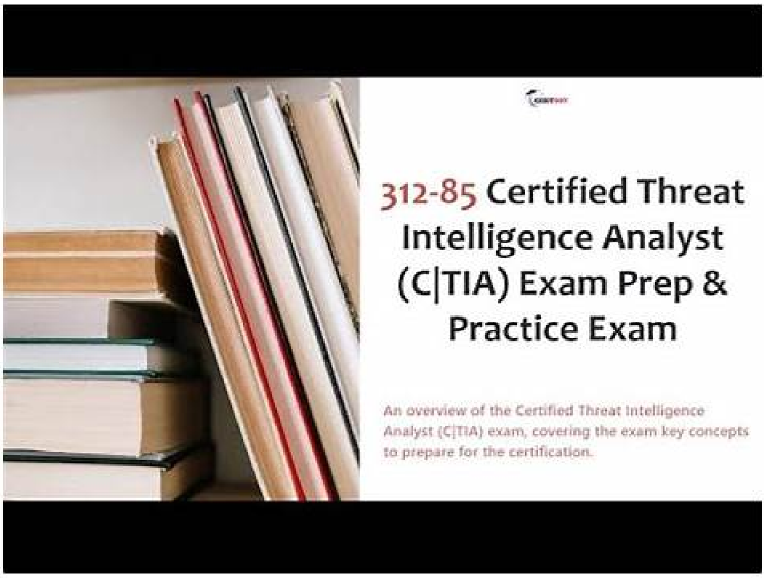
2026 312-85: Latest Certified Threat Intelligence Analyst Test Testking



312-85 Certified Threat Intelligence Analyst (C|TIA) Exam Prep & Practice Exam
An overview of the Certified Threat Intelligence Analyst (C|TIA) exam, covering the exam key concepts to prepare for the certification.

P.S. Free 2026 ECCouncil 312-85 dumps are available on Google Drive shared by ExamcollectionPass: https://drive.google.com/open?id=17ebsi6vWiaU015R4NNfzzA11IrF8N7pO

Our 312-85 prep torrent boosts the highest standards of technical accuracy and only use certificated subject matter and experts. We provide the latest and accurate Certified Threat Intelligence Analyst exam torrent to the client and the questions and the answers we provide are based on the real exam. We can promise to you the passing rate is high and about 98%-100%. Our 312-85 test braindumps also boosts high hit rate and can stimulate the exam to let you have a good preparation for the exam. Our 312-85 prep torrent boost the timing function and the content is easy to be understood and has been simplified the important information. Our 312-85 test braindumps convey more important information with less amount of answers and questions and thus make the learning relaxed and efficient. If you fail in the exam we will refund you immediately. All Certified Threat Intelligence Analyst exam torrent does a lot of help for you to pass the exam easily and successfully.

ECCouncil 312-85: Certified Threat Intelligence Analyst exam is a globally recognized certification that validates the knowledge and skills of professionals in the field of threat intelligence analysis. 312-85 Exam focuses on testing the candidate's ability to gather, analyze and interpret information from various sources and to identify and mitigate threats to an organization's infrastructure.

ECCouncil 312-85: Certified Threat Intelligence Analyst exam is an essential certification for professionals in the cybersecurity industry. Certified Threat Intelligence Analyst certification equips individuals with the skills and knowledge necessary to identify and respond to cyber threats in real-time. Certified Threat Intelligence Analyst certification covers a wide range of topics, including threat intelligence, data analysis, threat modeling, and threat hunting. Certified Threat Intelligence Analyst certification is essential for professionals who are responsible for safeguarding their organization's critical information and data assets.

New 312-85 Test Prep, 312-85 Free Dumps

With 312-85 test guide, you only need a small bag to hold everything you need to learn. In order to make the learning time of the students more flexible, 312-85 exam materials specially launched APP, PDF, and PC three modes. With the APP mode, you can download all the learning information to your mobile phone. In this way, whether you are in the subway, on the road, or even shopping, you can take out your mobile phone for review. 312-85 study braindumps also offer a PDF mode that allows you to print the data onto paper so that you can take notes as you like and help you to memorize your knowledge.

ECCouncil Certified Threat Intelligence Analyst Sample Questions (Q26-Q31):

NEW QUESTION # 26

Cybersol Technologies initiated a cyber-threat intelligence program with a team of threat intelligence analysts.
During the process, the analysts started converting the raw data into useful information by applying various techniques, such as machine-based techniques, and statistical methods.
In which of the following phases of the threat intelligence lifecycle is the threat intelligence team currently working?

- A. Analysis and production
- B. Planning and direction
- C. Dissemination and integration
- D. Processing and exploitation

Answer: D

Explanation:
The phase where threat intelligence analysts convert raw data into useful information by applying various techniques, such as machine learning or statistical methods, is known as 'Processing and Exploitation'. During this phase, collected data is processed, standardized, and analyzed to extract relevant information. This is a critical step in the threat intelligence lifecycle, transforming raw data into a format that can be further analyzed and turned into actionable intelligence in the subsequent 'Analysis and Production' phase.References:
* "Intelligence Analysis for Problem Solvers" by John E. McLaughlin
* "The Cyber Intelligence Tradecraft Project: The State of Cyber Intelligence Practices in the United States (Unclassified Summary)" by the Carnegie Mellon University's Software Engineering Institute

NEW QUESTION # 27

Which of the following characteristics of APT refers to numerous attempts done by the attacker to gain entry to the target's network?

- A. Risk tolerance
- B. Timeliness
- C. Attack origination points
- D. Multiphased

Answer: D

Explanation:
Advanced Persistent Threats (APTs) are characterized by their 'Multiphased' nature, referring to the various stages or phases the attacker undertakes to breach a network, remain undetected, and achieve their objectives.
This characteristic includes numerous attempts to gain entry to the target's network, often starting with reconnaissance, followed by initial compromise, and progressing through stages such as establishment of a backdoor, expansion, data exfiltration, and maintaining persistence. This multiphased approach allows attackers to adapt and pursue their objectives despite potential disruptions or initial failures in their campaign.References:
* "Understanding Advanced Persistent Threats and Complex Malware," by FireEye
* MITRE ATT&CK Framework, detailing the multiphased nature of adversary tactics and techniques

NEW QUESTION # 28

Cybersol Technologies initiated a cyber-threat intelligence program with a team of threat intelligence analysts. During the process, the analysts started converting the raw data into useful information by applying various techniques, such as machine-based techniques, and statistical methods.
In which of the following phases of the threat intelligence lifecycle is the threat intelligence team currently working?

- A. Analysis and production
- B. Planning and direction
- C. Dissemination and integration
- D. Processing and exploitation

Answer: C

NEW QUESTION # 29

Which component of risk management involves evaluating and ranking risks based on their significance, allowing organizations to focus resources on addressing the most critical threats?

- A. Risk assessment
- B. Risk mitigation
- C. Risk identification
- D. Risk prioritization

Answer: D

Explanation:
Risk Prioritization is the process of evaluating and ranking identified risks based on their likelihood, potential impact, and urgency. It helps organizations allocate resources to the most significant threats first.
This step follows risk assessment and ensures that mitigation efforts are aligned with business priorities and risk appetite.
Why the Other Options Are Incorrect:
* A. Risk identification: The initial process of recognizing potential threats or vulnerabilities.
* C. Risk assessment: Involves analyzing the probability and impact of identified risks but does not rank them.
* D. Risk mitigation: Focuses on implementing measures to reduce or eliminate risks after prioritization.
Conclusion:
The activity described-ranking risks by importance to determine response focus-is Risk Prioritization.
Final Answer: B. Risk prioritization
Explanation Reference (Based on CTIA Study Concepts):
CTIA identifies risk prioritization as the step that enables organizations to concentrate on the most severe risks after assessment, ensuring efficient allocation of defensive resources.

NEW QUESTION # 30
John, a professional hacker, is trying to perform APT attack on the target organization network. He gains access to a single system of a target organization and tries to obtain administrative login credentials to gain further access to the systems in the network using various techniques.
What phase of the advanced persistent threat lifecycle is John currently in?

- A. Expansion
- B. Search and exfiltration
- C. Persistence
- D. Initial intrusion

Answer: A

Explanation:
The phase described where John, after gaining initial access, is attempting to obtain administrative credentials to further access systems within the network, is known as the 'Expansion' phase of an Advanced Persistent Threat (APT) lifecycle. This phase involves the attacker expanding their foothold within the target's environment, often by escalating privileges, compromising additional systems, and moving laterally through the network. The goal is to increase control over the network and maintain persistence for ongoing access.
This phase follows the initial intrusion and sets the stage for establishing long-term presence and eventual data exfiltration or other malicious objectives.
