Reliable MB-820 Test Dumps & MB-820 Valid Exam Online

ITexamReview field is leaping up day by day and more people are pursuing it as a career than ever. Due to these reasons, candidates find it difficult to land their dream job and often face difficulty in finding the right career opportunities. But to overcome this issue, the MB-820 Exam is introduced by Microsoft that provides candidates with a sustainable platform to examine their true capabilities and surf through their desired opportunities.

Microsoft Dynamics 365 Business Central Developer Sample Questions (Q39-Q44):

NEW QUESTION # 39

- A. Option D
- **B. Option C**
- C. ☐
- D. ☐
- E. Option E
- F. Option B
- **G. ☐**
- H. ☐
- I. Option A
- J. ☐

Answer: B,G

NEW QUESTION # 40

A company plans to customize its per tenant extension reports. The company has the following requirements for the customization:

- * Child data items must not be displayed on the request page for some master detail reports.
- * Selecting key filter fields takes users too much time. The customization must decrease the amount of time to select the fields.

You need to optimize the report request page.

Which actions should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

☐

Answer:

Explanation:

☐

NEW QUESTION # 41

A company plans to integrate tests with its build pipelines.

The company has two Docket sandbox environments: SandboxA and SandboxB.

You observe the following:

- * SandboxA is configured without the Test Toolkit installed.
- * SandboxB must be configured from scratch. The Test Toolkit must be installed in SandboxB during configuration.

You need to configure the sandbox environments.

How should you complete the cmdlets? To answer, select the appropriate options in the answer area.

☐

Answer:

Explanation:

□ Explanation:

Based on the PowerShell script snippet you've provided and the scenario described, you need to configure Docker sandbox environments for a company with specific requirements for Test Toolkit installations.

For SandboxA, since it is configured without the Test Toolkit installed, you would typically use the PowerShell cmdlet `Install-TestToolkitToBcContainer` to install the Test Toolkit into the Business Central Docker container.

For SandboxB, which must be configured from scratch with the Test Toolkit installed during configuration, you would include the Test Toolkit as part of the `New-BcContainer` script block that creates the container.

The relevant cmdlets and parameters for SandboxB would include:

- * `-includeTestToolkit`: This parameter ensures that the Test Toolkit is included during the creation of the new container.

Given the limited context from the image, here's how you should complete the cmdlets for SandboxB:

- * Add `-includeTestToolkit` in the `New-BcContainer` script to ensure the Test Toolkit is installed when creating SandboxB.

- * Since you are setting up SandboxB from scratch, you don't need to run `Install-TestToolkitToBcContainer` separately as the toolkit will be included at the time of container creation with the `-includeTestToolkit` parameter.

For the `New-BcContainer` cmdlet, you would fill in the placeholders with the appropriate values for `artifactUrl`, `imageName`, and `licenseFile` if they are required for your specific setup.

NEW QUESTION # 42

You develop a table named Contoso Setup and a page.

You plan to use No. Series to automatically assign a unique number to data entries. You set up No. Series on the Vendor Nos. field of the Contoso Setup table.

You need to apply the No. Series Design Pattern to the trigger `OnInsert()`.

Which four code segments should you use to develop the solution? To answer, move the appropriate code segments from the list of code segments to the answer area and arrange them in the correct order.

Answer:

Explanation:

□ Explanation:

To properly apply the No. Series Design Pattern in the `OnInsert()` trigger, the correct sequence of actions should be as follows:

- * `ContosoSetup.Get();`

- * First, retrieve the Contoso Setup record using the Get method. This ensures that the necessary setup information is available, including the No. Series.

- * `if "No." = "" then begin`

- * Next, check if the No. field is empty. If it is, a new number from the No. Series should be assigned.

- * `NoSeriesManagement.InitSeries(ContosoSetup."Vendor Nos.", "No. Series", 0D, "No.", "No. Series");`

- * Call the `InitSeries` function to assign a new number from the No. Series. This initializes the No. Series for the Vendor Nos. field.

- * `ContosoSetup.TestField("Vendor Nos.");`

- * Lastly, ensure that the Vendor Nos. field is populated and valid by calling `TestField`.

Correct Order for Code Segments:

- * `ContosoSetup.Get();`

- * `if "No." = "" then begin`

- * `NoSeriesManagement.InitSeries(ContosoSetup."Vendor Nos.", "No. Series", 0D, "No.", "No. Series");`

- * `ContosoSetup.TestField("Vendor Nos.");`

NEW QUESTION # 43

You need to create the code related to the Subcontract Documents table to meet the requirement for the quality department.

How should you complete the code segment? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:
