Microsoft AI-900 learning materials are new but increasingly popular choices these days which incorporate the newest information and the most professional knowledge of the practice exam. All points of questions required are compiled into our Microsoft Azure AI Fundamentals AI-900 Preparation quiz by experts. By the way, the AI-900 certificate is of great importance for your future and

education.

## Microsoft Azure AI Fundamentals Sample Questions (Q102-Q107):

### NEW QUESTION # 102

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
A webchat bot can interact with users visiting a website.	<input type="radio"/>	<input type="radio"/>
Automatically generating captions for pre-recorded videos is an example of conversational AI.	<input type="radio"/>	<input type="radio"/>
A smart device in the home that responds to questions such as "What will the weather be like today?" is an example of conversational AI.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Statements	Yes	No
A webchat bot can interact with users visiting a website.	<input type="radio"/>	<input type="radio"/>
Automatically generating captions for pre-recorded videos is an example of conversational AI.	<input type="radio"/>	<input type="radio"/>
A smart device in the home that responds to questions such as "What will the weather be like today?" is an example of conversational AI.	<input type="radio"/>	<input type="radio"/>

Explanation

Graphical user interface, text, application, letter, email Description automatically generated

Statements	Yes	No
A webchat bot can interact with users visiting a website.	<input checked="" type="radio"/>	<input type="radio"/>
Automatically generating captions for pre-recorded videos is an example of conversational AI.	<input checked="" type="radio"/>	<input type="radio"/>
A smart device in the home that responds to questions such as "What will the weather be like today?" is an example of conversational AI.	<input checked="" type="radio"/>	<input type="radio"/>

### NEW QUESTION # 103

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

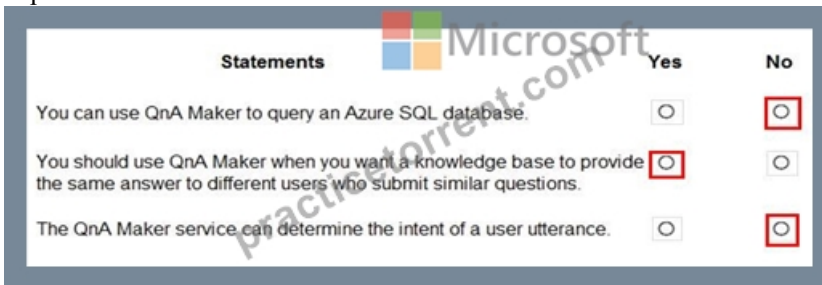

NOTE: Each correct selection is worth one point.

Statements  Microsoft Yes No

- You can use QnA Maker to query an Azure SQL database.  Yes  No
- You should use QnA Maker when you want a knowledge base to provide the same answer to different users who submit similar questions.  Yes  No
- The QnA Maker service can determine the intent of a user utterance.  Yes  No

**Answer:**

**Explanation:**

**Reference:**

<https://docs.microsoft.com/en-gb/azure/cognitive-services/qnamaker/concepts/data-sources-and-content>  
<https://docs.microsoft.com/en-us/azure/cognitive-services/luis/choose-natural-language-processing-service> QnA maker conversational AI service and has nothing to do with SQL database You can easily create a user support bot solution on Microsoft Azure using a combination of two core technologies:  
 - QnA Maker. This cognitive service enables you to create and publish a knowledge base with built-in natural language processing capabilities.  
 - Azure Bot Service. This service provides a framework for developing, publishing, and managing bots on Azure.  
<https://docs.microsoft.com/en-us/learn/modules/build-faq-chatbot-qna-maker-azure-bot-service/2-get-started-qna-bot> LUIS is used to understand user intent from utterances.  
 Creating a language understanding application with Language Understanding consists of two main tasks. First you must define entities, intents, and utterances with which to train the language model - referred to as authoring the model. Then you must publish the model so that client applications can use it for intent and entity prediction based on user input.  
<https://docs.microsoft.com/en-us/azure/cognitive-services/luis/choose-natural-language-processing-service>

**NEW QUESTION # 104**

Match the Azure Cognitive Services service to the appropriate actions.

To answer, drag the appropriate service from the column on the left to its action on the right. Each service may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point.

Services

- Speech
- Language service
- Translator Text

Answer Area

- Convert a user's speech to text.
- Identify a user's intent.
- Provide a spoken response to the user.

**Answer:**

**Explanation:**

**Services**

- Speech
- Language service
- Translator text

**Answer Area**

- Speech: Convert a user's speech to text.
- Language service: Identify a user's intent.
- Speech: Provide a spoken response to the user.

**NEW QUESTION # 105**

To complete the sentence, select the appropriate option in the answer area.

Predicting how many vehicles will travel across a bridge on a given day is an example of

- classification.
- clustering.
- regression.

**Answer:**

Explanation:

Predicting how many vehicles will travel across a bridge on a given day is an example of

- classification.
- clustering.
- regression.
