Quiz Workday - Authoritative New Workday-Prism-Analytics Exam Fee

BONUS!!! Download part of TestPassKing Workday-Prism-Analytics dumps for free: https://drive.google.com/open?id=1P-_UAQDn5yG5LkLMEz9u1NNk9Tn6v04Y

We have harmonious cooperation with exam candidates. The relation comes from the excellence of our Workday-Prism-Analytics training materials. We never avoid our responsibility of offering help for exam candidates like you, so choosing our Workday-Prism-Analytics practice dumps means you choose success. Moreover, without the needs of waiting, you can download the Workday-Prism-Analytics Study Guide after paying for it immediately. And we have patient and enthusiastic staff offering help on our Workday-Prism-Analytics learning prep.

Are you still upset about how to pass Workday certification Workday-Prism-Analytics exam? Are you still waiting for the latest information about Workday certification Workday-Prism-Analytics exam? TestPassKing has come up with the latest training material about Workday certification Workday-Prism-Analytics exam. Do you want to pass Workday certification Workday-Prism-Analytics exam easily? Please add TestPassKing's Workday certification Workday-Prism-Analytics exam practice questions and answers to your cart now! TestPassKing has provided part of Workday Certification Workday-Prism-Analytics Exam practice questions and answers for you on www.TestPassKing.com and you can free download as a try. I believe you will be very satisfied with our products. With our products you can easily pass the exam. We promise that if you have used TestPassKing's latest Workday certification Workday-Prism-Analytics exam practice questions and answers exam but fail to pass the exam, TestPassKing will give you a full refund.

Exam Workday-Prism-Analytics Dumps & New Workday-Prism-Analytics Test Notes

We boost a professional expert team to undertake the research and the production of our Workday-Prism-Analytics learning file. We employ the senior lecturers and authorized authors who have published the articles about the test to compile and organize the Workday-Prism-Analytics prep guide dump. Our expert team boosts profound industry experiences and they use their precise logic to verify the test. They provide comprehensive explanation and integral details of the answers and questions. Each question and answer are researched and verified by the industry experts. Our team updates the Workday-Prism-Analytics Certification material periodically and the updates include all the questions in the past thesis and the latest knowledge points. So our service team is professional and top-tanking.

Workday Pro Prism Analytics Exam Sample Questions (Q40-Q45):

NEW QUESTION # 40
You want to import a Workday custom report into the data catalog. You have already enabled it as a web service and enabled it for Prism Analytics. What other configuration is required?

- A. It must be tagged with a Prism Analytics report tag.
- B. It must be imported via sFTP.
- C. It must be shared with or owned by the user importing the report.

- D. It must be built as a matrix report.

Answer: C

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
To import a Workday custom report into the Prism Analytics Data Catalog, specific configurations are required to ensure the report is accessible and usable. According to the official Workday Prism Analytics study path documents, in addition to enabling the report as a web service and enabling it for Prism Analytics, the report must be shared with or owned by the user who is performing the import. This security requirement ensures that only authorized users can access and import the report into the Data Catalog, aligning with Workday's configurable security model. The user must either be the owner of the report or have it shared with them through appropriate security permissions (e.g., via a security group or direct sharing).
The other options are incorrect:
* A. It must be imported via sFTP: Custom reports are imported directly through Workday's web service integration, not via sFTP, which is typically used for file-based data sources.
* B. It must be built as a matrix report: There is no requirement for the report to be a matrix report; Prism Analytics supports various report types, including advanced and simple reports, as long as they are properly configured.
* D. It must be tagged with a Prism Analytics report tag: Tagging is not a mandatory step for importing a report into the Data Catalog, though it may be used for organizational purposes.
Ensuring that the report is shared with or owned by the importing user is a critical step to maintain security and governance during the integration process.

NEW QUESTION # 41
What is a feature of using an sFTP connection on a data change task?

- A. You can select multiple target tables in the data change task.
- B. You can reuse an sFTP connection in multiple data change tasks.
- C. You can import an XLSX file from an sFTP server.
- D. You can copy sFTP connections.

Answer: B

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
In Workday Prism Analytics, a secure File Transfer Protocol (sFTP) connection can be configured as a source for a Data Change task to import data into a table. According to the official Workday Prism Analytics study path documents, a key feature of using an sFTP connection is that it can be reused across multiple Data Change tasks. Once an sFTP connection is defined in the Prism Analytics environment, it is stored and can be selected as the source connection for different Data Change tasks, promoting efficiency and consistency in data ingestion workflows. This reusability reduces the need to redefine connection parameters for each task, streamlining the configuration process.
The other options are not accurate:
* A. You can copy sFTP connections: While connections can be managed, there is no specific feature in Prism Analytics to "copy" sFTP connections as a distinct action.
* C. You can import an XLSX file from an sFTP server: While sFTP connections support various file formats (e.g., CSV), the ability to import XLSX files is not guaranteed and depends on the system's configuration, making this option less definitive.
* D. You can select multiple target tables in the data change task: A Data Change task is designed to load data into a single target table, not multiple tables simultaneously, regardless of the connection type.
The ability to reuse an sFTP connection across multiple Data Change tasks is a core feature that enhances the flexibility and scalability of data import processes in Prism Analytics.

Workday Prism Analytics Study Path Documents, Section: Data Prep and Transformation, Topic: Configuring Data Change Tasks with sFTP Connections Workday Prism Analytics Training Guide, Module: Data Prep and Transformation, Subtopic: Managing Source Connections for Data Ingestion

NEW QUESTION # 42

You have a number of Workday reports that use a Prism data source. When are the values of the Prism calculated fields in the Workday reports calculated?

- A. At dataset creation time.
- B. At time of publishing.
- C. At report run time.
- D. At the calculated field creation time.

Answer: B

NEW QUESTION # 43

You want your derived dataset to only show rows that meet the following criteria: Agent ID is not null AND Location is Dallas OR Location is Montreal. How can you achieve this?

- A. By using Simple Filter conditions.
- B. By adding a Manage Fields stage.
- C. By using Advanced Filter conditions.
- D. By creating a Custom Example.

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, filtering a derived dataset to meet specific criteria involving multiple conditions with mixed logical operators (AND, OR) requires careful configuration. The criteria here are: Agent ID is not null AND (Location is Dallas OR Location is Montreal). According to the official Workday Prism Analytics study path documents, this can be achieved by using Advanced Filter conditions (option C).

A Simple Filter in Prism Analytics allows for basic conditions with a single operator ("If All" for AND, "If Any" for OR), but it cannot handle nested logic like AND combined with OR in a single filter. For example, a Simple Filter with "If All" would require all conditions to be true (Agent ID is not null AND Location is Dallas AND Location is Montreal), which is too restrictive. A Simple Filter with "If Any" would include rows where any condition is true (Agent ID is not null OR Location is Dallas OR Location is Montreal), which is too broad. The Advanced Filter, however, allows for complex expressions with nested logic, such as ISNOTNULL(Agent_ID) AND (Location = "Dallas" OR Location = "Montreal"), ensuring the correct rows are included.

The other options are incorrect:

* A. By adding a Manage Fields stage: The Manage Fields stage modifies field properties (e.g., type, visibility) but does not filter rows based on conditions.

* B. By using Simple Filter conditions: As explained, a Simple Filter cannot handle the combination of AND and OR logic required for this criteria.

* D. By creating a Custom Example: Custom Examples are used to provide sample data for testing, not to filter rows in a dataset.

Using Advanced Filter conditions allows for the precise application of the required logic to filter the dataset accurately.

NEW QUESTION # 44

A Prism data administrator is ready to create a Prism data source. As data is updated in Prism, the goal is to update the data in the Prism data source concurrently, enabling immediate incremental updates. How should the administrator create the Prism data source?

- A. Create a table and select Publish.
- B. Set Data Source Security on a derived dataset and select Publish.
- C. Create a table and select the Enable for Analysis checkbox.
- D. Publish a derived dataset with the Prism: Default to Dataset Access Domain.

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:
In Workday Prism Analytics, creating a Prism data source that supports immediate incremental updates as data is updated in Prism requires a specific configuration. According to the official Workday Prism Analytics study path documents, the administrator should create a table and select the Enable for Analysis checkbox (option A). The "Enable for Analysis" option, when selected during table creation, allows the table to be used directly as a Prism data source with real-time updates. This setting ensures that as data in the table is updated (e.g., through a Data Change task), the changes are immediately reflected in the Prism data source, enabling incremental updates without the need for republishing. This is particularly useful for scenarios requiring near- real-time data availability in reporting or analytics.
The other options do not achieve the goal of immediate incremental updates:
* B. Create a table and select Publish: Publishing a table creates a static Prism data source, but updates to the table require republishing, which does not support immediate incremental updates.
* C. Publish a derived dataset with the Prism: Default to Dataset Access Domain: Publishing a derived dataset creates a data source, but updates to the underlying data require republishing the dataset, which is not concurrent or incremental.
* D. Set Data Source Security on a derived dataset and select Publish: Setting security and publishing a derived dataset follows the same process as option C, requiring republishing for updates, which does not meet the requirement for immediate updates.
Selecting the "Enable for Analysis" checkbox when creating a table ensures the Prism data source supports concurrent, incremental updates as data changes in Prism.
