

NCP-US Valid Dumps & NCP-US Exam Details

P.S. Free 2026 Nutanix NCP-US dumps are available on Google Drive shared by ITexamReview: <https://drive.google.com/open?id=18Ciz0sJXcnJZOuYHMMW297sVaTq6bn5-H>

Do you want to pass NCP-US practice test in your first attempt with less time? Then you can try our latest training certification exam materials. We not only provide you valid NCP-US exam answers for your well preparation, but also bring guaranteed success results to you. The NCP-US pass review written by our IT professionals is the best solution for passing the technical and complex certification exam.

After you used ITexamReview Nutanix NCP-US Dumps, you still fail in NCP-US test and then you will get FULL REFUND. This is ITexamReview's commitment to all candidates. What's more, the excellent dumps can stand the test rather than just talk about it. ITexamReview test dumps can completely stand the test of time. ITexamReview present accomplishment results from practice of all candidates. Because it is right and reliable, after a long time, ITexamReview exam dumps are becoming increasingly popular.

NCP-US Exam Details - NCP-US Valid Study Materials

The Nutanix NCP-US web-based practice test software is very user-friendly and simple to use. It is accessible on all browsers (Chrome, Firefox, MS Edge, Safari, Opera, etc). It will save your progress and give a report of your mistakes which will surely be beneficial for your overall NCP-US Exam Preparation.

Nutanix Certified Professional - Unified Storage v6.5 Sample Questions (Q98-Q103):

NEW QUESTION # 98

An administrator is deploying File Analytics. The following subnets are available:

CVM subnet: 10.1.1.0/24

AHV subnet: 10.1.2.0/24

Nutanix Files client network: 10.1.3.0/24

Nutanix Files storage network: 10.1.4.0/24

The administrator has reserved 10.1.4.100 as the File Analytics IP. However, the deployment fails with the error shown: "Error creating volume group, please check logs for more details."

What action must the administrator take to successfully deploy File Analytics?

- A. Allow port 445 in the firewall.
- **B. Re-deploy File Analytics on the Files client network.**
- C. Re-deploy File Analytics on the Files storage network.
- D. Allow port 139 in the firewall.

Answer: B

NEW QUESTION # 99

What is the network requirement for a File Analytics deployment?

- **A. Must use the Client-side network**
- B. Must use the CVM network
- C. Must use the Backplane network
- D. Must use the Storage-side network

Answer: A

NEW QUESTION # 100

Which two network requirements must an administrator take into consideration for a new scale-out Files cluster when configuring and defining separate client and storage networks? (Choose two.)

- **A. Ensure there is one IP address available for the storage network.**
- B. Ensure there is one IP address available for client network.
- **C. The client and storage networks must have different subnets.**
- D. Ensure the client and storage networks use a tagged VLAN.

Answer: A,C

Explanation:

These are two essential requirements that an administrator must take into consideration when configuring separate client and storage networks.

these are some of the network requirements that an administrator must take into consideration for a new scale-out Files cluster when configuring and defining separate client and storage networks:

The client and storage networks must have different subnets¹². This is because FSVMs use IP addresses from both networks, so they must be distinct to avoid conflicts.

Ensure there are enough IP addresses available for both networks¹². This is because each FSVM requires one IP address from each network, plus one virtual IP address (VIP) per network per cluster. For example, if you have a three-node cluster with three FSVMs, you need six IP addresses for the client network (three for FSVMs and three for VIPs) and six IP addresses for the storage network (three for FSVMs and three for VIPs).

Ensure the client and storage networks use tagged VLANs if they share physical interfaces¹. This is because VLAN tagging allows multiple logical networks to coexist on a single physical interface without interfering with each other.

Ensure there are no firewall rules or port blocking that prevent communication between clients, FSVMs, CVMs and Prism Element¹. This is because Nutanix Files uses various ports for different protocols and services such as SMB, NFS, NTP, DNS etc.

NEW QUESTION # 101

What is the minimum number of AHV nodes in a cluster required to use Objects?

- A. 0
- B. 1
- C. 2
- **D. 3**

Answer: D

NEW QUESTION # 102

After migrating to Files for a company's user home directories, the administrator started receiving complaints that accessing certain files results in long wait times before the file is even opened or an access denied error message after four minutes. Upon further investigation, the administrator has determined that the files in question are very large audio and video files. Which two actions should the administrator take to mitigate this issue? (Choose two.)

- A. Enable the "Scan on Write" option and increase resources for the ICAP server.
- **B. Uncheck the "Block access to files if scan cannot be completed (recommended)" option in the ICAP settings for the Files cluster.**
- **C. Add the extensions of the affected file types to the ICAP's Exclude File Types field in the ICAP settings for the Files cluster.**
- D. Enable the "Scan on Read" option and decrease resources for the ICAP server.

Answer: B,C

NEW QUESTION # 103

.....

It is similar to the NCP-US desktop-based software, with all the elements of the desktop practice exam. This mock exam can be accessed from any browser and does not require installation. The Nutanix NCP-US questions in the mock test are the same as those in the real exam. And candidates will be able to take the web-based Nutanix NCP-US Practice Test immediately through any operating system and browsers.
