

EMT Exam Tutorial | Reliable EMT Test Voucher

EMT MODULE 1 EXAM

An adult patient with the capacity to make his own decisions has cardiac-type chest pain and is refusing all treatment. What would be the EMT's most appropriate response?

- a. "I am sorry, but since 911 was called, we must transport you to the hospital. You can refuse treatment there."
- b. "Since you are oriented and rational, it is your right to refuse. Please sign this refusal of care form."
- c. "I will need to have you sign this refusal of care form and a family member sign as a witness."
- d. "Before you refuse, I need to tell you that this could be a heart attack and you could die."**

[Correct Ans: - d.]

Your best protection when an alert and oriented patient with the capacity to make rational decisions refuses EMS care or transport is to:

- a. completely and thoroughly document the incident**
- b. have your partner sign the refusal form as a witness
- c. inform the patient's family of what happened
- d. contact the patient as a later time to see how she is doing

[Correct Ans: - a.]

For negligence to be proven, what must be present?

- a. Harm to the patient, false imprisonment, duty to act
- b. Assault, breach of duty, damage, and then abandonment
- c. Duty to act, breach of duty, battery, foreseeability
- d. Duty to act, breach of duty, injury, proximate cause**

[Correct Ans: - d.]

Despite a patient's protest that he does not want his blood pressure taken, the EMT places a BP cuff on his arm and takes his blood pressure. The EMT states: "See? It is just as I suspected-your blood

maintain a valid question bank that is updated by checking the update daily.

We offer an excellent study guide and excellent solutions for all professionals who wish to pass the certification exams in the first attempt. By taking the practice material designed by our specialists, and after it you'll be able to pass your exams in the first attempt. We offer a 100% guarantee of success and we are sure you will succeed.

Actual4Dumps gives everything you require to pass the certification exam. If you are looking for certification and are not successful, it is time for you to try what we offer.

Obviously, at certificate-qusetions.com, we give certification practice exams and exam dumps, as we think that practice exams are the most important thing an expert can do when preparing for a certification exam (in the IT certification area or otherwise).

When you start preparing for the certification exam, there are some basic but powerful methods that allow you to identify everything in your preparation. Many experts prepare the certification from books, so they are dissatisfied if unfortunately, they fail in the exam. The fact is that understanding the root of the information is only a tiny part of the preparation that most individuals have to pass the certification exams.

No one likes failure, mostly in such complex fields where certification requires a lot of research, planning and attention. A single attempt is so tough that it could even break the nerves of the students. Our exam dumps are so valid and best which will able you to pass your NREMT 77-420 without any pain.

Smart Candidates who want to build a solid foundation in all exam topics and related technologies usually combine video lectures with study models to reap the benefits of both but there is one crucial preparation tool as often overlooked by most candidates the practice exams.

Following is the Test Prep EMT Exam Format

NREMT Emergency Medical Technicians Exam Sample Questions (Q34-Q39):

NEW QUESTION # 34

In order for a plaintiff to recover damages in a lawsuit against an EMT, there must be a duty to perform, breach of duty, damage,

and

- A. Malfeasance
- B. Contributory neglect
- C. Proximate causation
- D. Abandonment

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

To establish negligence, four legal elements must be proven:

- * Duty to act- a legal obligation to provide care.
- * Breach of duty- failing to meet the standard of care.
- * Damages- harm occurred.
- * Proximate causation- the breach directly caused the damage.

"Proximate causation" means the EMT's action or inaction is closely linked to the harm suffered by the patient.

NEW QUESTION # 35

Which of the following sections are designated by command at an MCI? Select the three correct options.

- A. Planning
- B. Staging
- C. Logistics
- D. Aviation
- E. Catering
- F. Finance

Answer: A,C,F

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Incident Command System (ICS) for Mass Casualty Incidents (MCI), the four major sections are:

- * Planning: Collects data and develops response strategies
- * Logistics: Supplies and personnel
- * Finance/Administration: Cost tracking, contracts, compensation

Staging is a tactical location, not a management section. Catering and aviation are not command-level ICS designations unless part of specific tasks under logistics or operations.

NEW QUESTION # 36

Defusing sessions should do which of the following in order to be successful? Select the two correct options.

- A. Be held immediately following an incident
- B. Allow the open sharing of information
- C. Have mental health experts present during the session
- D. Force all providers to provide feedback
- E. Take place 72 hours or more following an incident

Answer: A,B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Defusing is an informal, short-term intervention after a critical incident. It should:

- * Occur within hours of the event (ideally the same shift)
- * Encourage voluntary open discussion in a confidential setting

It is not a full debrief or counseling session and doesn't require mental health professionals present. Forcing participation or waiting too long (e.g., 72+ hours) can reduce its effectiveness.

NEW QUESTION # 37

A 26-year-old patient has an altered mental status. Family advises that the patient has diabetes. The patient's skin is pale, cool, and clammy. What, if anything, can the EMT infer about the patient's glucose level based on the patient's presentation?

- A. The patient's blood sugar is most likely normal.
- B. The patient's blood sugar is most likely low.
- C. The patient's blood sugar cannot be inferred.
- D. The patient's blood sugar is most likely high.

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Altered mental status, combined with pale, cool, and clammy skin, is strongly suggestive of hypoglycemia (low blood sugar).

Hypoglycemia is especially dangerous in diabetics who take insulin or oral hypoglycemics.

The body's adrenergic response causes the "cool and clammy" presentation.

Hyperglycemia typically presents with warm, dry skin and develops more slowly. EMTs should administer oral glucose if the patient can swallow.

NEW QUESTION # 38

A 30-year-old patient has a stab wound to the left forearm that is bleeding profusely. Which of the following interventions should the EMT perform first?

- A. Determine severity of wound
- B. Place a tourniquet
- C. Apply direct pressure
- D. Assess the airway

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

The first step in hemorrhage control for external bleeding is always direct pressure using gloved hands or a dressing. Only if this fails or the bleeding is severe and life-threatening (especially from extremities) should a tourniquet be applied.

Assessing the airway is critical in overall trauma care but not the first priority in isolated extremity hemorrhage. Severity assessment is secondary to bleeding control.
