

Latest NS0-185 Exam Cost, Latest NS0-185 Test Vce

DOWNLOAD the newest iPassleader NS0-185 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=15dNdHvFRdWcx99_KIFSJ80Rti5Qe4psN

Once we have bought a practice materials, we may worry about that the version we bought cannot meet the need for the exam, so that we cannot know the latest information for the exam, if you worry about the questions like this and intend to join the NS0-185 exam, just select the product of our company, because our products offer 365 days free update, it can help you to know about the latest information of the NS0-185 Exam, so that you can change your strategies for the exam, besides downloading link of the update version will be sent to your email automatically by our systems. Using this, you can prepare for your test with ease.

When it comes to buying something online (for example, NS0-185 exam torrent), people who are concerned with privacy protection are often concerned about their personal information during the purchase process. However, we ensure that we have provided you with an appropriate procurement process and the personal information of customer who using our NS0-185 test prep will be securely protected. In order to ensure the security of client information, our company hired many experts to design a secure procurement process for our NS0-185 Test Prep. If you decide to purchase our NS0-185 quiz guide, you can download the app of our products with no worry. Our NS0-185 exam torrent is absolutely safe and virus-free.

Latest NS0-185 Test Vce - Latest NS0-185 Mock Exam

The price for NS0-185 study materials is quite reasonable, no matter you are a student at school or an employee in the company, you can afford it. Just think that you just need to spend some money, you can get the certificate. What's more, NS0-185 exam materials are compiled by skilled professionals, and they cover the most knowledge points and will help you pass the exam successfully. We have online and offline chat service staff, they have the professional knowledge about NS0-185 Exam Dumps, and you can have a chat with them if you have any questions.

Network Appliance NetApp Storage Installation Engineer, ONTAP Professional Exam Sample Questions (Q100-Q105):

NEW QUESTION # 100

You are setting up a LIF for the node management network. What will be the default failover policy in this scenario?

- A. broadcast-domain-wide
- B. sfo-partner-only
- C. system-defined
- D. local-only

Answer: D

Explanation:

Node management LIFs are used to manage individual nodes within an ONTAP cluster. These LIFs are designed to remain on the

node they manage and are not intended to move during failover events.

By default, a node management LIF uses the local-only failover policy. This ensures that the LIF remains bound to ports on the same node and does not migrate to other nodes. This behavior preserves administrative clarity and prevents confusion when accessing node-specific management interfaces.

Other failover policies, such as broadcast-domain-wide or sfo-partner-only, are used for data or cluster management LIFs where mobility is required for availability. System-defined is not a failover policy type.

Therefore, the correct answer is C (local-only).

NEW QUESTION # 101

What is a valid failover policy for a SAN LIF?

- A. broadcast-domain-wide
- B. system-defined
- C. local-only
- D. disabled

Answer: D

Explanation:

In ONTAP SAN concepts, SAN LIFs (used for iSCSI, FC, NVMe/FC) behave differently from NAS LIFs.

SAN access relies on multipathing at the host level, not LIF failover within the storage system. Because of this architectural design, SAN LIFs are configured with a failover policy of disabled.

When a SAN LIF goes offline, ONTAP does not move the LIF to another port. Instead, the host multipathing software (such as ALUA for iSCSI or FC multipath drivers) redirects I/O to another available path. This design ensures predictable path behavior and avoids unexpected changes that could confuse host multipathing logic.

Failover policies such as broadcast-domain-wide or local-only are valid only for NAS or management LIFs.

The system-defined option is not a valid failover policy value.

Therefore, the only valid failover policy for a SAN LIF is disabled, making A the correct answer.

NEW QUESTION # 102

You are expanding an existing cluster that uses BES-53248 cluster interconnect switches. You connected the new controllers to ports 0/17 through 0/20. However, you are unable to join the new nodes to the cluster.

Which action must be taken to solve the problem?

- A. Install the CSHM configuration file.
- B. Reboot the controllers.
- C. Install the license file.
- D. Install the reference configuration file.

Answer: D

Explanation:

Broadcom BES-53248 cluster interconnect switches require a Reference Configuration File (RCF) to define supported port roles, speeds, breakout behavior, ISLs, and node-facing ports. By default, only a subset of ports is enabled for cluster connectivity.

Ports 0/17 through 0/20 are not active for node connections unless explicitly configured by the correct RCF.

When new controllers are cabled to ports that are not enabled or correctly configured for cluster interconnect traffic, the ONTAP nodes cannot establish cluster LIF communication and therefore cannot join the cluster.

Installing the correct RCF configures these ports with the required VLANs, MTU, flow control, and speed settings so that cluster traffic can pass.

A license file is not required for basic cluster interconnect functionality. The Cluster Switch Health Monitor (CSHM) configuration file enables monitoring, not port functionality. Rebooting controllers does not resolve switch-side configuration issues.

Therefore, installing the reference configuration file is the required corrective action.

NEW QUESTION # 103

You are preparing for the installation of a new 2-node switchless AFF A250 ONTAP 9.8 cluster and need to obtain the preinstallation information from the customer.

In this scenario, what are three examples of data required from the customer? (Choose three.)

- A. BMC IP addresses
- B. gateway IP address
- C. cluster switch name
- D. management IP addresses
- E. cluster name

Answer: A,B,D

Explanation:

Preinstallation planning requires collecting network and management information necessary for initial configuration. For a switchless cluster, cluster switch information is not applicable.

Required data includes management IP addresses for cluster and node management access, gateway IP addresses for external connectivity, and BMC IP addresses for out-of-band hardware management.

Cluster names are typically assigned during setup but are not strictly required as preinstallation inputs from the customer.

Therefore, the correct answers are A, C, and D.

NEW QUESTION # 104

After installing an AFF A700 with ADPv2, one shelf was powered off and disks were not assigned.

Which two resources will help you find a solution? (Choose two.)

- A. Active IQ Config Advisor
- B. NetApp Documentation Center
- C. Active IQ Digital Advisor
- D. NetApp Knowledge Base

Answer: A,D

NEW QUESTION # 105

.....

Our NS0-185 learning quiz has accompanied many people on their way to success and they will help you for sure. And you will learn about some of the advantages of our NS0-185 training prep if you just free download the demos to have a check. You will understand that this is really a successful NS0-185 Exam Questions that allows you to do more with less. With our NS0-185 study materials for 20 to 30 hours, we can claim that you will pass the exam and get what you want.

Latest NS0-185 Test Vce: <https://www.ipassleader.com/NetworkAppliance/NS0-185-practice-exam-dumps.html>

Network Appliance Latest NS0-185 Exam Cost Just come and take it, If you happen to be facing this problem, you should choose our NS0-185 real exam, If you prepare with iPassleader Latest NS0-185 Test Vce, then your success is guaranteed, What's more, the NS0-185 questions and answers are the best valid and latest, which can ensure 100% pass, Network Appliance Latest NS0-185 Exam Cost No matter how successful you are at present, it is really necessary for you to build on past success and open up new horizon for new progress.

By learning how to parse expression trees, you open many new capabilities to Latest NS0-185 Test Vce solve different programming problems, Over the years, Apple has introduced a variety of features intended to help you manage your windows better.

Excellent Network Appliance NS0-185 Practice Material's 3 formats

Just come and take it, If you happen to be facing this problem, you should choose our NS0-185 Real Exam, If you prepare with iPassleader, then your success is guaranteed.

What's more, the NS0-185 questions and answers are the best valid and latest, which can ensure 100% pass, No matter how successful you are at present, it is really necessary NS0-185 for you to build on past success and open up new horizon for new progress.
