The 300-820 exam is intended for IT professionals

who are responsible for implementing advanced collaboration solutions in complex environments.

Cisco Implementing Cisco Collaboration Hybrid and Cloud Technologies (CLHCT) v2.0 Sample Questions (Q49-Q54):

NEW QUESTION # 49

An administrator wants to enable users in a hybrid environment to dial internal extensions with 4 digits and route unknown 2- to 10-digit extensions to the on-premises PBX. The organization uses Webex Calling with some users still on-premises with Cisco UCM. The administrator configured a route group connected to the on-premises PBX trunk and location settings are enabled for Calls to On-Premises Extensions. Which additional dial plan configuration in Control Hub is needed to support this setup?

- A. Disable internal dialing in Control Hub to force all calls to be routed to the PBX.
- B. Create a dial plan that restricts calling to E.164 only to prevent unknown extensions.
- C. Remove the route group to force calls through PSTN to the PBX.
- **D. Add a dial plan with patterns matching the 2- to 10-digit unknown extensions and set the route choice to the on-premises route group.**

Answer: D

Explanation:

A Control Hub dial plan must define the extension patterns that should route to the on-premises PBX. Setting the route choice to the on-premises route group sends unknown 2- to 10-digit extension calls over the configured trunk instead of treating them as Webex Calling-only destinations.

NEW QUESTION # 50

Refer to the exhibit. An ISDN gateway is registered to Expressway-C with a prefix of 9 and/or it has a neighbor zone specified that routes calls starting with a 9.

	Expressway-E
Rule name	Enter Block ISDN call for example
Description	Enter Block everything (including nonregistered endpoints)
Priority	Enter 41
Protocol	Any
Source	
Request must be authenticated	No
Mode	Alias pattern match
Pattern type	Regex
Pattern string	Enter (9\d+) (.*) (@example.com)
Pattern behavior	Replace
Replace string	Enter do-not-route-this-call for example
On successful match	Stop
Target	TraversalZone
State	Enabled

Which value should be entered into the "Source" field to prevent toll fraud regardless at origin of the call?

- A. Traversal Zone
- B. All
- **C. Any**
- D. Neighbor Zone

Answer: C

Explanation:

The "Source" field specifies the source of the call that will be matched by the rule.

The goal is to prevent toll fraud regardless of the call's origin.

Therefore, we need to match calls from any source.

The option "Any" indicates that the rule will match calls from all sources.

By selecting "Any," we ensure that the rule will block toll fraud attempts regardless of the caller's location or network.

NEW QUESTION # 51

Which two licenses are required for the B2B feature to work? (Choose two.)

- A. TURN Relays
- B. Traversal Server
- C. Rich Media Sessions
- D. Device Provisioning
- E. Advanced Networking

Answer: C,D

NEW QUESTION # 52

When determining why Mobile and Remote Access to Cisco TelePresence equipment does not work anymore for an organization. There are several administrators and configuration changes could have happened without anyone knowing. Internal communication seems to be working, but no external system can register or call anywhere. Gathering symptoms, you also discover that no internal systems can call out either.

What is TraversalZone missing that causes this issue?

- A. pipe to the DefaultZone
- B. link to the DefaultZone
- C. SIP trunk to the DefaultZone
- D. route pattern to the DefaultZone

Answer: B

NEW QUESTION # 53

An engineer must configure the zone to connect to an Expressway-E using Single NIC with NAT. The internal IP address is 192.168.10.63, and the NAT address is 203.0.113.5. What must the engineer configure on the Expressway-C to meet this requirement?

- A. neighbor zone with the peer address of 203.0.113.5
- B. traversal zone with the peer address 192.168.10.63
- C. traversal zone with the peer address of 203.0.113.5
- D. neighbor zone with the peer address 192.168.10.63

Answer: C

NEW QUESTION # 54
