## EAEP2201 Reliable Test Topics - Quiz Esri Realistic Reliable Enterprise Administration Professional 2201 Exam Dumps

All these three Esri EAEP2201 exam questions formats are easy to use and compatible with all devices, operating systems, and browsers. You can install and run these three EAEP2201 exam practice test questions easily and start Esri EAEP2201 Exam Preparation without wasting further time. The EAEP2201 exam practice questions will ace your Enterprise Administration Professional 2201 EAEP2201 exam preparation and prepare you for the final EAEP2201 exam.

## Esri Enterprise Administration Professional 2201 Sample Questions (Q52-Q57):

### NEW QUESTION # 52

An organization recently upgraded Portal for ArcGIS. The organization must reduce the number of named users to the maximum allowed by the authorization file and delete members in bulk.

Which action should the administrator perform?

- A. Batch delete users with ArcPy
- B. Delete users using the Member tab
- C. Use command line utilities

**Answer: A**

### NEW QUESTION # 53

A GIS administrator is analyzing the usage statistics of ArcGIS Enterprise. The administrator needs to pull tabular statistics on various groups and users about the type of content that they produce and consume.

Which action should the administrator perform?

- A. Run usage reports in Portal for ArcGIS to determine the effect on the organization.
- B. Use ArcGIS Monitor to capture desired information over a period of time in a report.
- C. Open ArcGIS Server statistics to create a report for commonly used items.

**Answer: C**

### NEW QUESTION # 54

A GIS administrator needs to change the ownership of a shared update group to a different user. The administrator receives an error message: "Unable to reassign the group at this time." What is causing this error?

- A. It is not possible to reassign ownership of shared update groups
- B. The sharing settings on the group are configured incorrectly
- C. The user does not have the correct privileges

**Answer: A**

### NEW QUESTION # 55

An organization experiences a temporary loss of service for its ArcGIS Enterprise deployment due to expired licenses.

What should the administrator have done to prevent this issue?

- A. Design an information banner to automatically display the license expiration date
- B. Configure the ArcGIS Enterprise portal to send an automated email when the portal license is expiring
- C. Use the license file in read-only mode to extend the license
- D. Create a Python script to run an administrative report and schedule the script to run regularly

**Answer: D**

Explanation:

ArcGIS Enterprise doesn't currently offer automated license expiration email alerts. However, administrators can use administrative scripts to query license status and generate reports that can be automated using task schedulers (e.g., Windows Task Scheduler).

From Esri guidance:

"Administrators can monitor license status using the ArcGIS REST API or scripting tools. Automating these checks allows timely action before licenses expire."

\* Option A is not a native capability of the portal.

\* Option C is not tied to licensing and is only useful as a passive alert.

\* Option D is not a valid license management option.

### NEW QUESTION # 56

A user must create groups, edit features, and create web apps. This user will also create print layouts, charts, and animations using ArcGIS Pro. The organization has no additional add-on licenses.

Which user type should be configured for this user?

- A. Editor
- **B. GIS Professional**
- C. Creator

**Answer: B**

Explanation:

The GIS Professional user type includes access to ArcGIS Pro, which is required for creating print layouts, charts, animations, and conducting advanced analysis. It also includes capabilities such as creating groups, editing features, and creating web apps within the ArcGIS Enterprise portal—without needing additional add-on licenses.

The `CreatorUser` type supports most web GIS tasks but does not include ArcGIS Pro unless an add-on license is assigned.

The Editor user type is the most limited and is intended for editing existing content only, not for creating or managing groups or web applications.
