C-ACDET-2506 Downloadable PDF | Reliable C-ACDET-2506 Exam Simulations
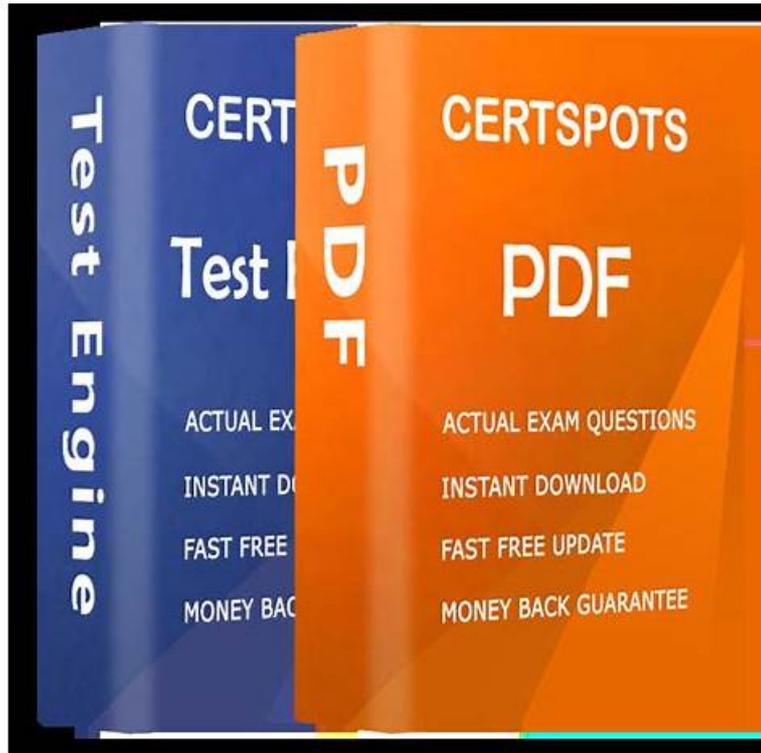

As is known to us, there are best sale and after-sale service of the C-ACDET-2506 study materials all over the world in our company. Our company has employed a lot of excellent experts and professors in the field in the past years, in order to design the best and most suitable C-ACDET-2506 study materials for all customers. More importantly, it is evident to all that the C-ACDET-2506 study materials from our company have a high quality, and we can make sure that the quality of our products will be higher than other study materials in the market. If you want to pass the C-ACDET-2506 Exam and get the related certification in the shortest time, choosing the C-ACDET-2506 study materials from our company will be in the best interests of all people. We can make sure that it will be very easy for you to pass your exam and get the related certification in the shortest time that beyond your imagination.

SAP C-ACDET-2506 Exam Syllabus Topics:

Topic	Details
Topic 1	• Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.

Topic 2	• Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.
Topic 3	• Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.

Reliable C-ACDET-2506 Exam Simulations, Real C-ACDET-2506 Question

If you are still struggling to prepare for passing C-ACDET-2506 certification exam, at this moment ExamCost can help you solve problem. ExamCost can provide you training materials with good quality to help you pass the exam, then you will become a good SAP C-ACDET-2506 certification member. If you have decided to upgrade yourself by passing SAP Certification C-ACDET-2506 Exam, then choosing ExamCost is not wrong. Our ExamCost promise you that you can pass your first time to participate in the SAP certification C-ACDET-2506 exam and get SAP C-ACDET-2506 certification to enhance and change yourself.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q23-Q28):

NEW QUESTION # 23
While working on editing a field for a customer, you notice that "Editable in full Contract Amendment" is not an option available in the advanced tab of field configuration. What is likely the cause for this behavior?
(Select 2 correct answers)

- A. The contract must be in an amendment state for this option to be visible in customizing.
- B. The field you are customizing is standard and therefore cannot be changed.
- C. The field you are customizing is not in the contract workspace or request classes.
- D. A customization is in flight and needs to be cleared and reset prior to making this change.

Answer: A,C

Explanation:
The "Editable in full Contract Amendment" option in SAP Ariba is available only when the contract is in an amendment status, meaning this option appears contextually when the contract supports amendment workflows. If the contract is not in amendment state, the option remains hidden (A).
Additionally, this option is only relevant for fields that belong to the Contract Workspace or Request field classes; fields outside these classes will not show amendment-specific editability options (C).
The presence or absence of this option is not related to ongoing customizations needing reset (B), nor is it restricted solely to custom or standard fields (D), as standard fields can also have this option if class- applicable.

NEW QUESTION # 24
What is the recommended order of operations for creating a required Flex Master Data (FMD) type field in a project header?

- A. 1. Create the FMD template 2. Load the data 3. Create the FMD type field
- B. 1. Load the data 2. Create the FMD type field 3. Create the FMD template
- C. 1. Create the FMD template 2. Create the FMD type field 3. Load the data
- D. 1. Create the FMD type field 2. Create the FMD template 3. Load the data

Answer: C

Explanation:
The correct order is tofirst create the Flex Master Data (FMD) template, which defines the structure and attributes of the data.
Then,create the FMD type custom fieldin the project header referencing that template.
Finally,load the master data recordsinto the template via CSV import. This sequence ensures the field has a valid template to reference, and data is available when users interact with the field.

NEW QUESTION # 25

A customer requests a dynamic list from CSV. Which field type supports that?

- A. Single-Select Enum
- B. Computed Field
- C. Flex Master Data-based field
- D. Hyperlink

Answer: C

Explanation:
TheFlex Master Data (FMD)-based fieldtype supports dynamic lists sourced fromCSV uploads. FMD fields act like advanced picklists that can contain thousands of values, imported via CSV templates defining the master data structure and entries. These fields are searchable, scalable, and ideal for large or frequently changing datasets.
Single-select enumerations are static lists manually defined and cannot import large CSV datasets. Computed fields calculate values dynamically based on expressions and are not designed for listing selectable values.
Hyperlink fields store URLs, unrelated to selection lists.
FMD fields are the preferred approach when a customer requires large or frequently updated lookup lists in sourcing projects or contracts.

NEW QUESTION # 26

The full SAP Ariba Strategic Sourcing suite baseline (Greenfield baseline scenario) has been applied to the customer Test site. The customer and project team will configure SAP Ariba Sourcing and deploy that to the Production site, then configure and deploy the remaining solutions in stages. What does this mean for subsequent migration activities?

- A. Subsequent migration activities follow Bluefield deployment scenario.
- B. Subsequent migration activities will require a complete reconfiguration of existing solutions.
- C. If the baseline applied the full suite, the full suite must be configured and migrated to production at the same time.
- D. Both SAP Ariba Sourcing as well as subsequent migration activities would be Brownfield deployments.

Answer: D

NEW QUESTION # 27

A migration is performed for a Greenfield deployment to production, and the status of the Template configuration type indicates it failed. What actions do you take to make the failed template(s) available in production?

- A. Request SAP intervention
- B. Import the missing data in production and then import the template in production
- C. The template must always be rebuilt in production
- D. Import the template in production

Answer: B

Explanation:
When template migration fails in Greenfield deployment, it often meansrequired master data like Flex Master Data or enumerations are missing in Production. The recommended resolution is tomanually load the missing master data into Production first, then manually import the failed templates via the Production import tools. Requesting SAP intervention is unnecessary as this is a customer-side activity.
Importing templates without missing data causes repeated failures, and rebuilding templates is not always required if proper data exists.

NEW QUESTION # 28

......

Our website platform has no viruses and you can download C-ACDET-2506 test guide at ease. If you encounter difficulties in installation or use of C-ACDET-2506 exam torrent, we will provide you with remote assistance from a dedicated expert to help you and provide 365 days of free updates that you do not have to worry about what you missed. Whether you are a worker or student, you will save much time to do something whatever you want. It only needs 5-10 minutes after you pay for our C-ACDET-2506 learn torrent that you can learn it to prepare for your exam. Actually, if you can guarantee that your effective learning time with C-ACDET-2506 test preps are up to 20-30 hours, you can pass the exam.
