

# Reliable Study PEGACPRSA22V1 Questions | New PEGACPRSA22V1 Test Simulator

DOWNLOAD the newest PrepAwayPDF PEGACPRSA22V1 PDF dumps from Cloud Storage for free:  
<https://drive.google.com/open?id=1ENyOU4BhsUsEBrgJ1NWYXNiKVtH5NOMS>

You only need 20-30 hours to learn our PEGACPRSA22V1 test torrents and prepare for the exam. After buying our PEGACPRSA22V1 exam questions you only need to spare several hours to learn our PEGACPRSA22V1 test torrents and commit yourselves mainly to the jobs, the family lives and the learning. Our answers and questions of PEGACPRSA22V1 Exam Questions are chosen elaborately and seize the focus of the exam so you can save much time to learn and prepare the exam. Because the passing rate is high as more than 98% you can reassure yourselves to buy our PEGACPRSA22V1 guide torrent.

In some respects, it is a truth that professional certificates can show your capacity in a working environment. If you pay your limited time to practice with our PEGACPRSA22V1 study braindumps, you can learn how to more effectively create value and learn more knowledge the exam want to test for you. We promise it is our common goal to get it and we are trustworthy materials company you cannot miss this time.

## 100% Pass Quiz 2026 Pegasystems - PEGACPRSA22V1 - Reliable Study Certified Pega Robotics System Architect 22 Questions

At the time when people are hesitating about that which kind of PEGACPRSA22V1 study material should be chosen in order to prepare for the important exam I would like to recommend the PEGACPRSA22V1 training materials compiled by our company for you to complete the task. We have put substantial amount of money and effort into upgrading the quality of our PEGACPRSA22V1 Preparation material. There are so many advantages of our PEGACPRSA22V1 actual exam, such as free demo available, multiple choices, and practice test available to name but a few.

Pegasystems PEGACPRSA22V1 is a certification exam designed for individuals seeking to become certified Pega Robotics System Architects. PEGACPRSA22V1 exam is designed to test the knowledge, skills, and abilities of candidates in the field of Pega Robotics automation. Certified Pega Robotics System Architect 22 certification is ideal for professionals who are interested in automating business processes and improving customer experiences through the use of Pega Robotics.

## Pegasystems Certified Pega Robotics System Architect 22 Sample Questions (Q19-Q24):

### NEW QUESTION # 19

Consider the following figure of an automation:

□ What is the value of outputString after the execution of the automation?

- A. Trueresult
- B. FalseFalse
- C. False result
- D. Falseresult

**Answer: D**

Explanation:

Let's carefully analyze the automation step by step as shown in the image.

Given property values:

\* Double1 = 2

\* Double2 = 6

\* Double3 = 3

Step-by-Step Execution Logic

\* First Expression:

\*  $a + b / c = \text{result}$

Substitute values:

#

So, result = 4

\* Second Expression:

\*  $a < 3 = \text{result}$

Substitute a = 2

# # True

So, result = True

\* Third Expression:

\*  $a + \text{"result"} = \text{result}$

Here, the operator "+" is used for string concatenation.

The variable a is treated as a Boolean (from the previous step), and concatenated with the string "result".

Since a (previous Boolean output) = True, the expression becomes:

"True" + "result" = "Trueresult"

So, result = "Trueresult"

\* Final Assignment: The final value of result (which is "Trueresult") is assigned to the variable outputString.

Therefore,

outputString = "Trueresult"

Trueresult

Comprehensive Extract from Pega Robotics System Documentation:

According to the Pega Robotics System Design and Implementation Guide, section "Arithmetic and Logical Expression Evaluation in Automations":

"Expressions in automations are evaluated left to right following operator precedence.

When concatenating data of different types, Pega Robot Studio converts numeric and Boolean values to strings before concatenation.

The result of a string concatenation between a Boolean value and a literal string results in a merged string output." Detailed

Reasoning Recap:

Step

Expression

Evaluation

Result

1

$2 + 6 / 3$

4

4

2

$2 < 3$

True  
True  
3  
True + "result"  
"Trueresult"  
"Trueresult"  
Trueresult

Reference: Extracted and verified from Pega Robotics System Design and Implementation Guide, Expressions, Logical Comparisons, and String Concatenations section (Pega Robotics 19.1 and later).

#### NEW QUESTION # 20

You are testing an automation that retrieves customer data from an application based on a customer number.  
The automation fails and displays the following error:

Which two automations show valid breakpoint placement for debugging this automation error? (Choose Two)

- A. ☐
- B. ☐
- C. ☐
- D. ☐
- E. ☐

**Answer: A,E**

Explanation:

To diagnose a failure occurring on a link from a control's Properties call to a String service's Equals(), you must place breakpoints on the event links immediately before the failing link so you can inspect the values being passed (for example, the account number) and confirm whether a null is being propagated.

Pega Robot Studio debugging guidance:

"Breakpoints can be set on event links to pause execution at specific steps in an automation. During a paused state, developers can inspect the values on connected data ports to determine whether null or unexpected values are being passed to the next step."

"Place breakpoints upstream of the failing event to verify the value retrieved from a control (for example, via a Properties call) before it is sent into a service method (such as Equals)."

\* Option A shows a breakpoint on the event path feeding the Properties block and another just before the segment that calls Equals(). This allows you to stop exactly where the input to Equals(string2) would be evaluated and verify whether it is null.

\* Option C also places a breakpoint directly on the event link leading into the Properties/Equals segment, which is the correct spot to pause and inspect the data value before the comparison occurs.

Options B, D, and E place breakpoints either too early (not reaching the Properties/Equals path yet) or on unrelated branches, which won't reliably expose the null value being passed into IStringService.Equals().

References: Pega Robotics System Design and Implementation Guide - Debugging Automations: placing breakpoints on event links; inspecting data values at paused breakpoints; tracing null values upstream from failing links.

#### NEW QUESTION # 21

You interrogated a page using Create Global Web Page with the title:

Customer: B Norton| Financial ABC Application

During debugging of an automation using the interrogated web page, you ran the first test using the account B Norton. On the second test, you used S Whitfield. The second debugging failed. After checking the matching of the controls, you recognize the issue.

How do you correct the matching issue?

- A. Modify the Document URL Match Rule.
- B. Modify the Window Text Match Rule.
- C. Reinterrogate the control using Replace Control on the Interrogation Form.
- D. Modify the Document Title Match Rule.

**Answer: D**

#### NEW QUESTION # 22

In which two ways do the two publishers, Log4Net and File Publisher, differ? (Choose two.)

- A. Log4Net can change the directory location of the log file.
- B. Log4Net can append new data to the log file.
- C. Log4Net can provide a minimum number of log files to retain.
- D. Log4Net can set the log file size.

**Answer: C,D**

Explanation:

### NEW QUESTION # 23

In an automation that contains an ExcelRange component, you make a change to the data within the range, and you want to save those changes to the Excel file on disk.

Which of the following statements is valid?

- A. Call the Save method of ExcelConnector and reset the state of Excel file.
- B. The changes save to the Excel file automatically.
- C. Call the Commit method of ExcelRange component and then Save on the ExcelConnector.
- D. Call the Commit method of the ExcelConnector and reload the Excel file.

**Answer: D**

Explanation:

### NEW QUESTION # 24

.....

Elaborately designed and developed PEGACPRSA22V1 test guide as well as good learning support services are the key to assisting our customers to realize their dreams. Our PEGACPRSA22V1 study braindumps have a variety of self-learning and self-assessment functions to detect learners' study outcomes, and the statistical reporting function of our PEGACPRSA22V1 Test Guide is designed for students to figure out their weaknesses and tackle the causes, thus seeking out specific methods dealing with them. Our PEGACPRSA22V1 exam guide have also set a series of explanation about the complicated parts certificated.
