IT자격증을 많이 취득하여 IT업계에서 자신만의 단단한 자리를 보장하는것이 여러분들의 로망이 아닐까 싶습니다. Itcertkr의 완벽한 ISTQB인증 CTAL-TM-001덤프는 IT전문가들이 자신만의 노하우와 경험으로 실제ISTQB인증 CTAL-TM-001시험문제에 대비하여 연구제작한 완벽한 작품으로서 100%시험통과율을 보장합니다.

ISTQB CTAL-TM-001 시험요강:

| 주제 | 소개 |
|------|---|
| 주제 1 | <ul style="list-style-type: none"> Managing the Team: This section of the exam measures the skills of a Test Lead and addresses the human side of test management. Candidates must demonstrate how to identify the skills required for each project, assess and develop team competence, and apply motivating leadership practices. The syllabus also covers stakeholder relationship management, understanding interests and influence, articulating the business case for testing, and balancing cost?of?quality considerations to ensure testing is properly resourced, communicated, and valued within the wider project. |
| 주제 2 | <ul style="list-style-type: none"> Managing the Test Activities: This section of the exam measures the skills of a Test Manager and covers the end?to?end coordination of testing work. Candidates must demonstrate how to plan testing—defining objectives, scope, resources, schedule, and risk treatments—then how to monitor progress against those plans, control deviations through corrective actions, and conclude testing with completion reports, archival of testware, and lessons?learned sessions. The syllabus also explores tailoring test activities to project context, applying risk?based testing to focus effort where it matters most, shaping a coherent project test strategy, leading process?improvement initiatives, and selecting and managing test tools throughout their lifecycle. |
| 주제 3 | <ul style="list-style-type: none"> Managing the Product: This section of the exam measures the skills of a Test Analyst and focuses on the artefacts under test and the metrics that describe them. Examinees show how to define and collect test metrics to monitor quality and progress, estimate effort and resources for different test scopes, and organize defect management workflows that fit sequential, iterative, or hybrid lifecycles. The aim is to ensure test outcomes align with objectives and inform stakeholders through clear reporting, while using estimation techniques and defect data to guide ongoing test and process improvements. |

인증시험덤프

현재 많은 IT인사들이 같은 생각하고 있습니다. 그것은 바로 ISTQB CTAL-TM-001 인증시험자격증 취득으로 하여 IT업계의 아주 중요한 한걸음이라고 말합니다. 그만큼 ISTQB CTAL-TM-001 인증시험의 인기는 말 그대로 하늘을 찌르고 있습니다,

최신 ISTQB Test Manager Advanced CTAL-TM-001 무료샘플문제 (Q141-Q146):

질문 # 141

Which of the following are Test Closure activities?

- a. All results lodged in configuration management system - for example test plans, results, logs, reports.
- b. Plans in place for lessons to be learnt to ensure that good practices are repeated and poor practices are not.
- c. Checks undertaken to ensure that all test work is completed - all tests executed or skipped, all defects managed to appropriate conclusion.
- d. All project closure activities completed - for example customer training completed, and analysis of vendor performance undertaken.
- e. AM testing work products delivered to those that need them - for example environments/ regression test sets passed to maintenance.
- f. Checks undertaken to ensure that all tests have been executed, with all defects confirmed as fixed by retesting.

SELECT ONE OPTION

- A. a, c, d and f
- B. a, b, e and f
- C. b, c, d and e.
- **D. a, b, c and e**

정답: D

질문 # 142

You are working with a development team who have a CI/CD pipeline implemented. They want to integrate your team's existing test automation into the pipeline to augment their unit tests so they will have continuous testing. They have already determined that this is technically possible with the tool you are using but with require some changes to the test automation framework to integrate the results reporting What will your team need to make this happen?

- A. A review to determine if this is the best tool to use for the integration with the CI/CD pipeline
- B. Training regarding how to make the framework modifications so the integration is possible
- C. investigation of the licensing models of the tool and an understanding of any potential costs
- **D. Investigation that the tool will be fit for purpose**

정답: D

설명:

* Context Analysis: The question involves integrating an existing test automation framework into a CI /CD pipeline. The integration requires modifications to the framework and results reporting. This aligns with ISTQB Advanced Test Management concepts focusing on evaluating and adapting test tools for specific project needs (Syllabus reference: TM-1.6.1 and TM-1.6.4).

* Evaluation of Options:

* A. Investigation that the tool will be fit for purpose:

* Correct. Before integrating the framework, a thorough investigation is necessary to confirm whether the tool can support the required modifications and functionality. This aligns with the emphasis on ensuring tools meet both current and future needs as per the ISTQB syllabus section TM-1.6.1.

* B. Training regarding how to make the framework modifications so the integration is possible:

* Incorrect. While training might be useful later, it is not the first step or the primary requirement to ensure the integration is feasible.

* C. A review to determine if this is the best tool to use for the integration with the CI/CD pipeline:

* Incorrect. This step might be relevant in an earlier phase of tool selection, but the question assumes the tool has already been chosen.

* D. Investigation of the licensing models of the tool and an understanding of any potential costs:

* Incorrect. Licensing investigation is part of tool selection and budgeting, not directly related to technical integration feasibility.

* Syllabus Alignment: The ISTQB Advanced Level Test Management syllabus emphasizes the importance of ensuring the selected tools and technologies align with organizational requirements and technical feasibility. This is outlined in the "Test Tools" section of the syllabus (TM-1.6.1, TM-1.6.4).

* Conclusion: The correct answer is A. Investigation that the tool will be fit for purpose, as this step ensures the technical requirements for integration are met before proceeding with modifications or training.

ISTQB CTAL-TM Sample Exam Questions

ISTQB CTAL-TM Sample Exam Answers

질문 # 143

Which of the Mowing Is commonly used by a test manager to identity risks'

- A. Lines of code in the system under test
- B. Record/playback test automation tools
- C. Experience with similar projects
- D. Function points within the software

정답: C

설명:

Common Risk Identification Techniques:

A test manager often relies on experience with similar projects to foresee risks related to technical complexity, domain challenges, or previous defects.

Other options listed are less effective for comprehensive risk identification.

Evaluation of Options:

A (Lines of code) and B (Function points) are quantitative measures, not directly tied to risk identification.

C is correct as past experience is crucial for identifying risks early.

D (Record/playback tools) is irrelevant to risk analysis.

Reference and Syllabus Alignment:

Risk identification techniques are discussed under "Risk Management" (TM-1.3.1).

질문 # 144

Your organization has decided to augment your testing team with an offshore team. The offshore team members are experienced testers who are experts in the domain of the system under test Your team is worried about the offshore team taking their jobs and they are resistant to the change You need to pick three of your team members to be the ambassadors for the new team Which competences will be most important for your ambassadors to possess?

- A. Methodological competence and social competence
- B. Professional competence and methodological competence
- C. Social competence and personal competence
- D. Personal competence and professional competence

정답: C

설명:

Scenario Analysis:

The testing team is being augmented with an offshore team, creating potential friction and resistance due to concerns about job security.

The ambassadors' role is critical to ensure smooth collaboration and to address the concerns of the existing team while fostering trust and communication with the offshore team.

Correct Option Justification:

Option C (Social competence and personal competence):

Social competence ensures that ambassadors can effectively communicate, build trust, and resolve conflicts between the onshore and offshore teams. This is essential for fostering collaboration and mitigating resistance.

Personal competence focuses on self-awareness, adaptability, and emotional intelligence, which are crucial for managing their team's concerns and acting as role models for positive behavior during the transition.

Together, these competences address the interpersonal dynamics and morale issues inherent in such a situation.

Option A (Professional competence and methodological competence):

While valuable in other contexts, technical and methodological skills are secondary in this situation. The ambassadors' primary role is to facilitate collaboration, not to focus on domain expertise or process methodologies.

Option B (Methodological competence and social competence):

Methodological competence (e.g., understanding tools and processes) is less critical here than personal competence, as the challenge is more about team dynamics and less about technical execution.

Option D (Personal competence and professional competence):

Professional competence (e.g., domain expertise) is not the priority in addressing team resistance or fostering offshore collaboration.

Social competence is more crucial to building relationships and trust.

Key Competence Emphasis:

The ISTQB Advanced Test Management syllabus highlights the importance of social and interpersonal skills in managing stakeholder relationships, team dynamics, and cross-functional collaborations (TM-3.1.5).

Syllabus Reference:

The syllabus emphasizes the importance of team management and addressing concerns during organizational changes. Ambassadors need to focus on team integration, cultural adaptation, and resolving resistance to change.

Exam Structure Reference:

This question aligns with K2 (understanding) in the ISTQB Advanced Test Management exam, focusing on understanding the roles and skills necessary for successful team collaboration and management.

질문 # 145

Regarding the process described above, what is the most important recommendation you would make using IEEE 1044 as a guide?
2 credits

- A. No classification on type of incident
- B. Incident numbering is manual rather than automated
- C. No mentioning of reproduceability
- D. No priority or severity assigned

정답: D

설명:

Topic 12, Scenario 12 "Automatic Teller Machine (ATM)"

You are a test manager in charge of integration, system and acceptance testing for a bank. You are working on a project to upgrade an existing ATM to allow customers to obtain cash advances from supported credit cards.

The system should allow cash advances from EUR20 to EUR500, inclusively, for all supported credit cards. The supported credit cards are American Express, VISA, Eurocard and Mastercard.

In the master test plan the following items are listed in the section named "items and/or features to be tested":

I All supported credit cards

II Language localization

II Valid and invalid advances

IV Usability

V Response time
