It must be your best tool to pass your exam and achieve your target.

SAP E-S4CPE-2405 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Configuration and the SAP Fiori Launchpad: This section of the exam measures skills of application consultants and covers configuring SAP solutions to meet business needs, along with setting up and managing the SAP Fiori Launchpad. It also touches on customizing the user interface for an optimal and user-friendly experience.
Topic 2	<ul style="list-style-type: none">• System Landscapes and Identity Access Management: This section of the exam measures skills of system administrators and focuses on designing and managing SAP system landscapes while ensuring secure and efficient identity access management. It includes concepts related to system environments, user authentication, and authorization controls.
Topic 3	<ul style="list-style-type: none">• Data Migration and Business Process Testing: This section of the exam measures skills of SAP implementation consultants and covers the core principles of migrating data into SAP systems while ensuring that business processes run as intended. It involves understanding the methods for transferring data, verifying its accuracy, and executing process testing to confirm that the system meets operational requirements.

SAP Certified Specialist - Implementation Consultant - SAP S/4HANA Cloud Private Edition Sample Questions (Q53-Q58):

NEW QUESTION # 53

You are assessing an SAP Fiori app within a standard business process.

Which questions need to be addressed before you finalize the business process for the customer? Note: There are 2 correct answers to this question.

- A. Does the app need any enhancement?
- B. Is in-app extensibility sufficient?
- C. Does the app require simplification?
- D. Does a classic SAP GUI transaction exist?

Answer: A,B

NEW QUESTION # 54

Which of the following are responsibility definitions in responsibility management? Note: There are 2 correct answers to this question.

- A. Strategic purchasing
- B. Material group L002
- C. Operational purchaser
- D. Purchasing group 002

Answer: A,C

NEW QUESTION # 55

When do you specify the data retention period in the SAP S/4HANA Migration Cockpit?

- A. When the project status is Not Started
- B. When the project status is Completed
- C. When the project status is Finished
- D. When the project status is In Progress

Answer: C

Explanation:

In the SAP S/4HANA Migration Cockpit, the data retention period specifies how long temporary migration data is retained in the system after the migration process is completed. You set this retention period when the project status is Finished. At this stage, all migration activities are complete, and you can define how long the system should keep the temporary data before it is automatically deleted.

Option A: When the project status is In Progress

This option is incorrect. While the project is in progress, migration activities are ongoing, and setting the data retention period at this stage is premature.

Option B: When the project status is Not Started

This option is incorrect. Before the project starts, it's too early to define the data retention period, as migration tasks have not yet commenced.

Option D: When the project status is Completed

This option is incorrect. The correct status for setting the data retention period is "Finished," not "Completed." In summary, you specify the data retention period in the SAP S/4HANA Migration Cockpit when the project status is Finished, ensuring that temporary migration data is retained for an appropriate duration after migration activities are concluded.

NEW QUESTION # 56

You are preparing for an SAP S/4HANA Cloud Private Edition implementation project. What do you find in the Roadmap Viewer?

Note: There are 2 correct answers to this question.

- A. Tasks and deliverables to complete each phase
- B. Solution process setup instructions
- C. Clean Core quality gates
- D. Business process flows

Answer: A,C

Explanation:

The Roadmap Viewer is a tool that provides structured guidance for SAP implementation projects, including SAP S/4HANA Cloud Private Edition. It offers detailed information on tasks, deliverables, and quality gates throughout the project phases.

Option A: Business process flows

This option is incorrect. While the Roadmap Viewer provides guidance on implementation tasks, detailed business process flows are typically found in other SAP documentation or modeling tools.

Option B: Solution process setup instructions

This option is incorrect. Specific setup instructions are usually provided in configuration guides or the SAP Best Practices Explorer, not primarily in the Roadmap Viewer.

Option C: Tasks and deliverables to complete each phase

This option is correct. The Roadmap Viewer outlines the tasks and deliverables required in each phase of the implementation project, helping teams manage and track progress effectively.

Option D: Clean Core quality gates

This option is correct. The Roadmap Viewer includes quality gates, such as the Clean Core principle, to ensure that customizations do not hinder future upgrades and maintain system integrity.

In summary, the Roadmap Viewer provides comprehensive guidance on tasks, deliverables, and quality gates, including Clean Core principles, essential for the successful implementation of SAP S/4HANA Cloud Private Edition.

NEW QUESTION # 57

How should an implementation consultant customize SAP Best Practices business processes?

- A. Make edits to the original process
- B. Use SAP Signavio Process Manager to edit the process
- C. Use SAP Cloud ALM to edit the process
- D. Make a copy of the original process and edit the copy

Answer: D
