Useful Study Guide & Exam Questions to Pass the Huawei H13-321 Exam

Huawei H13-321 Exam Details, Syllabus, and Questions

www.CertFun.com
Here are all the necessary details to pass the H13-321 exam on your first attempt. Get rid of all your worries now and find the details regarding the syllabus, study guide, practice tests, books, and study materials in one place. Through the H13-321 certification preparation, you can learn more on the HCIP-AI-EI Developer, and getting the Huawei Certified ICT Professional - AI-EI Developer certification gets easy.

In order to help these people who have bought the H13-321_V2.5 study materials of our company, There is a team of expert in our company, which is responsible to renovate and update the H13-321_V2.5 study materials provided by our company. We are going to promise that we will have a lasting and sustainable cooperation with customers who want to buy the H13-321_V2.5 Study Materials from our company. If you decide to buy our H13-321_V2.5 study materials, you will never miss any important information. In addition, we can promise the updating system is free for you.

To develop a new study system needs to spend a lot of manpower and financial resources, first of all, essential, of course, is the most intuitive skill learning materials, to some extent this greatly affected the overall quality of the learning materials. Our HCIP-AI-EI Developer V2.5 study training dumps do our best to find all the valuable reference books, then, the product we hired experts will carefully analyzing and summarizing the related materials, such as: Huawei H13-321_V2.5 exam, eventually form a complete set of the review system. Experts before starting the compilation of "the H13-321_V2.5 Latest Questions", has put all the contents of the knowledge point build a clear framework in mind, though it needs a long wait, but product experts and not give up, but always adhere to the effort, in the end, they finished all the compilation. So, you're lucky enough to meet our H13-321_V2.5 test guide I, and it's all the work of the experts. If you want to pass the qualifying exam with high quality, choose our products. We are absolutely responsible for you. Don't hesitate!

Huawei H13-321_V2.5 Exam | Study H13-321_V2.5 Demo - Offer you Valid H13-321_V2.5 Valid Exam Answers

Our product boosts varied functions to be convenient for you to master the H13-321_V2.5 training materials and get a good preparation for the exam and they include the self-learning function, the self-assessment function, the function to stimulate the exam and the timing function. We provide 24-hours online on H13-321_V2.5 Guide prep customer service and the long-distance professional personnel assistance to for the client. If clients have any problems about our H13-321_V2.5 study materials they can contact our customer service at any time.

Huawei HCIP-AI-EI Developer V2.5 Sample Questions (Q48-Q53):

NEW QUESTION # 48

If a scanned document is not properly placed, and the text is tilted, it is difficult to recognize the characters in the document. Which of the following techniques can be used for correction in this case?

- A. Affine transformation
- B. Rotational transformation
- C. Perspective transformation
- D. Grayscale transformation

Answer: A,B

Explanation:

When text in scanned images is tilted, rotational transformation can correct the angle of the text to align horizontally. Affine transformation can correct tilt and skew by applying linear transformations such as rotation, scaling, and translation while preserving parallelism of lines. Perspective transformation (A) is used for correcting trapezoidal distortions, while grayscale transformation (B) only adjusts pixel intensity, not orientation.

Exact Extract from HCIP-AI EI Developer V2.5:

"Text skew correction can be achieved using rotation and affine transformations, aligning text baselines and improving OCR accuracy." Reference: HCIP-AI EI Developer V2.5 Official Study Guide - Chapter: Image Transformation

NEW QUESTION # 49

The development of large models should comply with ethical principles to ensure the legal, fair, and transparent use of data.

- A. TRUE
- B. FALSE

Answer: A

Explanation:

Ethical AI development requires ensuring that large models are trained and deployed in a way that respects laws, fairness, and transparency. This includes preventing bias, ensuring user privacy, protecting intellectual property, and being transparent about data usage and decision-making processes.

Exact Extract from HCIP-AI EI Developer V2.5:

"The development and deployment of large models must follow ethical principles to ensure legal, fair, and transparent use of data, avoiding bias and misuse." Reference: HCIP-AI EI Developer V2.5 Official Study Guide - Chapter: Ethical AI Practices

NEW QUESTION # 50

The U-Net uses an upsampling mechanism and has a fully-connected layer.

- A. FALSE
- B. TRUE

Answer: A

Explanation:

U-Net is a convolutional neural network architecture designed for biomedical image segmentation. It consists of a contracting path for feature extraction and an expansive path for precise localization, using upsampling in the decoding path. However, U-Net does not include fully-connected layers; instead, it uses only convolutional layers to maintain spatial information. Removing fully-connected layers ensures the network can handle images of varying sizes without requiring fixed input dimensions.

Exact Extract from HCIP-AI EI Developer V2.5:

"U-Net architecture is fully convolutional and avoids fully-connected layers to preserve spatial resolution, relying on upsampling in

the decoder path for segmentation tasks." Reference:HCIP-AI EI Developer V2.5 Official Study Guide - Chapter: Semantic Segmentation Networks

NEW QUESTION # 51

In 2017, the Google machine translation team proposed the Transformer in their paper Attention is All You Need. The Transformer consists of an encoder and a(n) ----- . (Fill in the blank.)

Answer:

Explanation:

Decoder

Explanation:

The Transformer model architecture includes:

* Encoder: Encodes the input sequence into contextualized representations.

* Decoder: Uses the encoder output and self-attention over previously generated tokens to produce the target sequence.

Exact Extract from HCIP-AI EI Developer V2.5:

"The Transformer consists of an encoder-decoder structure, with self-attention mechanisms in both components for sequence-to-sequence learning." Reference:HCIP-AI EI Developer V2.5 Official Study Guide - Chapter: Transformer Overview

NEW QUESTION # 52

Which of the following statements about the standard normal distribution are true?

- A. The variance is 1.
- B. The mean is 1.
- C. The variance is 0.
- D. The mean is 0.

Answer: A,D

Explanation:

A standard normal distribution is a special case of the normal distribution with:

* Mean (μ) = 0

* Variance (σ^2) = 1 This standardization is widely used in statistics and machine learning to normalize features for improved model convergence. Statements A and B are incorrect because variance is never 0 in a valid distribution, and the mean is 0, not 1.

Exact Extract from HCIP-AI EI Developer V2.5:

"The standard normal distribution is defined with $\mu = 0$ and $\sigma^2 = 1$, providing a normalized scale for statistical analysis."

NEW QUESTION # 53

.....

The H13-321_V2.5 software supports the MS operating system and can simulate the real test environment. In addition, the H13-321_V2.5 software has a variety of self-learning and self-assessment functions to test learning outcome, which will help you increase confidence to pass exam. The contents of the three versions are the same. Each of them neither limits the number of devices used or the number of users at the same time. You can choose according to your needs.
