Study 350-701 Center & 350-701 Valid Dumps Demo

As is known to us, there are three different versions about our 350-701 guide torrent, including the PDF version, the online version and the software version. The experts from our company designed the three different versions of 350-701 test torrent with different functions. According to the different function of the three versions, you have the chance to choose the most suitable version of our 350-701 study torrent. For instance, if you want to print the 350-701 study materials, you can download the PDF version which supports printing. By the PDF version, you can print the 350-701 guide torrent which is useful for you.

Cisco 350-701 Exam Certification Details:

Exam Name	Implementing and Operating Cisco Security Core Technologies
Number of Questions	90-110
Exam Price	$400 USD
Passing Score	Variable (750-850 / 1000 Approx.)
Recommended Training	Implementing and Operating Cisco Security Core Technologies (SCOR)
Exam Registration	PEARSON VUE
Duration	120 minutes

Cisco 350-701 Certification Exam, also known as Implementing and Operating Cisco Security Core Technologies, is designed to test the knowledge and skills of IT professionals in the field of network security. 350-701 exam is aimed at those individuals who want to validate their expertise in implementing and operating core security technologies, such as network security, cloud security, endpoint protection, secure network access, visibility and enforcement, and more.

Cisco 350-701 exam is a computer-based test that consists of 90-110 questions. 350-701 exam format includes multiple-choice questions, drag-and-drop questions, and simulation-based questions. The candidate needs to complete the exam within 120 minutes, and the passing score is 825 out of 1000 points.

Free PDF 2026 Cisco 350-701 Unparalleled Study Center

The Cisco 350-701 certification is one of the hottest career advancement credentials in the modern Cisco world. The 350-701 certification can help you to demonstrate your expertise and knowledge level. With only one badge of 350-701 certification, successful candidates can advance their careers and increase their earning potential. The Cisco 350-701 Certification Exam also enables you to stay updated and competitive in the market which will help you to gain more career opportunities.

Cisco Implementing and Operating Cisco Security Core Technologies Sample Questions (Q267-Q272):

NEW QUESTION # 267
Refer to the exhibit.

```
Gateway of last resort is 1.1.1.1 to network 0.0.0.0

S*    0.0.0.0 0.0.0.0 [1/0] via 1.1.1.1, outside
C         1.1.1.0 255.255.255.0 is directly connect, outside
S         172.16.0.0 255.255.0.0 [1/0] via 192.168.100.1, inside
C         192.168.100.0 255.255.255.0 is directly connected, inside
C         172.16.10.0 255.255.255.0 is directly connected, dmz
S         10.10.10.0 255.255.255.0 [1/0] via 172.16.10.1, dmz

access-list redirect-acl permit ip 192.168.100.0 255.255.255.0 any
access-list redirect-acl permit ip 172.16.0.0 255.255.0.0 any

class-map redirect-class
 match access-list redirect-acl

policy-map inside-policy
 class redirect-class
 sfr fail-open

service-policy inside-policy global
```
What is a result of the configuration?

- A. Traffic from the inside network is redirected
- B. Traffic from the inside and DMZ networks is redirected
- C. Traffic from the DMZ network is redirected
- D. All TCP traffic is redirected

Answer: B

Explanation:
Reference:

NEW QUESTION # 268
An engineer enabled SSL decryption for Cisco Umbrella intelligent proxy and needs to ensure that traffic is inspected without alerting end-users.

- A. Restrict access to only websites with trusted third-party signed certificates.
- B. Upload the organization root CA to the Umbrella admin portal
- C. Import the Umbrella root CA into the trusted root store on the user's device.
- D. Modify the user's browser settings to suppress errors from Umbrella.

Answer: C

Explanation:
SSL decryption allows the intelligent proxy to inspect traffic over HTTPS. Some websites may use self-signed certificates or certificates that are not trusted by the user's device. This may cause the browser to display a warning or an error message when accessing those websites through the intelligent proxy. To avoid this, the user's device needs to trust the Umbrella root CA, which is the certificate authority that signs the certificates for the websites that are proxied by Umbrella. By importing the Umbrella root CA into the trusted root store on the user's device, the browser will recognize the certificates as valid and will not alert the end-users12. NEW QUESTION # 269
What can be integrated with Cisco Threat Intelligence Director to provide information about security threats, which allows the SOC to proactively automate responses to those threats?

- A. Cisco Stealthwatch
- B. Cisco Umbrella
- C. Cisco Threat Grid
- D. External Threat Feeds

Answer: C

Explanation:
Explanation Cisco Threat Intelligence Director (CTID) can be integrated with existing Threat Intelligence Platforms deployed by your organization to ingest threat intelligence automatically. Reference: https://blogs.cisco.com/developer/automate-threat-intelligence-using-cisco-threat-intelligencedirector Cisco Threat Intelligence Director (CTID) can be integrated with existing Threat Intelligence Platforms deployed by your organization to ingest threat intelligence automatically.

NEW QUESTION # 270
Refer to the exhibit.

How does Cisco Umbrella manage traffic that is directed toward risky domains?

- A. Traffic is proximed through the intelligent proxy.
- B. Traffic is managed by the application settings, unhandled and allowed.
- C. Traffic is managed by the security settings and blocked.
- D. Traffic is allowed but logged.

Answer: A

Explanation:
Cisco Umbrella is a cloud-delivered and SaaS-based solution that provides DNS-layer security and web filtering for internet traffic. It blocks requests to malicious domains or IPs before a connection is even established, and logs and inspects all web traffic for greater transparency, control, and protection1.
However, not all domains or IPs are clearly malicious or benign. Some of them may be risky, meaning that they host both legitimate

and malicious content, or that they have a low reputation score based on various factors. For these domains or IPs, Cisco Umbrella offers the option to proxy the traffic through the intelligent proxy, which is a selective web proxy that performs deeper inspection and analysis of the web content2.

The intelligent proxy can apply URL filtering, file inspection, and file type control to the proxied traffic, and block or allow it based on the policy settings. The intelligent proxy can also leverage Cisco Advanced Malware Protection (AMP) and antivirus engines to scan files for malware and threats3.

Therefore, by using the intelligent proxy, Cisco Umbrella can manage traffic that is directed toward risky domains more effectively, and provide an additional layer of security and visibility for the organization.

NEW QUESTION # 271

For Cisco IOS PKI, which two types of Servers are used as a distribution point for CRLs? (Choose two)

- A. SDP
- B. HTTP
- C. SCP
- D. LDAP
- E. subordinate CA

Answer: B,D

Explanation:
Cisco IOS public key infrastructure (PKI) provides certificate management to support security protocols such as IP Security (IPSec), secure shell (SSH), and secure socket layer (SSL). This module identifies and describes concepts that are needed to understand, plan for, and implement a PKI. A PKI is composed of the following entities: ... - A distribution mechanism (such as Lightweight Directory Access Protocol [LDAP] or HTTP) for certificate revocation lists (CRLs) Reference: https://www.cisco.com/c/en/us/td/docs/ios-xml/ios/sec_conn_pki/configuration/15-mt/sec-pki-15-mtbook/sec-pki-overview.html A PKI is composed of the following entities: ...
