#### NEW QUESTION # 82

A marketing developer wants to receive daily report of sends across all business units to be incorporated into their internal dashboard.

What should be done to ensure the report is sent to the director each day?

- **A. Schedule report and email file to the director.**
- B. Schedule report to export as a web page.
- C. A Schedule report and email the link to download.

**Answer: A**

Explanation:

To ensure that a daily report of sends across all business units is sent to the director each day, the marketing developer should schedule the report in Marketing Cloud and configure it to email the file directly to the director. This can be done by setting up a report in Email Studio, defining the parameters and schedule for the report, and specifying the recipient email address. This ensures that the director receives the necessary data in a timely manner without manual intervention.

### NEW QUESTION # 84

A marketer wants to store all the attributes for a triggered send within a data extension.

Which configuration is required when creating the data extension for this triggered send information?

- A. Include Subscriber key and Email address field as primary key.
- **B. Select the 'Use for triggered send' checkbox.**
- C. Create from template and choose triggered Send Data Extension template.

**Answer: B**

Explanation:

When creating a data extension to store all attributes for a triggered send, selecting the 'Use for triggered send' checkbox is essential. This configuration ensures that the data extension is specifically set up to handle triggered sends, enabling it to capture and store the necessary subscriber information and attributes associated with those sends. This setting activates the data extension for use with triggered send activities.
