Reliable HP HPE2-W12 Test Questions | Top HPE2-W12 Exam Dumps

We have authoritative production team made up by thousands of experts helping you get hang of our Selling HPE Aruba Networking Solutions study question and enjoy the high quality study experience. We will update the content of HPE2-W12 test guide from time to time according to recent changes of examination outline and current policies, so that every examiner can be well-focused and complete the exam focus in the shortest time. We will provide high quality assurance of HPE2-W12 Exam Questions for our customers with dedication to ensure that we can develop a friendly and sustainable relationship.

We deeply know that the pass rate is the most important. As is well known to us, our passing rate has been high; Ninety-nine percent of people who used our HPE2-W12 real braindumps have passed their exams and get the certificates. I dare to make a bet that you will not be exceptional. Your test pass rate is going to reach more than 99% if you are willing to use our HPE2-W12 Study Materials with a high quality. So it is worthy for you to buy our HPE2-W12 practice prep.

>> **Reliable HP HPE2-W12 Test Questions** <<

Top HPE2-W12 Exam Dumps & HPE2-W12 Pdf Files

According to the survey, the average pass rate of our candidates has reached 99%. High passing rate must be the key factor for choosing, which is also one of the advantages of our HPE2-W12 real study dumps. Our HPE2-W12 exam questions have been widely acclaimed among our customers, and the good reputation in industry prove that choosing our study materials would be the best way for you, and help you gain the HPE2-W12 Certification successfully. With about ten years' research and development we still keep updating our HPE2-W12 prep guide, thus your study process would targeted and efficient.

HP Selling HPE Aruba Networking Solutions Sample Questions (Q15-Q20):

NEW QUESTION # 15
What is one way organizations can ensure their wireless network is always available?

- A. Receive troubleshooting insights from HPE Aruba Networking ClearPass Policy Manager.
- B. Use HPE Aruba Networking CX features to orchestrate software switch updates without causing downtime.
- C. Use HPE Aruba Networking Fabric Composer to create a resilient software fabric for the wireless network.
- D. Use HPE Aruba Networking ClearPass Device Insight to proactively detect issues before they cause problems.

Answer: B

Explanation:
The correct answer isBbecause Aruba CX switches include advanced features such ashitless upgrades (In- Service Software Upgrades, ISSU)andintelligent orchestration toolsthat allow software updates and changes to be performed without downtime. This ensures continuous availability for the wireless infrastructure, as access points rely on the wired underlay provided by CX switching. Keeping the wired foundation resilient is critical to ensuring the wireless network remains available at all times.
Relevant extracts from official HPE Aruba Networking documentation:
* "Aruba CX switches deliver high availability with features like hitless software upgrades and live patching, ensuring nonstop operations."
* "With Aruba CX automation and orchestration, IT teams can roll out software updates without service disruption, guaranteeing continuous connectivity for dependent wireless networks."
* "The always-on architecture of Aruba CX ensures resiliency and maximizes uptime for enterprise wireless deployments."
* "Continuous availability is achieved by eliminating planned downtime during upgrades, a key requirement for supporting critical wireless networks." Why the other options are incorrect:
* AClearPass Policy Manager provides secure access control and policy enforcement but does not ensure wireless network availability.
* CClearPass Device Insight focuses on device visibility and profiling, not proactive wireless availability assurance.
* DFabric Composer is designed for data center fabric automation, not wireless availability.
References (HPE Aruba Networking Solutions / Study Guides):

NEW QUESTION # 16
What topic would uncover whether a customer could have a use case for HPE Aruba Networking Zero Trust Security?

- A. How IT needs to start focusing its security efforts on perimeter solutions, such as branch and data center firewalls.
- B. How IT can improve the user experience for employees using their personal mobile devices.
- C. How much the decision maker understands about how wireless encryption works.
- D. How much visibility and control the customer has over users and IoT devices on the network.

Answer: D

Explanation:
The correct answer isBbecause the foundation of Aruba's Zero Trust Security strategy isvisibility, control, and continuous monitoring of all users and devices-including IoT-on the network.Aruba highlights that Zero Trust is not achieved simply with perimeter defenses but requires pervasive identity-based controls and segmentation inside the network.
Relevant extracts from official HPE Aruba Networking documentation:
* "Zero Trust begins with full-spectrum visibility of all devices, users, and workloads connecting to the network to ensure nothing is trusted by default."
* "With Aruba ClearPass Device Insight and Aruba Central Client Insights, organizations gain the visibility and control required to enforce least-privilege access policies for users and IoT devices."
* "The inability to see and control unmanaged IoT devices represents a major security blind spot that Zero Trust frameworks directly address."
* "Aruba's Zero Trust model applies identity-based access and dynamic segmentation to secure all connected endpoints, regardless of location or device type." Why the other options are incorrect:
* AWireless encryption knowledge is not a determining factor for Zero Trust adoption-it is too narrow and technical.
* CPerimeter firewalls are legacy security strategies; Aruba stresses that Zero Trust must focus inside the network, not just at the

perimeter.
* DUser experience on personal devices (BYOD) is relevant but does not directly uncover a Zero Trust use case. The primary driver is IoT and endpoint visibility with policy enforcement.
References (HPE Aruba Networking Solutions / Study Guides):

NEW QUESTION # 17

A senior IT manager tells you that she wants network admins to spend less time troubleshooting issues so they have more time to focus on new initiatives. How can HPE Aruba Networking deliver the senior IT manager's desired outcome?

- A. HPE Aruba Networking APs and switches rely on the Network Analytics Engine (NAE) to automate the onboarding of devices.
- B. HPE Aruba User Experience Insight (UXI) helps IT determine why data center applications are not performing as well as they should.
- C. HPE Aruba Networking Central with AI for Networking accelerates IT troubleshooting by providing ML-based, real-time insights, and recommendations.
- D. HPE Aruba Networking ClearPass monitors network devices' performance and automatically notifies IT admins of performance issues.

Answer: C

Explanation:
The correct answer isAbecause Aruba Central with AI for Networking leveragesmachine learning-driven analytics and insightsto automatically identify and resolve network performance issues. This minimizes the time IT teams spend on manual troubleshooting, allowing them to focus on strategic initiatives.
Relevant extracts from official HPE Aruba Networking documentation:
* "Aruba Central delivers AI-powered insights and prescriptive recommendations that help IT identify and resolve problems faster, reducing troubleshooting time from hours or days to minutes."
* "By applying AI/ML and advanced analytics, Aruba Central proactively detects anomalies and provides root-cause analysis, minimizing downtime and freeing IT resources."
* "AI for IT operations in Aruba Central accelerates troubleshooting with real-time network health insights and automated remediation guidance." Why the other options are incorrect:
* BClearPass is primarily for secure access control and policy enforcement, not network performance monitoring and troubleshooting.
* CThe Network Analytics Engine (NAE) is a built-in feature of Aruba CX switches for custom telemetry and automation, but it is not designed for broad troubleshooting acceleration across the entire network.
* DUXI is a valuable solution for end-user experience monitoring, but it complements rather than replaces AI-driven troubleshooting across the full infrastructure. The senior IT manager's outcome of reducing admin troubleshooting time maps most directly to AI in Aruba Central.
References (HPE Aruba Networking Solutions / Study Guides):

NEW QUESTION # 18

What is one way that an HPE Aruba Networking Central helps to simplify protecting the network?

- A. By providing policy recommendations that admins can quickly preview and apply.
- B. By automatically adding rules to role-based access control policies in response to new types of threats.
- C. By providing a "sandbox" environment, in which traffic can be safely inspected for malware.
- D. By integrating with HPE Aruba Networking private 5G solutions to automatically enhance the security for Wi-Fi 5, 6, and 7 devices.

Answer: A

Explanation:
The correct answer isDbecauseAruba Centralsimplifies security by offeringpolicy recommendations through AI-powered insights.
These recommendations help IT administrators enforce consistent and adaptive security policies across users, devices, and applications without complex manual configuration.
Admins can review the suggested policies and apply them directly, reducing human error and improving security posture.
Relevant extracts from HPE Aruba Networking documentation:
* "Aruba Central leverages AI insights to provide policy recommendations that can be quickly previewed and applied by administrators."
* "Policy automation simplifies security operations by reducing the manual overhead associated with access control enforcement."
* "With Aruba Central, organizations can streamline role-based access policy deployment, ensuring that best-practice security rules are consistently applied."
* "The solution helps IT scale security controls across distributed environments while reducing operational complexity." Why the other options are incorrect:
* AAruba Central does not rely on private 5G integration for simplifying network protection; that is part ofAruba private 5G solutions.
* BSandboxing traffic inspection is a feature of advancedfirewall/security platforms, not Aruba Central.
* CCentral does not automatically add new access rules without administrator review; instead, it provides recommendationsfor admins to approve.

NEW QUESTION # 19
A customer has many small sites that connect over a wide area network (WAN) to the customer's data center and access the Internet from there. Due to changes in traffic patterns, the CIO now wants to stop sending Internet-bound traffic through the data center, but the Head of IT Security is concerned about potential security risks from that change. What benefit of HPE Aruba Networking solutions should you emphasize?

- A. HPE Aruba Networking offers branch-in-the-box solutions with all the services branches require, so branch devices no longer need to send traffic to the Internet.
- B. HPE Aruba Networking Fabric Composer automatically establishes a secure fabric across all the customer's sites.
- C. HPE Aruba Networking offers SD-WAN solutions for branches with built-in next-generation firewall capabilities.
- D. HPE Aruba Networking solutions optimize network speeds to such a high degree that the company can continue sending all traffic through the data center.

Answer: C

Explanation:
The correct answer isCbecauseHPE Aruba Networking EdgeConnect SD-WANprovides secure local Internet breakout at branch sites withintegrated next-generation firewall (NGFW) and security features.
This allows Internet-bound traffic to be securely routed directly from the branch instead of being backhauled through the data center, while still ensuring full visibility and threat protection.
Relevant extracts from HPE Aruba Networking documentation:
* "Aruba EdgeConnect SD-WAN enables local Internet breakout with integrated NGFW and IDS/IPS capabilities, reducing latency while ensuring strong security."
* "This approach eliminates the inefficiencies of backhauling SaaS and Internet traffic to the data center, without compromising security posture."
* "Built-in security services in Aruba SD-WAN address the CIO's need for performance and the CISO's need for risk mitigation."
* "Aruba EdgeConnect integrates with SSE and SASE frameworks to extend security policies consistently across all branch sites." Why the other options are incorrect:
* AKeeping all traffic routed through the data center defeats the purpose of modern SD-WAN and SaaS- optimized architectures.
* BWhile Aruba provides branch-in-a-box solutions, the specific concern here is security for Internet breakout, addressed by SD-WAN with NGFW.
* DFabric Composer is adata center fabric orchestration tool, not designed for WAN/branch security.
