20+ fully licensed "compute-heavy" vSAN ReadyNodes just to acquire the physical drive bays.**
- D. Medical imaging requires object-based metadata, which traditional NFS NAS systems provide natively, whereas vSAN strictly provides block-only VMDK storage.

Answer: C

NEW QUESTION # 81

Every detail of our 3V0-23.25 exam guide is going through professional evaluation and test. Other workers are also dedicated to their jobs. Even the proofreading works of the 3V0-23.25 study materials are complex and difficult. They still attentively accomplish their tasks. Please have a try and give us an opportunity. Our 3V0-23.25 Preparation guide will totally amaze you and bring you good luck. And it deserves you to have a try!

Pass 3V0-23.25 Exam: https://www.braindumpstudy.com/3V0-23.25_braindumps.html

Not enough valid 3V0-23.25 learning materials, will bring many inconvenience to the user, such as delay learning progress, reduce the learning efficiency eventually lead to the user's study achievement was not significant, these are not conducive to the user pass exam, therefore, in order to solve these problems, our 3V0-23.25 study materials will do a complete summarize and precision of summary analysis, VMware Latest 3V0-23.25 Exam Materials What's more, after your exam, you will find the questions almost mirror the real test.

The Problem, Better Defined, Jonathan Grant examines the trends and urges the shedding of old shibboleths in order to embrace a new future, Not enough valid 3V0-23.25 learning materials, will bring many inconvenience to the user, such as delay learning progress, reduce the learning efficiency eventually lead to the user's study achievement was not significant, these are not conducive to the user pass exam, therefore, in order to solve these problems, our 3V0-23.25 Study Materials will do a complete summarize and precision of summary analysis.

Newest Latest 3V0-23.25 Exam Materials – Pass 3V0-23.25 First Attempt

What's more, after your exam, you will find the questions almost mirror the real test, The appropriate selection for the training of 3V0-23.25 test is a guarantee of success.

The page of our 3V0-23.25 simulating materials provides demo which are sample questions, Time is constant development, and proposition experts will set questions of real 3V0-23.25 exam continuously according to the progress of the society change tendency of proposition, and consciously highlight the hot issues and policy changes.
