

DevOps-Foundation echter Test & DevOps-Foundation sicherlich-zu-bestehen & DevOps-Foundation Testguide

2025 Die neuesten Pass4Test DevOps-Foundation PDF-Versionen Prüfungsfragen und DevOps-Foundation Fragen und Antworten sind kostenlos verfügbar: <https://drive.google.com/open?id=1oitewRcNI0uKXrRyz4prNvVK3IXAqbH>

Die Fragenpool zur Peoplecert DevOps-Foundation Zertifizierungsprüfung von Pass4Test hat eine große Ähnlichkeit mit den realen Prüfungen. Sie können in unseren Fragenpool den realen Prüfungsfragen begegnen. Das zeigt die Fähigkeiten unseres Expertenteams. Nun sind viele IT-Fachleute ganz ambitioniert. Sie beteiligen sich an der Peoplecert DevOps-Foundation Zertifizierungsprüfung, um sich den Bedürfnissen des Marktes anzupassen und ihren Traum zu verwirklichen.

Peoplecert DevOps-Foundation Prüfungsplan:

Thema	Einzelheiten
Thema 1	- Automation, Architecting DevOps Toolchains: This section of the exam measures the skills of IT operations specialists and covers key automation principles within the DevOps toolchain. It focuses on CI - CD pipelines, Infrastructure as Code, containerisation, cloud-native architecture, platform engineering, and emerging technologies like Machine Learning and Generative AI in DevOps contexts.
Thema 2	Measurement, Metrics, and Reporting: This section of the exam measures the skills of DevOps engineers and covers metrics that help monitor and evaluate the performance of DevOps practices. Topics include speed, quality, culture, change lead time, cycle time, and the use of dashboards, value-driven metrics, and AIOps in reporting and decision-making.
Thema 3	Key DevOps Practices: This section of the exam measures the skills of DevOps engineers and covers core DevOps practices including Continuous Integration, Continuous Testing, Continuous Delivery, and Continuous Deployment. It explores concepts such as Site Reliability Engineering, DevSecOps, Value Stream Management, Platform Engineering, and modern practices like ChatOps and observability.

Thema 4	• Business and Technology Frameworks: This section of the exam measures the skills of IT operations specialists and covers various supporting frameworks that intersect with DevOps. These include Agile and Lean, IT Service Management, Value Stream Management, Site Reliability Engineering, Safety Culture, Learning Organisations, and Continuous Funding models that enable long-term adaptability.

DevOps-Foundation Schulungsangebot, DevOps-Foundation Testing Engine, PeopleCert DevOps Foundation v3.6 Exam Trainingsunterlagen

IT-Fachleute sind sehr beliebt. Aber die Konkurrenz ist zugleich auch sehr heftig. So beteiligen sich viele IT-Fachleute an der autoritären Peoplecert DevOps-Foundation IT-Zertifizierungsprüfung, um Ihre Position zu konsolidieren. Und unser Pass4Test bietet speziell Bequemlichkeiten für den Peoplecert DevOps-Foundation Kandidaten.

Peoplecert PeopleCert DevOps Foundation v3.6 Exam DevOps-Foundation Prüfungsfragen mit Lösungen (Q24-Q29):

24. Frage

Which of the following would enable an IT organization to consolidate gains from a DevOps pilot?

- A. Hiring new people to expand the DevOps program
- B. Introducing more advanced tools and techniques
- **C. Sharing lessons learned**
- D. Rewarding the people who participated in the pilot

Antwort: C

Begründung:

After a DevOps pilot, consolidating gains requires capturing and sharing lessons learned so that other teams can benefit from successes and avoid repeating mistakes.

This practice supports scaling DevOps practices across the organization by creating a shared knowledge base and promoting continuous improvement.

A(rewards) can motivate but doesn't spread the learning. B(hiring) may expand resources but doesn't ensure knowledge transfer. D(advanced tools) may enhance capability but should come after understanding what worked in the pilot.

Thus, C is the most effective action for consolidating pilot gains.

The DevOps Handbook- Pilot to Organization- Wide Adoption

25. Frage

An organization is finding that defects found in production had frequently already been identified and recorded in testing and staging and sometimes, although they optimized performance locally, they caused global degradation. Upon further inspection, it was found that this was happening because the testing phase was often delayed due to constraints around resource availability, impacting the flow of work from left to right.

Which of The Three Ways should they take for direction on how to resolve the situation?

- A. The Third Way
- B. The Second Way
- C. Continuous Experimentation and Learning
- **D. The First Way**

Antwort: D

Begründung:

When work is delayed due to resource availability or local optimizations causing global degradation, the issue relates to The First Way-maximizing flow from left to right.

Organizations should analyze and remove bottlenecks in the delivery pipeline (e.g., in testing).

Extract-style reference:

"Optimizing the flow of work requires eliminating bottlenecks, delays, and handoffs that slow the movement of changes from development to operations."

-The Phoenix Project

DevOps Foundation courseware discusses value stream mapping and the First Way as critical tools for diagnosing and correcting such issues.

26. Frage

A major retail organization is experiencing declining sales and wants to boost its online business. Teams within Dev and Ops have been independently experimenting with DevOps practices to speed up changes to the company's website but have yet to see tangible benefits.

What can the IT management team do in this situation to achieve bottom-line benefits with DevOps?

- A. Create a shared vision, goals and incentives
- B. Build a high-trust culture
- C. Promote a customer (outside-in) focus
- D. Encourage intelligent risk taking

Antwort: A

Begründung:

When independent Dev and Ops teams adopt DevOps practices without coordination, results are limited.

* The most important action IT management can take is to create a shared vision, goals, and incentives.

* Shared goals align everyone to business outcomes, reduce conflicting priorities, and foster real collaboration.

Why not the others?

* Intelligent risk taking(A) and high-trust culture(C) are important, but without a shared vision, teams won't move in the same direction.

* Customer focus(D) is essential, but won't create cross-team alignment by itself.

Reference/Extract:

"Creating a shared vision and goals across Dev and Ops is critical to breaking down silos and delivering end-to-end value to the business."

-The Phoenix Project, Accelerate, and PeopleCert DevOps Foundation v3.6 Section 3.3

27. Frage

Which of the following could encourage the sharing of tools, knowledge, discoveries and lessons learned between development and operational teams?

- A. Simulations
- B. Common workspaces
- C. Hackathons
- D. All of the above

Antwort: D

Begründung:

PeopleCert outlines multiple methods to encourage sharing and collaboration:

* A: Common workspaces promote informal communication and rapid problem-solving.

* B: Hackathons provide an engaging environment for innovation, cross-functional teamwork, and sharing solutions.

* C: Simulations (e.g., Game Days) allow teams to practice scenarios, learn from each other, and share insights in a low-risk setting. Each of these fosters trust, transparency, and mutual learning. Using them together can amplify cultural change and skill growth.

Thus, D- All of the above- is correct.

References:

PeopleCert DevOps Foundation v3.6 - Collaboration and Sharing Practices The DevOps Handbook- Encouraging Knowledge Sharing

28. Frage

Which of the following sets of skills are essential for a DevOps professional?

- A. Business, Agile, infrastructure, communication
- B. Business, development, cloud and containers, core skills
- C. Business, Agile, ITSM, Lean and networking
- **D. Business, technical, core (soft) skills, self-management**

Antwort: D

Begründung:

A DevOps professional needs:

Business skills: Understanding the business context and value.

Technical skills: Automation, coding, cloud, infrastructure.

Core (soft) skills: Collaboration, communication, empathy, learning.

Self-management: Time, priorities, feedback.

Other options miss the full blend or focus too much on tech or process.

Extract-style reference:

"DevOps success requires a blend of business, technical, and core (soft) skills, as well as the ability to self-manage and continuously learn."

- DevOps Handbook; Accelerate

PeopleCert DevOps Foundation v3.6: Holistic skillsets are emphasized for cross-functional teams.

29. Frage

.....

Wenn Sie die Schulungsunterlagen zur Peoplecert DevOps-Foundation Zertifizierungsprüfung haben, dann werden Sie sicherlich erfolgreich sein. Nachdem Sie unsere Lehrbücher gekauft haben, werden Sie einjährige Aktualisierung kostenlos genießen. Die Bestehensrate von Peoplecert DevOps-Foundation ist 100%. Wenn Sie die Zertifizierungsprüfung nicht bestehen oder die Schulungsunterlagen zur Peoplecert DevOps-Foundation Zertifizierungsprüfung irgend ein Problem haben, geben wir Ihnen eine bedingungslose volle Rückerstattung.
