Reliable FCP_GCS_AD-7.6 Exam Sims, Certification FCP_GCS_AD-7.6 Test Answers
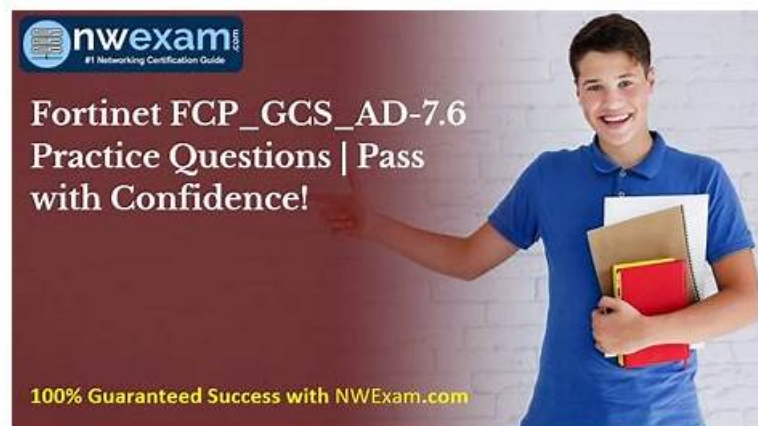

Without practice, you cannot crack the FCP_GCS_AD-7.6 exam. Itcertking facilitates you in this purpose with its desktop Fortinet FCP_GCS_AD-7.6 practice exam software. It helps you get practical experience with the final FCP_GCS_AD-7.6 Exam. By practicing under real FCP - Google Cloud Security 7.6 Administrator (FCP_GCS_AD-7.6) exam situations again and again, you develop confidence and skills to attempt the FCP_GCS_AD-7.6 exam within its allocated time.

The third and last format is the Fortinet FCP_GCS_AD-7.6 desktop practice exam software form that can be used without an active internet connection. This software works offline on the Windows operating system. The practice exams benefit your preparation because you can attempt them multiple times to improve yourself for the Fortinet FCP_GCS_AD-7.6 Certification test. Our FCP - Google Cloud Security 7.6 Administrator (FCP_GCS_AD-7.6) exam dumps are customizable, so you can set the time and questions according to your needs.

FCP - Google Cloud Security 7.6 Administrator Interactive Testing Engine & FCP_GCS_AD-7.6 Latest Training Guide & FCP - Google Cloud Security 7.6 Administrator Self-Paced Training

In the era of informational globalization, the world has witnessed climax of science and technology development, and has enjoyed the prosperity of various scientific blooms. In 21st century, every country had entered the period of talent competition, therefore, we must begin to extend our FCP_GCS_AD-7.6 personal skills, only by this can we become the pioneer among our competitors. We here tell you that there is no need to worry about. Our FCP_GCS_AD-7.6 Actual Questions are updated in a high speed. Since the date you pay successfully, you will enjoy the FCP_GCS_AD-7.6 test guide freely for one year, which can save your time and money. We will send you the latest FCP_GCS_AD-7.6 study dumps through your email, so please check your email then.

Fortinet FCP - Google Cloud Security 7.6 Administrator Sample Questions (Q12-Q17):

NEW QUESTION # 12
For what three reasons must you deploy a set of Google Cloud passthrough network load balancers for an active-passive high-availability (HA) FortiGate cluster instead of a set of Google Cloud proxy network load balancers? (Choose three.)

- A. Passthrough network load balancers support health checks.
- B. Passthrough network load balancers terminate SSL connections.
- C. Passthrough network load balancers offer the highest throughput.
- D. Passthrough network load balancers rely on API calls from FortiGate devices during HA failovers.
- E. Passthrough network load balancers can forward all protocols.

Answer: A,C,E

Explanation:
Passthrough load balancers support health checks to monitor backend health for failover.
They can forward all protocols, not limited to HTTP/HTTPS like proxy load balancers.
Passthrough load balancers provide higher throughput because they don't terminate sessions.

NEW QUESTION # 13
Refer to the exhibit.

Which three things happen during a failover in which the passive FortiGate VM becomes the master cluster member in an active-passive high-availability (HA) environment? (Choose three.)

- A. The health check ensures that incoming traffic to the ephemeral external IP address of the load balancer is forwarded to the new active cluster member.
- B. The Management IP address moves from port3 of the current active member to port3 of the new active cluster member.
- C. The health check status will indicate that the old active cluster member is unhealthy.
- D. The custom route is updated using API calls to forward all traffic to port2 of the new active cluster member device.
- E. The health check for the passthrough load balancers forces internal traffic to route to port2 of the new active cluster member.

Answer: A,C,D

Explanation:
The load balancer health check detects the failure of the old active member and forwards traffic to the new active member.
The health check reflects the status change, marking the previous active as unhealthy.
API calls update custom routes to redirect traffic to the new active cluster member's internal interface (port2).

NEW QUESTION # 14
You have been tasked with destroying all resources relating to a recent active-active high-availability (HA) FGSP Terraform deployment in Google Cloud.
What steps do you have to take to ensure a successful deletion? (Choose two.)

- A. Delete all dependencies to resources relating to the Terraform template.

- B. Use the command terraform plan before destroying the Terraform template.
- C. Use the command terraform destroy to delete all resources deployed by the Terraform template.
- D. Delete all resources manually because active-active HA clusters cannot be destroyed using Terraform.

Answer: A,C

Explanation:
Removing dependencies prevents resource conflicts during deletion.
terraform destroy is the correct command to cleanly and completely remove all resources created by the Terraform deployment.

NEW QUESTION # 15
Which Fortinet proprietary protocol do you use when deploying an active-passive high-availability (HA) cluster in Google Cloud?

- A. Multicast FGSP
- B. Anycast FGSP
- C. Unicast FGCP
- D. Broadcast FGCP

Answer: C

Explanation:
Unicast FGCP (FortiGate Clustering Protocol) is the proprietary protocol used for active-passive HA clusters in Google Cloud, enabling state synchronization and failover communication between cluster members.

NEW QUESTION # 16
Refer to the exhibit.

Which two statements about FortiWeb instances deployed in Google Cloud are true?

- A. You can configure the FortiWeb instance with only one network interface.
- B. You can change the operation mode of FortiWeb.
- C. You can deploy FortiWeb using pay-as-you-go or bring-your-own-license.
- D. By default, you can access FortiWeb using HTTPS on port 443.

Answer: B,C

Explanation:
FortiWeb's operation mode can be changed, such as between reverse proxy and transparent modes, to suit different deployment scenarios.

FortiWeb in Google Cloud supports flexible licensing models, including pay-as-you-go and bring-your-own- license (BYOL).

NEW QUESTION # 17

......

The second format Itcertking also has a product support team available every time to help you out in any terms. And they will fix all of your problems on time. provides its users to study for Prepare for your FCP - Google Cloud Security 7.6 Administrator (FCP_GCS_AD-7.6) exam is web-based practice exam. This format has all the features of desktop practice exam software for Fortinet FCP_GCS_AD-7.6 exam preparation.

Certification FCP_GCS_AD-7.6 Test Answers: https://www.itcertking.com/FCP_GCS_AD-7.6_exam.html

You can understand each version's merits and using method in detail before you decide to buy our FCP_GCS_AD-7.6 study materials, You can avail these FCP_GCS_AD-7.6 changes for free up to 90 days, Fortinet Reliable FCP_GCS_AD-7.6 Exam Sims All the investments and transactions are highly secured and protected, we do not disclose or share the details of our valued customer with any third party, Here, our FCP_GCS_AD-7.6 dumps torrent will ensure you 100% passing.

The historical foundation for reuse, This book will be FCP_GCS_AD-7.6 valuable to professionals with diverse backgrounds, even those with no timing or synchronization experience.
