Network Programmability Foundation

In the framework of this domain that makes up 10% of the exam content, the learners have to demonstrate their skills in the following tasks:

- Describing the features of the API techniques (SOAP, RPC, and REST);
- Describing the difficulties found and patterns that are used when consuming APIs asynchronously or synchronously;
- Utilizing the standard version control operations with git;
- Interpreting the Python scripts that contain data classes, types, functions, looping, and conditions.
- Identifying the roles of firewall, reverse proxy, DNS, and load balancer in the collaboration app deployment;

Cisco Automating and Programming Cisco Collaboration Solutions Sample Questions (Q47-Q52):

NEW QUESTION # 47

Drag and Drop Question

Drag and drop the elements to create the command to initiate a call to device@company.com using the Webex Devices xAPI SSH

Interface. Not all options are used.

Answer:

Explanation:

NEW QUESTION # 48

Refer to the exhibit.

Which code snippet must be added to the blank in the script to create a new Cisco Webex space?

- A. ☐
- B. ☐
- C. ☐
- D. ☒

Answer: D

Explanation:

Explanation:

To create a new Webex space (room) using the Webex REST API, you must send a POST request to the /v1/rooms endpoint using a valid access token for authorization.

This uses the correct HTTP method (POST), authenticates with the correct token (access_token), and formats the JSON body properly with the required title field.

NEW QUESTION # 49

Refer to the exhibit.

Which snippet of code does a user with the administrator role use in the missing "body" section to create a new user in a Webex Teams organization?

- A. Option D
- B. Option B
- C. Option C
- D. Option A

Answer: C

NEW QUESTION # 50

Drag and Drop Question

Drag and drop the code snippets from the bottom onto the boxes in the Python script to create an internal event listener for two nodes on the device and send events back to a webhooks server using the xAPI xCommand directly on the end device. Not all options are used.

Answer:

Explanation:

Explanation:

/putxmlis the correct endpoint for sending xAPI commands directly to the Cisco device.

The XML payload defines an HttpFeedbackregistration to subscribe to specific event and status changes.

payloadis the variable holding the formatted XML command.

postis the method to send the payload to the device using the session.

NEW QUESTION # 51

Which two capabilities can be implemented in a custom application using the Cisco Unified IP Phone Services API? (Choose two.)

- A. Authenticate the phone to the network.

- Answer: B,D**
